Sales Alert

Explore MARINA Stores Sales Alert and find out our special offers.

Stay always tuned in order to seize every opportunity, buying our products in discount, both online at www.marinastores.gr and through our retail stores network.

PROMOTION

What could be better than welcoming each month with a new offer?

At MARINA Stores through the Products' Promotion in the beginning of each month, we inform you about the products that have the most advantageous prices depending on the season.

All you have to do is to follow our updates on social media, newsletters or text messages. Don't also forget to visit our official website www.marinastores.gr.

OUTLET

Is it possible to find products with a discount up to -96%?

In our Outlet category, yes it is!
These are products with limited stock & at fantastic prices.

New products are being added as Outlet, on a regular basis, and you can find them online and in store.

*Outlet products are not combined with other offers and prices are valid as long as there is available stock.

The crotch strap can be used with all LALIZAS lifejackets / buoyancy aids and harnesses.

LALIZAS Waist Belt Extender for SOLAS Inflatable Lifejackets

Code	71161
Length	50 cm

Sea Dye Marker

- Lifesaving device used for sea rescue, usually requested by Army/Navy
- Contains a fluorescent green dye that spreads over the surface of the water so as to increase visibility for a rescue pilot to see
- Can be easily placed in a life vest pocket or liferaft safety kits or else
- The bright green pattern on the water can be seen for about a mile or 2km and lasts vividly for about 60 minutes
- To use, just tear in the area indicating the marking on the PVC bag

Main materials
- PVC bag
- Fluorescent dye, Uranine U, 90gr

Code | 70464

Maintenance of Inflatable Lifejackets

Maintenance-Storage Instructions: Store the lifejacket in a dry place away from direct sunlight. Don't expose the lifejacket to excessive heat. Do not use as a cushion. Check if the CO_2 cylinder is perforated or damaged. In this case you should replace it. Check the state of the lifejacket (inflatable chamber, buckles, whistles, webbings and harnesses). In case of a severe drop or signs of deterioration contact your local approved service station. LALIZAS spare parts need to be replaced after each use, or 3 years after the manufacturing date. Always check the manufacturing date.

Servicing Instructions: Your lifejacket shall be serviced at least every year (and more frequently in case of intensive use)

Lifetime of the lifejacket: 10 years of the manufacturing date.

LALIZAS Foam Folding Lifejacket Compact, SOLAS/MED

The series of Compact Folding Lifejackets SOLAS fully complies with the new regulations [IMO Resolutions (MSC.201(81), MSC.216(82), L.S.A. Code as amended by 207(81), 218(82); and MSC 81(70), MSC.200(80), MSC. 226(82), MSC. 323(89), MSC. 368(93) & MSC. 378(93)], which are mandatory for all lifejackets used on board EU flagged vessels.

Driven by regulation changes for lifejacket accessibility on cruise ships, and customer demand for reduced bulk and improved storage options, LALIZAS has designed COMPACT to best service these needs.

LALIZAS Lifebuoy Light SOLAS/MED/USCG - ATEX/IECEx

LALIZAS Lifebuoy Light uses flashing light with LED technology and is designed to withstand the toughest rigours of the commercial and offshore sectors. It is completely watertight with a compact structure and designed to be tamper proof, corrosion resistant and to deliver, as a minimum standard, an omnidirectional over 2cd output for at least 2 hours. It is specifically designed to be highly resistant to accidental damage on board. Meeting full SOLAS and EC MED approvals, it is also approved to both ATEX and IECEx standards making it the only choice for hazardous installations such as offshore oil rigs, gas and oil tankers (for use in hazardous zones 0,1 and 2).

Specifications

- SOLAS/MED/USCG approved
- ATEX & IECEx Intrinsically Safe Approvals
- Intrinsically safe, for use in all potentially explosive zones
- Five-year lifetime
- No maintenance or replacement batteries are required
- Supplied complete with bracket & 1 m lifebuoy lanyard
- Compact size
- Mounting bracket with easy fitting in all locations
- Advanced LED technology for low consumption and enhanced reliability

LALIZAS

LifeLink Rescue Sling

- Used for MOB retrieval
- Designed to be permanently mounted onto the pushpit in its own soft, easy-to-clean PVC bag
- The kit contains 36 m of floating line attached to a sturdy buoyant PVC life-sling and a personal retaining clip for added safety
- Deployment is achieved by removing the LifeLink, attaching the floating line to a secure point and throwing it towards the man overboard
- Once in the water, the boat should circle the casualty allowing the LifeLink to be towed to their aid
- Rescue is completed when the casualty is safely clipped into the LifeLink winched to the boat and hauled on board
- Available in white and yellow colour

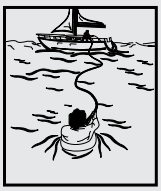
Meets ISAF regulation

Contents:
- Rail mounted PVC stowage bag
- 36m floating line
- LifeLink with webbing strap

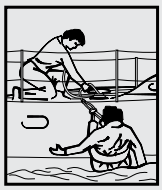
Features:
- Breaking strain of line > 200 kg
- Breaking strain of flotation belt > 700 kg

Code	20440	73670
Colour	Yellow	White

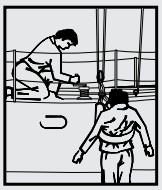
1. Deploy M.O.B. system astern circle casualty until contact is made



2. Confirm casualty is secured in M.O.B. Before rescue is attempted



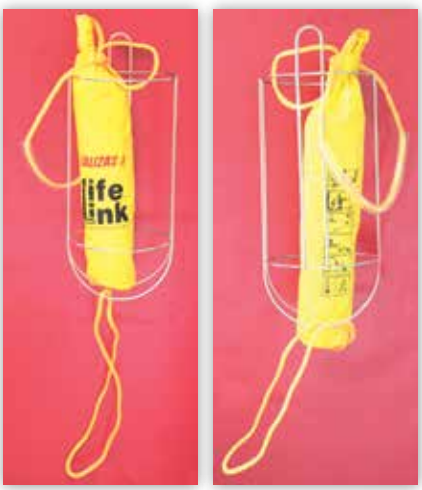
3. Winch casualty slowly to the boat



4. Haul casualty on board

LifeLink Throwing Line, with 23m Rope

- Ideal for sailing, boating, canoeing, rafting and getting a line ashore
- Can be used either in hand or attached onto the rail for MOB retrieval
- Comes in a high visibility yellow bag with 23 m of floating line
- The smallest of the LifeLink MOB appliances offers maximum flexibility for storage
- Quick and easy to deploy
- Featuring a hand loop on top & an attachment loop at ends, it enables both the rescuer and casualty to be connected
- User instructions are printed on the reverse side of the bag
- The deployment loop has a PVC cover which aids grip and allows easy and quick rescue if required
- Can be used as a standard throwing sock or attached to the rail deployed and towed behind the vessel whist circling the casualty



**Attention, the product is provided without the stainless steel bracket.*

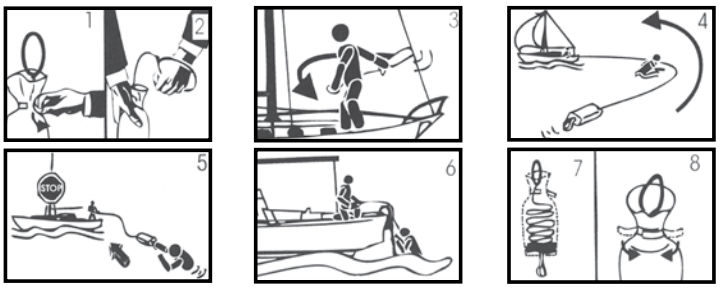
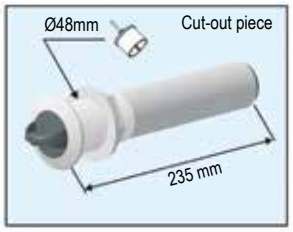
Meets ISAF regulation



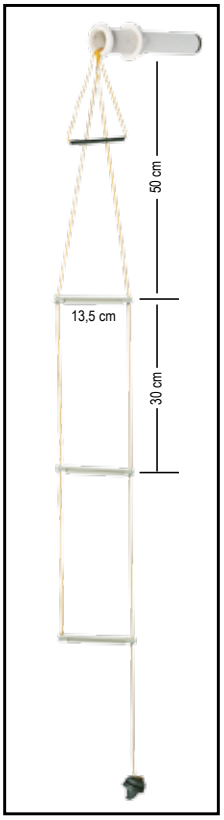
LALIZAS

Flushmount Safety Ladder

- It helps any crewmember get back easily on board without external help
- Suitable for frequent use (during your vacations) or in case of Man Over Board
- It consists of 3 polypropylene steps and 1 stainless steel handle assembled by a highly resistant line (bright yellow polyester of Ø 3mm)
- It is stored in a polyamide tube with a grey polypropylene cap, for optimum protection and waterproofness
- The Man Over Board removes the cap, pulls the ladder down and climb on board
- Lightweight
- Easily flushmounted (like a thru-hull fitting)
- Transom or skirt mount (sail and power boats), just above waterline

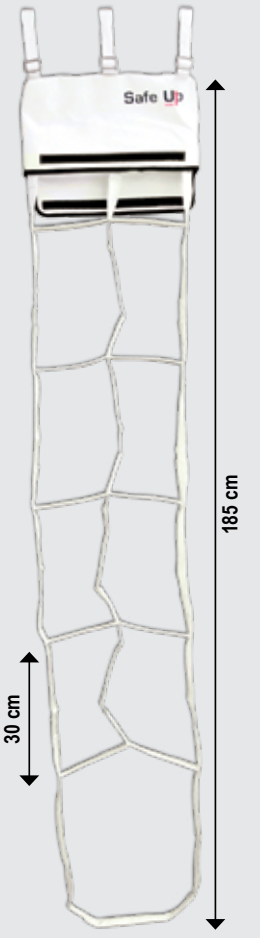


Code | 51558



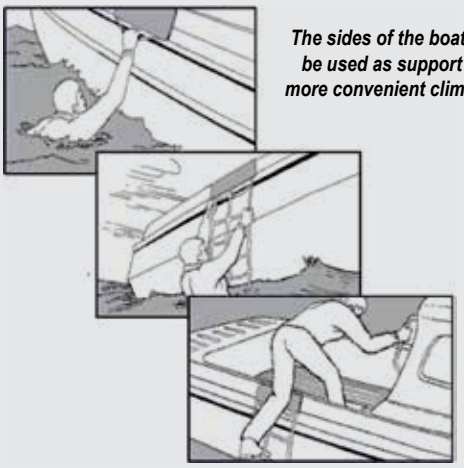
Safety Ladder "Safe Up", M.O.B, 5 steps

- A must-have MOB safety equipment for your boat
- Provides instant aid to an overboard crewmember in getting back on board
- The overboard crewmember only needs to grab & pull the handle in order to unfold instantly the fabric ladder and climb back on board safely
- It features 3 loops that can be fastened firmly on the rail of a boat and can be placed overboard
- When unfolded, it provides 5 steps with a steady foothold for the user to climb on board easily
- Lightweight
- Waterproof
- Made of durable fabric in order to withstand sunlight and harsh sea environment
- It can be repacked easily



- Dimensions when folded: Width 38 cm - Height 20 cm
- Dimensions when unfolded: Width 38 cm - Height 185 cm
- Case Fabric: 500D PVC & Polyester
- Webbing: Strong Polyester
- Weight limit: 507lbs (230kg)

Code | 71684



The sides of the boat can be used as support for more convenient climbing.

LALIZAS

new

LifeLink MOB Danbuoy & Horseshoe, Grey

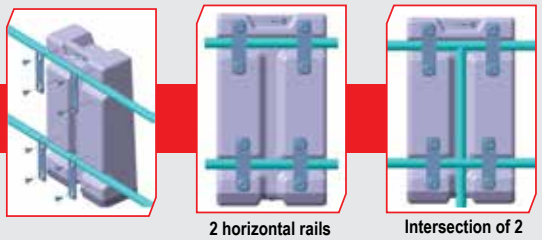
- The MOB items are automatically inflated after release & coming into contact with water
- Saving valuable stowage space
- Easy-to-fit MOB
- Rapid deployment in case of emergency
- Material HDPE with UV protection
- All metal components are stainless steel
- Created via rotomolding
- Distance between horizontal rails: 300 – 310 mm

Includes:
- An HDPE durable case
- High visible inflatable Danbuoy assembled with LALIZAS Lifejacket LED Flashing Light water-activated "Safelite IV" SOLAS/MED/USCG
- High visible inflatable Horseshoe with LALIZAS Whistle (70010)
- Drogue
- The stainless steel parts for its placement onto boat rails

Conforms to the ISAF Offshore Special Regulations

Code | **73669**

Mounting on the rails



2 horizontal rails

Intersection of 2 horizontal rails with a vertical one

Made in EU

Service required after each use or 3 years after the manufacturing date by an authorised LALIZAS service station.

CE

Certified EN361

Lifeguard Rescue Can, with Polyurethane Foam, Orange

- Designed for rescue at sea
- Made of high-density polyethylene (HDPE)
- Internal filling with polyurethane foam for higher buoyancy
- Features cotton strap and polyethylene rope
- Buoyancy: >150N

- Dimensions: (L x W x H): 68 x 24,5 x 14cm
- Maximum load: 150kg

MOB Systems

Lifesaving Apparatus

- For use on sail or motor boats
- Outer cover made of high strength polyethylene with an inner polystyrene filling
- Complete with all-round rope lifeline
- Available in 4, 8 and 12 person models
- High visibility orange
- Approved to EEP. Approval number: 4232/46/00

DELFINO Life float Foam filled with Retroreflective Tape

- It provides efficient buoyancy in case of shipwreck or Man Overboard, allowing the casualties to gather for easier survival and rescue
- Made of indestructible plastic material
- High density polyethylene, filled with polyurethane foam for buoyancy
- Fitted with retroreflective tape for added visibility
- Braided rope is reeved through reinforced eyelets at regular intervals (2, 3 or 4 eyelets on each side) to account for a larger number of persons grasping the rope

Sea Anchors-Drogues

Sea Anchor (Drogue)

- Designed to reduce the speed of the ship, slow down the drift, stabilize the hull, reduce the swing frequency, and effectively reduce the water drift effect of the hull
- Suitable for power boats, sail boats, inflatable boat, jet skis, kayaks as sea brake or sea anchor
- Ideal for fishing
- PVC strong coated with continuous inside webbing for added strength and durability
- Easy to deploy and to retrieve, without tangling and spinning
- With portable and compact design, it dries quickly and stores compactly
- Weighted bottom and automatic opening
- Available in 5 sizes
- Packed with harness buoy

Code	Boat Length	A(cm)	B(cm)	C(cm)	D(cm)
10071	4,5m (15ft)	50	55	8	64
10072	6m (20ft)	65	75	10	70

Retroreflective Tapes ORALITE , SOLAS, 5 x 10cm, Set (6pcs)

Retroreflective tape retail pack to SOLAS (L.S.A Code).
Six 10cmx5cm self-adhesive strips per pack. May be sewn.

Code | **70190**

Code | **70180**

Retroreflective Tape ORALITE, SOLAS & USCG, 40m Roll

- High performance micro prismatic tape
- Permanently marked with ships wheel logo for immediate compliance identification
- Single layer construction for durability, abrasion resistance and flexibility
- No risk of water penetration
- Complies with SOLAS and the IMO LSA Code
- Tested in accordance with IMO Resolution A.658 (16) for Type I applications
- Approved by the US Coast Guard and Bureau Veritas
- Vinyl construction designed for inflatable devices and use in harsh maritime environments
- Length 40 m, width 50mm

LALIZAS

LALIZAS Immersion Suit "Neptune", Insulated, SOLAS/MED

- Exceeds the latest SOLAS specifications for hypothermia protection
- Ideal for use on board ferries, offshore drilling rigs, rescue boats, man-overboard boats and for general commercial use
- Protects you in situations where the danger of hypothermia is great, increasing your chances of survival
- Made of reinforced neoprene material (5mm thickness)
- Ergonomic design
- Thermally insulated
- Diesel, oil & flame resistant
- Successfully submitted to water ingress, jump & leak tests
- Easy & quick donning
- Should be worn in conjunction with an approved lifejacket

Features:
- A face seal and flap
- 3-finger gloves
- Front waterproof zipper ankle cuffs
- Neoprene pocket
- SOLAS Retroreflective Tapes (70180)

** With rubber gloves*

Liferafts

LALIZAS

new

Made in Italy

LALIZAS ISO ATLANTIC C Liferaft >24h

LALIZAS ISO ATLANTIC C Liferaft >24h is designed for survival for more than 24 hours. Ideal for offshore sailing with complete survival equipment. Certified according to ISO 9650-1 A testing standard. ISO 9650-1 defines liferafts designed for long voyages or cruises when gusts of wind can be expected, together with exceptional wave height (excluding abnormal conditions such as hurricanes). Each liferaft contains thermal floor, internal & external light, pop-up tent and 4 stabilising pockets.
Available in 4 to 12 person versions, packed either in a canister or in a waterproof valise. Designed to inflate in an outdoor temperature of -15°C to +65°C. The inspection interval depends on the flag, while after 10 years it is recommended every year.

Equipment:

1. Sea anchor with rope (1 piece)
2. Life ring with rope (1 piece)
3. Floating paddles (2 pieces)
4. Immediate action (1 piece)
5. Floating knife (1 piece)
6. Canopy support (2 pieces)
7. Bailer (1 piece)
8. Sponge (2 pieces)
9. Whistle (1 piece)
10. Repair kit (1 piece)
11. Manual pump (1 piece)
12. User internal manual (1 piece)
13. Seasickness bag (12 pieces)
14. Torch kit (2 pieces)
15. Red hand flares (6 pieces)
16. Red parachute flares (2 pieces)
17. Signaling mirror (1 piece)
18. Drinking water (1,5 L per person)
19. Food per person (10.000 Kcal per person)
20. Anti-seasickness pills (6 per person)
21. First aid kit (1 piece – ISO)
22. Thermal protective aids (2 pieces)

LALIZAS SEAWORLD Liferaft PB GR

LALIZAS SEAWORLD Liferaft PB GR is extremely light and compact, ideal for yachts and small ships. It is manufactured according to the standards in Greece and it is equipped with a First Aid Kit approved by the Greek Ministry. It is available in 4 to 12 person versions, packed either in a canister or in a waterproof valise. Designed to inflate in an outdoor temperature of 0°C to +65°C while its inspection interval is every year.

Equipment

1. Sea anchor with rope (1 piece)
2. Life ring with rope (1 piece)
3. Floating paddles (2 pieces)
4. Immediate action (1 piece)
5. Knife (1 piece)
6. Canopy support (2 pieces)
7. Bailer (1 piece)
8. Sponge (2 pieces)
9. Whistle (1 piece)

LALIZAS ISO RACING Liferaft, <24h

LALIZAS ISO RACING high-quality standard liferaft is ultra-light, having a compact size which provides easy storage. Due to the lightweight material, it is ideal for racing sailboats that need to save space and weight. Its manufacturing technology and materials are inspired by the aviation industry to ensure maximum performance. Available in sizes for 4 - 12 persons, packed either in a canister or in a waterproof valise.
It is automatically inflated by a 12-metre painter line and its inflation system provides enough gas to inflate all the buoyancy chambers. Each chamber is capable of fully supporting the raft with its maximum number of occupants. LALIZAS ISO RACING is manufactured and tested according to ISO 9650-1 standards as last amended for Safety and offers highly visible, stable and sheltered conditions for the occupants.

Approved by BV & MMF

LALIZAS ISO~RAFT

LALIZAS ISO-RAFT International Liferaft

LALIZAS ISO-RAFT can be used on recreational boats and is certified according to ISO 9650-1 testing standard for Safety and offers highly visible, stable and sheltered conditions for the occupants. This testing standard has been adopted by the most European Countries. This liferaft is available in 4 to 12 person versions, fitted with a single floor as standard and designed to be extremely safe. The ISO-RAFT combines compact size and structural integrity with proven liferaft design. It is automatically inflated by a 12-meter painter line and its inflation system provides enough gas to inflate all the buoyancy chambers. The main body of the life raft consists of two buoyant chambers inflated through a non-return valve ensuring the flotation of the liferaft.
Each chamber is capable of fully supporting the raft with its maximum number of occupants. It can be packed either in a canister or in a waterproof valise. It is initially certified by Polish Register of Shipping-1463 and furthermore approved by the Maritime Authority of the Country of Destination in case it is needed.

LALIZAS

LALIZAS LEISURE-RAFT Liferaft

Ideal for in-shore boating, the LALIZAS high quality standard Leisure-Raft is perfect for those that don't need a full feature liferaft. It is the smallest, lightest and most inexpensive liferaft in the market. The LALIZAS Leisure-Raft with its light weight allows for easy deployment, and the compact size makes storage easy in the smallest spaces.

- TPED approved CO_2 cylinder for easy transport
- Thermobonding technique that ensures extreme durability and reliability
- SOLAS approved water-activated compact LED light

Standard Equipment
- 20 ft. (6m) Painter line
- Hand pump - Sea anchor (1 piece)
- Raft knife (1 piece)
- Pressure relief valve (1 piece)
- CO_2 Inflation system
- Water-activated locator light
- Ballast bags (2 pieces)
- Case (1 piece)

Valise

**3-year recommended service interval*

LifeLink Evacuation Liferaft, Grey

The LifeLink Evacuation Liferaft is one of the most manageable and user-friendly appliances in case of emergency. It is designed for the LALIZAS Leisure Liferaft - 4 persons (the liferaft is included) and guarantees rapid deployment in an M.O.B. situation.
By mounting the LifeLink Evacuation Liferaft on the rails, the user manages to save valuable stowage space on board.

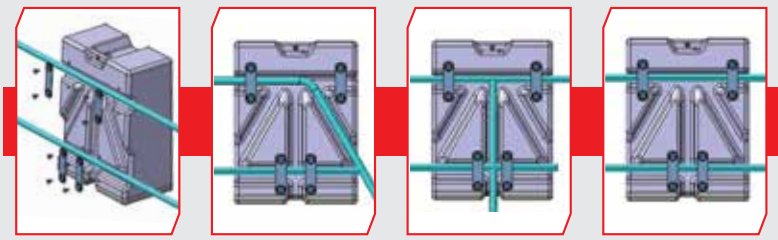
Features

- Material HDPE with UV protection
- • All metal components of stainless steel
- • Created via rotomolding

Made in EU

Distance between horizontal rails: 310 mm ± 20 mm

Code | **73668**



Mounting on the rails

**3-year recommended service interval*

LALIZAS OCEANO

LALIZAS Liferaft SOLAS OCEANO, Throw-overboard Type

Ideal for use onboard commercial vessels engaged on international voyages.

- 6, 8, 10, 12, 16, 20, 25, 30 & 35 person - Pack A & Pack B - Throw overboard
- Deck cradle included in the box
- Stowage Height up to 36m (painter line up to 46m)

LALIZAS Hydrostatic Release Unit for Liferafts, SOLAS/MED/USCG

LALIZAS HRU mechanism is the outcome of a long-term experience in liferafts' manufacturing, designed and produced in the EU (in Greece), in accordance with SOLAS/MED/USCG regulations. It can easily be installed on board, attached to the liferaft according to instructions. The mechanism is being automatically activated, in the event of sinking, in a depth of between 1.5 and 4m, allowing the liferaft to be inflated and detached from the sinking vessel. It can be installed to all liferafts of 4-150 persons.

- No maintenance required
- Requires replacement 2 years after installation on board
- Max. lifetime: 5 years after production date
- Tested & approved by Force Certification A/S
- SOLAS/MED/USCG approved

Made in Greece

LALIZAS Lashing with Hook

Suitable for:
- All Hydrostatic Release Units
- LALIZAS OCEANO Liferaft (all types)

Liferaft LED Flashlight

AA Alkaline 1,5V x 2pcs
(batteries are not included)

new

LALIZAS LRL External & Internal Liferaft Light, SOLAS/MED/USCG

LALIZAS External & Internal Liferaft Light is included in the basic equipment of the liferaft, having a compact size and structure. Its features make the installation to the life raft easy and safe while it is fully sealed and watertight. The external flashing light is designed to produce a minimum of 4.3 cd and the internal steady light a minimum of 0.5 cd. LALIZAS External & Internal Liferaft Light has a minimum duration of 12 hours and both lamps can be controlled individually. It has lithium battery and LED light and the storage lifetime is 5 years. LALIZAS LRL comes with 70 cm lead length, but this can be varied, subject to the liferaft size and specs.
Storage & operating temperature: -30° C to +65° C.
SOLAS/MED/USCG approved.

LALIZAS Thermal Protective Aid Alusafe-T, LSA Code

- Meets the LSA code requirements
- Protects the wearer from hypothermia, which may be caused by prolonged exposure in liferaft and rescue boats
- Offers survivor's protection from wind and cold
- Made of aluminium film coated fabric
- The low thermal conductivity of aluminium reduces both the convective and evaporative heat loss from the wearer's body and preserves stable temperature
- Covers the fully clad body, wearing even a lifejacket
- Available in one size, in silver colour

Code | **70461**

Height range : 1,45 - 2,00 m

Signalling Mirror 7x7cm

Instructions of use:
1. Hold the foresight in your left hand with arm fully extended
2. Hold the signalling mirror in right hand toward the sunlight, facing the back of the mirror
3. Align the holes of the foresight and the mirror on the target
4. Move the mirror until the reflection of the sun from the mirror can be seen on the foresight and a shadow point appears in its hole
5. The ray is now directed at the target

Thermal Blanket, 2,1 x 1,6m

- First Aid Application
- In case of severe cold or shock wrap the blanket around the body
- Keeps the body's temperature under very low or very high temperatures
- Prevents post – accident shock
- Waterproof
- Its reflective surface provides high visibility
- Dimensions: 2,1 x 1,16m

Code | **70976**

Thermal Blanket, Advanced, 2,1 x 1,6m

Application: The thermal blanket helps you keep the body's temperature by protecting you from the sunrays and the very low temperatures. It is suitable for use in cases of accident, but also for protection against wind, rain or heat.

Instructions: When you need to avoid hypothermia, use the thermal blanket with the golden side facing upwards. In case you need protection from the heat, use the thermal blanket with the silver side facing upwards.

Breathing Apparatus

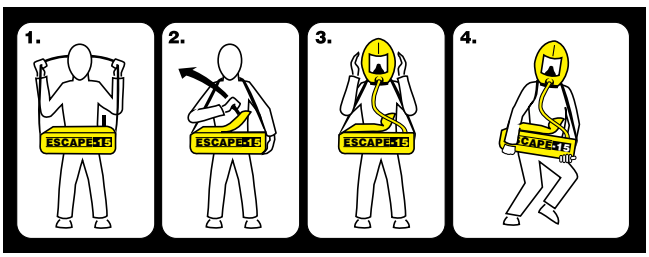
LALIZAS Emergency Evacuation Breathing Device / EEBD "ESCAPE-15", SOLAS/MED

LALIZAS Emergency Escape Breathing Device (EEBD) ESCAPE-15 complies with the amended SOLAS ch.II-2 and the IMO MSC/Circ.849. All ships on international routes must carry EEBDs on board.

Characteristics:

- Full-face hood universal size, suitable for every face shape
- 15 min. steady air-flow with sufficient air-delivery rate
- Flame resistant
- Activated with a single move
- Easy visual access on the pressure gauge
- Durable & reliable construction with low maintenance
- Silver colour to reflect heat and be highly visible
- Easy to refill cylinder (no adaptor required)
- Working temperature range: -10°C to 65°C

Code	70321
Volume	14300cm³
Weight	6150gr
Height	22cm
Width	13cm
Length	50cm



- Ozone resistant
- Non irritant neck seal
- Wide visor
- Non irritant
- Antimisting design for the visor

- Automatic activating valve - regulator
- Valve features G 5/8"F standard charging connector
- Pull valve safety lock

- Shock proof - antiblast pressure gauge
- Coloured so as to have easy readings for duration
- Overpressure - internal pressure of the cylinder

LALIZAS Self Contained Breathing Apparatus / SCBA, SOLAS/MED

LALIZAS SOLAS/MED Self Contained Breathing Apparatus is a high-performance breathing apparatus, designed to offer maximum respiratory protection to the user during entrance or escape from a hazardous environment. This SOLAS/MED -approved SCBA offers reliability and comfort and its key features are:
- Open circuit on demand positive pressure Self Contained Breathing Apparatus
- Anatomic carbon fibers composite material back frame with harness for perfect and easy donning
- Both back frame and harness are flame retardant, waterproof and antistatic
- With manometer and whistle (>90Db) warning the user that the air is dropping down below 50bar

It is available in two versions:
• With a 6L cylinder (steel)
• With a 9L cylinder (carbon composite)

The SCBA contains the following parts:
- Breathing apparatus carrier with harness
- Pressure regulator with manometer & whistle
- Pressure & air flow regulator
- Breathing apparatus facemask
- Compressed air cylinder with EU Standard Valve G5/8'' thread

Packed in heavy-duty plastic carrying suitcase

LALIZAS Fireman Axe with Short Anti Slip Handle 1,2kg

This short fireman's axe provides heavy duty chopping power to gain access to locked doors and hollow walls during an emergency.

It features:

- High carbon steel blade
- 9cm cutting edge
- Overall length: 34cm
- Weight: 1.2kg
- Pick spike for piercing and prying
- Anti slip handle
- Rubber protective blade cover

Code | **71686**

new

LALIZAS Holster for Fireman Axe

Synthetic leather cover for carrying a fireman axe safely on the belt.

- No restriction on movements
- Made out of one piece of leather, which reduces seams
- Solid metal rivets placed to hold the holster together
- Metal snap for easy on/off action
- Fits perfectly the LALIZAS Fireman Axe with Short Anti Slip Handle 1,2kg (code 71686)
- Can be attached to Fireman Belt, with Restraint Lanyard, M-XL (85-120cm), EN358, CE (code 74583) or Fireman Belt, Heavy Duty, with Safety Line L0,9m, CE (code 74582)

Code | **74584**

LALIZAS Fire Extinguishers

LALIZAS range of portable Fire Extinguishers, specially designed for the marine sector, provides additional protection from environmental induce, high fire protection effectiveness due to reinforced extinguishing ability and simplicity in application.

Other features:

- Large diameter of the safety pin ensures an easy grip even with work gloves
- Shock-proof pressure gauge facilitates accurate indication of pressure status
- Seamless cylinder production technology facilitates avoidance of weakening points, enhances tightness and pressure resistance
- Easy to use

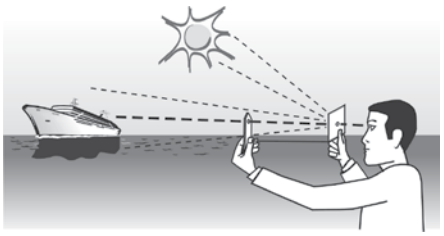
Signalling Mirror 7x7cm

Instructions of use:

1. Hold the foresight in your left hand with arm fully extended
2. Hold the signalling mirror in right hand toward the sunlight, facing the back of the mirror
3. Align the holes of the foresight and the mirror on the target
4. Move the mirror until the reflection of the sun from the mirror can be seen on the foresight and a shadow point appears in its hole
5. The ray is now directed at the target

Code | **56570**



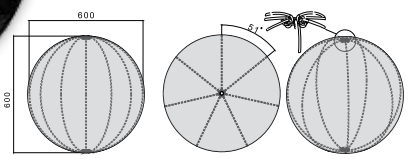
LALIZAS

Day Signals

- Required on board by the International Regulation COLREG, as amended
- Mast head signals visually indicating the status of a vessel to other vessels on navigable waters during daylight hours
- Made of heavy-duty fabric with foldable inner framing with webbing, which is fully collapsible and offers quick and easy storage
- Both ball and diamond shapes are in black colour

Day Signal, Ball, Ø 600mm

Code | **72731**



Day Signal, Diamond, 1200x600mm

Radar Reflector, Tube Type

- Enhances your boat's signal on the area's radars
- Useful, not only on emergency cases but also on situations when visibility is low and other nearby vessels cannot see you
- Reflects energy from the radars and thus enhances the signal of the vessel
- Eyes on both sides allow the unit to be secured to the shroud
- Made of aluminium elements crossed at several 90° angles in a plastic casing, very high reflecting rate
- Lightweight and compact design
- Practical and noiseless

SX7 - Vertical Windlass

Main features

- Luxury stainless steel base and drum
- Independent gypsy and drum operation
- Manual chain release
- Chain counter magnet pre-installed as standard
- Anodised gearbox suitable for marine use
- Available DC, AC and hydraulic motors
- Chain pipe included in the package

For further information, please visit www.lofrans.com

ERCOLE VERTICALE - Vertical Windlass

Main features

- Under-deck compact dimensions
- Construction in mirror polished AISI 316L stainless steel
- High torque latest generation electric motor able to provide the power needed in all marine conditions
- Band brake to assist in chain control, thanks to an easy-to-manage large hand-wheel
- Special high-grip drum with indepedent rotation from the gypsy, for warping function
- Independent gypsy and drum operation
- Manual chain release
- Manual override to recover the chain and anchor in case of electrical failure
- Internal ratchet to prevent chain jams into the chain cocker which could damage the deck
- Chain counter support integrated by the sensor inserted in the base and the magnet in the gypsy
- Available also in counter clockwise rotation
- High-efficiency Lofrans' planetary - worm screw gearbox made in anodised black aluminium with gears made in high mechanical strength material
- Heavy-duty electric motor
- Power: DC, AC and hydraulic
- Available in custom versions

Hand Held Remote Control Chain Counter THETIS 5003

This remote chain counter model, THETIS 5003, has been specifically designed to give the full control in anchoring. It is a reliable and practical instrument, technologically advanced, specifically design for use in marine environments. The external casing, rated with IP66 and supplied with waterproof plug and socket rated IP67. The extending flexible cable (approximately 4 metres) gives the maximum freedom on board during anchoring manoeuvring. Provided with an evolved microprocessor that offers a series of advantages for full control of the anchoring. Reinforced covers & buttons.

- Chain speed indicator / mooring length in meters or feet
- Voltage indicator
- Up alarm sensor
- Switch on button / Key tones adjustment
- High vision LCD display / Backlit display screen / Eight level of contrast
- Six language menu (IT, EN, FR, DE, ES, GR)
- Able to control free fall windlasses
- Parallel connection
- Cradle included

THETIS 1002

Hand Held Control THETIS 1002

This hand held remote control model, THETIS 1002, has an elegant and functional design. The soft rubber case, which covers sideways the remote control, allows a safe and handy taking under any condition. This hand held remote control is rated with IP66 and supplied with waterproof plug and socket rated IP67. The extending flexible cable (approximately 4 metres) gives the maximum freedom on board during anchoring manoeuvring. Reinforced covers & buttons.

- Inversion polarity protection
- Parallel connection
- 2 buttons (up-down)
- Cradle included

*When installed

Code	73631

Touch Panel Up Down, Black

Lofrans' Touch Panel up down is a low profile anchor windlass touch panel with LED backlit buttons. It is designed with safety in mind, having a two button activation mode in order to secure any accidental activation. Its secure design is enhanced by the 3 minute auto deactivation as well as the buzzer notification on deactivation. The round back flange plays a key role to the easy installation on board. It comes in elegant black colour. IP67 water/dust rating (front panel). A truly reliable windlass control panel.

Code	74317
Colour	Black
Compatible with	All Windlasses
Dimensions (mm)	65 x 65

Mini Remote Control

Lofrans' Mini Radio Remote Control is designed to work with our range of windlasses. The remote control can also be used to operate other onboard equipment such as thrusters, passerelles, cranes, etc.

- Easy to install and set-up, simple to use
- Small form factor makes it ideal to carry it anywhere on-board.
- Supports up to 4 independently control channels (12/24V - 10A)
- Zero power consumption when in standby (transmitter)
- Transmitter rated IP67

Code	636305
Description	Transmitter & Receiver (EU/USA)
Frequency	433 MHz
Number of button	4
Voltage	12 - 24V (Receiver) 3V (Transmitter)
Operative temperature	-10 : +60
IP protection rated	IP 67
Max contacts amperage (A)	10
Weight (gr)	31 (Transmitter) / 95 (Receiver)
Dimension (mm)	71,8x38x17,7 (Transmitter) / 100,5x61x25 (Receiver)

Radio Remote Control

Lofrans' Radio Remote Control is designed to work with our range of windlasses. The remote control can also be used to operate other onboard equipment such as thrusters, passerelles, cranes, etc.

- Transmitter rated IP67
- Supports up to 8 independently controlled channels
- Each receiver can switch 4 channels (12/24 V - 2 A)
- Each transmitter can handle 2 receivers (8 channels)
- Digital recognition avoids accidental activation of other system
- Zero power consumption when in standby mode (transmitter)
- Easy to install and set-up, simple to use

Rocna Anchor

The Rocna is a true multi-purpose anchor that sets and holds in most seabeds, from soft mud to hard sand, clay, grass, and kelp. The roll-bar ensures that the anchor always arrives at the ideal angle for penetration. A Rocna remains stable and buried, and does not roll out on reversal or veering of load, or if dragged beyond yield, providing enhanced security.

Vulcan Anchor

Vulcan anchor features a unique combination of shank and fluke geometry – including an innovative roll-palm at the rear of the fluke – which self-rights the anchor on the seabed without the use of a roll-bar. This is assisted by the V-bulb which extends fluke ballast downward to gain maximum leverage and efficiency.

Double Anchor Swivel, Inox 316, for Chain

Made of Inox 316, it features high strength and corrosion resistance. It connects the anchor chain with the anchor itself. When the anchor is being lifted, it automatically turns it to the correct side and reeves into the roller. Available options for chain of Ø6-8 mm and Ø10-12 mm.

Shock Absorbing Mooring Line

LALIZAS Polyester Mooring Lines are integrated with industrial rubber filaments which permit high elasticity in absorbing shocks from waves. Shock Lines are highly suitable for docking and anchor lines. Shock-Line Ropes have a loop at one end and all of them are provided in high quality practical packaging.

new

Rope Aqua-Multi Polypropylene (floating), Yellow

The new mooring rope Aqua-Multi is floating and very easy-to-use, essential for safe docking. Made of high-quality polypropylene, it is durable, having an elongation at break of 20-25 %. It is 12-strand and single braided, with high strength and elasticity as well as very good abrasion resistance. Aqua-Multi is available in yellow colour and various dimensions, from 10 to 22 mm.

Nuova Rade

Mouse Stopper for Mooring Rope, Set of 2 Pieces

Nuova Rade Mouse Stopper is designed to easily prevent any kind of visit by unwanted guests. It is proven to be very effective, stopping rats from using the docking lines in order to enter your boat.

Code | **198114**

- Made of durable PP that is UV and sea water resistant
- Easy to use in mooring ropes from Ø15mm up to Ø35mm without any modification
- Stays stable in rope
- Diameter 312mm
- Weight 0,25kg

ELECTRIC TUNNEL THRUSTERS

MAX POWER offers a complete range of 12/24V composite electric tunnel thrusters to suit motor yachts and deep footed sailing yachts from 17'-85'. Designed for maximum performance and durability, each model is easy to fit, highly cost effective, and integrates a variety of unique features.

- Patented composite drive legs
- Zero maintenance
- Case hardened spiro-conical gears
- Line shields
- Purpose-built DC motors
- Electronic control boxes for unrivaled safety features
- Safe, high-power connections
- Purpose-built DC contactors with high specifications

IGNITION PROTECTED THRUSTERS

MAX POWER range of ignition protected tunnel thrusters is available for models CT35 to CT125. Certified according to ISO 8846, this range allows the safe use of an electric tunnel thruster in yachts with petrol/gas engine where there may be potentially flammable gases. IP thrusters can also be installed in habitually wet or damp areas such as sail lockers, or in the transom of deep "V" shaped motor yachts.

- Ignition protected to ISO 8846 and water- resistant
- Easy-to-connect thruster
- Patented composite drive leg
- Zero maintenance
- Purpose-built DC motors
- Electronic control boxes for unrivaled safety features
- Safe, high-power connections

HYDRAULIC TUNNEL THRUSTERS

MAX POWER range of hydraulic tunnel thrusters is suitable for medium to heavy displacement and high windage yachts from 40'-85'. Designed for durability and performance, the hydraulic tunnel thrusters are ideal when long runtimes are required. Manufactured with corrosion-resistant components, these models are robust and water-resistant with a variety of unique features.

- Branded hydraulic components
- Long runtimes
- Water-resistant
- Patented composite drive legs
- Zero maintenance
- Electronic control boxes for unrivaled safety features

HYDRAULIC TUNNEL THRUSTERS

CT 550 HYD & CT 1000 HYD are the flagships of MAX POWER tunnel thrusters for boats up to 55 m. All immersed parts have a specially designed hydrodynamic profile to avoid any turbulence. The most powerful tunnel thrusters in the D400 tunnel category come with 4 blade metallic propellers designed by MAX POWER, to guarantee maximum thrust performance. Counter rotating system offers higher efficiency on thrusting with left side and right side pitch propellers in order to have identical performance in both directions.

STERN POD THRUSTER

MAX POWER Stern Pod Thrusters offer an innovative solution to the often difficult tasks of installing a thruster into the stern of modern motor yachts.

- Combining a dry area on the stern with correct immersion depth and sufficient access can be challenging.
- Designed with these constraints in mind, stern pod units can be installed entirely from the outside of the transom, reducing greatly the need for inside access. This allows greater immersion depth to be achieved.
- The stern pod housing is waterproof and ignition protected (ISO 8846) designed to withstand the corrosive damp atmosphere of the bilge.
- Entirely assembled and tested in our factory, stern pod units guarantee long term trouble-free operation with only minimal maintenance care.

ELECTRIC RETRACTABLE THRUSTERS

Designed for yachts from 9 to 16 metres (30'-52'). This lightweight electric retractable thruster, the first of its kind, has been a major success with shipyards from the very beginning.

- Lightweight composite construction
- Lowest profile and smallest hull opening on market
- Bolted onto flange, not directly laminated into the hull
- Rapid deployment
- No exposed moving parts inside the yacht
- Does not splash inside the yacht
- Intelligent position detection

HYDRAULIC RETRACTABLE THRUSTERS

When performance is paramount, hydraulic retractable thrusters provide a perfect solution. Lightweight, powerful and allowing near perfect weight distribution, designers and prestigious yards have consistently trusted MAX POWER thrusters over the years. MAX POWER offers two product ranges in this family: the vertically retractable VIP HYD range and the top end RetractTM foldable series.

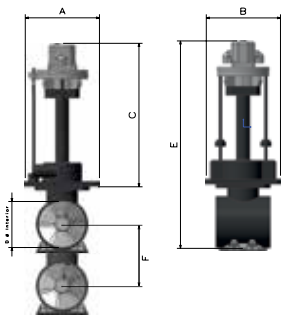
Light Displacement, Light Windage & Super Fast Cruising	48' - 60' / 14,5 - 18 m		57' - 80' / 17 - 24 m

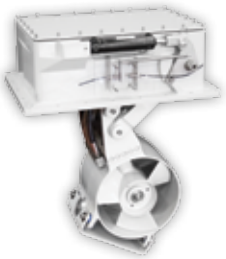
- Retract to leave smooth hull lines
- When deployed, ideal immersion depth is achieved
- Water-resistant
- Allow ideal weight distribution
- Ideal for high performance yachts
- Unique patented thrust plate design (VIP)
- Unique patented folding movement (RetractTM)
- Case hardened spiro-conical gears
- Lightweight design



MAX POWER

HYDRAULIC RETRACTABLE THRUSTERS

R 200/6 - R 200/8
Benefiting from a control system redesign, R 200 is the smallest model in the MAX POWER Retract™ range. Designed for top end production boats, this hydraulic retractable thruster has long been installed in prestigious yachts ranging from 45' - 68'.



R 300/15 - R 300/21
R 300 benefits from evolutions already pioneered on the R 450. Both light & powerful this unit has been consistently trusted by designers around the world for many years and is ideal for yachts from 60'-104'.

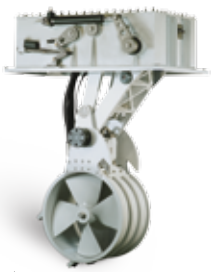
R450/34 - R450/40 - R450/50
Light & robust this thruster unit has been designed specifically for performance yachts, both sail & motor from 80'-136'. With positive locking and a unique gas spring lifting system, the R450 can withstand the pounding that offshore performance boats endure.



R600
An ingenious design makes this thruster the lightest and arguably the safest 100HP retractable thruster available. With a locking system inspired by aircraft cargo doors, and thrust transfer pads to transmit load to the hull, performance is first and foremost with this unit ideal for yachts from 100'-167'.

CONTROL PANELS & REMOTE CONTROL

Waterproof Rating IP 67

All control panels are specially designed for use with the complete range of MAX POWER tunnel and retractable thrusters. Fitted using a simple hole saw cut-out, panels are easy to install and benefit from a simple and easily replaceable weatherproof clip-on cover. Each panel is complete with both male and female connectors using a reusable connection system.

- Available in black or grey colour
- Water-resistant
- Easy to fit
- Replaceable clip-on cover

OCEAN

R SERIES - Buoys

R Series Buoys are heavy-duty buoys in which the rib-reinforced rock solid rope hold is made in such a way to provide extra strength and durability. This is a versatile commercial fishing buoy for the most adverse conditions. Can be used as a marking gear for ocean, sea, river, lake, beaches, cable installation and swimming. R Series Buoys have become widely popular among commercial fishermen in longline fishing for their durability and also among recreational boats. These buoys are one-piece made (no parts are attached together to form the finalised buoy) with consistent wall thickness and UV resistance.

Inflation pressure:
2.1lbs/0,15bar at 68°F/20°C
Material: Plastisol PVC
Production process: Single rotational moulding process

H SERIES – Heavy-Duty Fenders

The classic series of OCEAN Boat Fenders with superior quality! Made of Plastisol PVC with rotational moulding process, they are one-piece made (no parts are attached together to form the finalised fender) with consistent wall thickness. H Series Fenders are heavy-duty ones in which the rib-reinforced rock solid rope holds in the two sides of the fender are made in such a way to provide extra strength and durability. A versatile fender for the most adverse conditions. Suitable for any use and boats of any kind from 10-50 ft.

Inflation pressure: 2.1lbs/0,15bar at 68°F/20°C
Material: Plastisol PVC
Production process: Single rotational moulding process

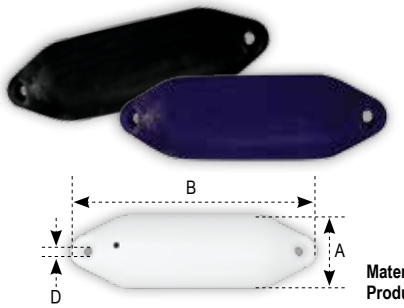
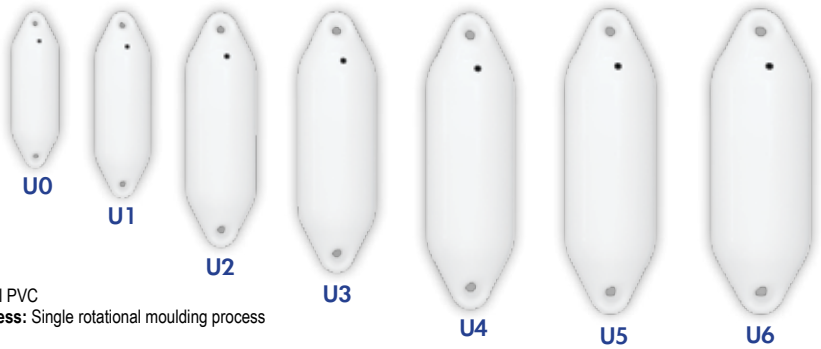
U SERIES – Utility Fenders

A utility boat fender suitable for every yacht and every use. U Series combines simplicity and elegance offering the ultimate touch of style with high gloss finish. Options are available in white, royal blue or black colour and in six different sizes. These utility fenders are one-piece made (no parts are attached together to form the finalised fender), resulting in consistent wall thickness of the fender. Made of Plastisol PVC material with rotational moulding process, they are the highest quality utility fenders in the market. The simple valve of the boat fender offers convenient inflation and maximum protection at the same time.





Material: Plastisol PVC
Production process: Single rotational moulding process

OCEAN

CH SERIES – Centre Hole Fenders

CH Series of Centre Hole Fenders distinguishes for its multiple use since these fenders are designed for horizontal and vertical application to any small to medium sized boat. The CH Series, introduced by OCEAN, is the point when simplicity and elegance become one, with the high gloss finish giving you the ultimate touch of style. In addition, these fenders are one-piece made (no parts are attached together to form the finalised fender), resulting in consistent wall thickness. As all OCEAN fenders, these are made of Plastisol PVC material, through rotational moulding process. The simple valve of the fender offers convenient inflation and maximum protection at the same time. CH Boat Fenders are accompanied with white rope in order to make your life easier!

Bow Fenders

Bow Fenders by OCEAN, as the name suggests, have been designed in order to protect the bow of your boat. This new boat fender series by OCEAN is the best solution in terms of price and convenience. These fenders are produced in two different sizes in order to fit all different boats, as well as in blue and white colour with UV resistant material in order to avoid fading under the sun. They have three eyes for easy and safe installation, and for making sure that they will stay in place. The simple valve of this boat fender offers convenient inflation and maximum protection at the same time.

SOLOVELA

SOLOVELA Solid Fender serves as a multipurpose boat fender and it is the best in its class by offering optimum shock absorption and lifetime performance. It is manufactured with Flexible Integral PU Skin Foam technology, so it is a boat fender that cannot deflate. In addition it has remarkable durability having been tested under the pressure of 12 tons per dm2. The fender's wide surface area ensures a better distribution of the load and reduction of the specific pressure per cm2. SOLOVELA Solid Fender stands out for its innovative shape and exclusive design, specifically for sailboats, which combines ergonomy and protection. By offering very easy fitting on the sail boat's lifeline and requiring no stowage while sailing, it's always in place and ready to use. It remains steady on the lifeline even with strong wind, without having to worry about being dropped into the sea. You can also use SOLOVELA as a boarding step or as a backrest for the captain during sailing. SOLOVELA Solid Fender is supplied with a navy blue or sand colour, UV-resistant zip-on cover and a 3 m white polyester line. The fender has one through hole with nylon fiber reinforced bushes for easy and safe installation with the supplied line.

TYPE A Clip-on Fenders

TYPE A Clip-on Boat Fender is the first and unique solid fender, which clips on the guardrail, and is manufactured with Flexible Integral PU Skin Foam technology. It is a boat fender that cannot deflate. It offers the best shock absorption and lifetime performance among other boat fenders, providing exceptional protection. It has impressive durability, as this fender cannot deflate no matter the pressure. It is always in place and ready to use in seconds, and itremains steady even with strong wind. There is no need for fender baskets or other inconvenient stowage and they don't get in the way on the side decks. It can be used for the protection of the boat both horizontally and vertically. The TYPE A Clip-on Solid Fender has one through hole with nylon fiber reinforced bushes for easy and safe installation.

The first and unique bow fender for 90° stern shape.

Suitable for

Fender Covers & Accessories

Fender Covers

All OCEAN Fender & Buoy Covers are manufactured in-house using knitting machines of the latest technology. Our covers are handcrafted with 100% polar fleece material for high durability and performance. Resistant to sunlight and water, they are also tested to ensure friction resistibility. Developed for the most demanding situations at sea, during mooring, OCEAN Fender & Buoy Covers provide the ultimate protection for your boat, extending also the fender life at the same time.

- **Perfect fitting**
- **Quick and easy installation**
- **Washable**

Dock Fenders

The Dock Fender, as well as the rest of the OCEAN solid fender series, is manufactured with Flexible Integral PU Skin Foam technology. It is a dock fender that cannot deflate in any way, under any circumstances. It has the best shock absorption and lifetime performance in class, providing exceptional dock and boat protection. It is the ideal fender for dock fending, fitting perfectly in every dock by placing the clip-ons on the dock and then easily and safely attaching the fender with the dock. Can be also installed on boats that require a permanent means of protection, such as pilot or patrol boats, as they come in very close proximity with other boats due to the nature of their operation.

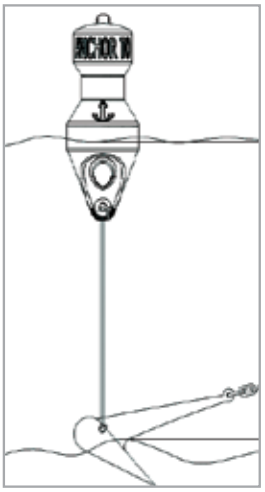
Anchor Marking Buoy with LED Light & Retroreflective Tape

It marks the exact position of the anchor. It is supplied with LED- type flashlight, which operates with one D-type alcaline battery and with a sensor, to flash only during the night hours (3 flashes per minute). Fitted with SOLAS approved retroreflective tape, to give extra help on locating the buoy at night. Material: HDPE.

Code	Diameter (mm)	Height (mm)	Weight (kg)
636020	200	570	1

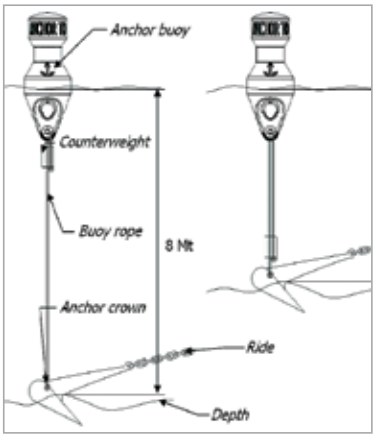
Led Light



Anchor Marking Buoy with Retroreflective Tape & Line 11m

It marks the exact position of the anchor with a lead counterweight that self-adjusts the line length with depths between 4 and 10 m. SOLAS approved retroreflective tape to give extra help on locating the buoy at night. It helps to retrieve a fouled anchor by lifting it up from the anchor crown. Easy-to-use and stow it away in the anchor peak. Material: HDPE.

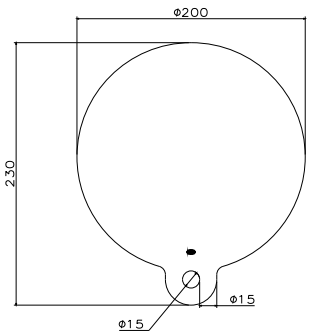
Code	Diameter (mm)	L line (m)	Height (mm)	Weight (kg)
197765	200	11	507	2



Sports Buoy

Sports Buoy is made of high-quality PVC material. This small but durable inflatable buoy is the perfect marker for a beach, a waterski course or any area that requires marking. OCEAN Sports Buoy meets the American Water Ski Association specifications. With a durable rope hold to fasten any line.

Code	Colour	L (mm)	H (mm)	Weight (kg)
72450	Red	200	230	0,6



Diver Buoy

It is ideal for diving with cylinders. It is easy-to-use for the diver, since it is especially designed so as to facilitate the diver's moves without jeopardizing his safety. The red buoy is folded and attached with a rope (6m) inside the blue case; the case has a sewn black plastic clip on, which offers the ability to the diver to fasten the buoy on his suit for easy carrying. Additionally, the case features a whistle to use in any emergency. The buoy is made of soft PVC, 0.3mm thick, while the case is made of 1000D Polyester with PVC film, 0.5mm thick.

Dimensions: L 20cm **W** 8cm (packed)
H 145cm **W** 15cm (inflated)

Instructions of Use

Open the case and release the buoy. Use the cylinder to provide the buoy with a small quantity of air. In this way, the pressure of the air along with the pressure of the water will make the buoy to inflate and pop up on the water surface, warning the boats that a diver will soon float at the specific point.

Race Mark Buoy

This mark buoy has been especially designed to meet the demands of races. It features one inflation & deflation valve and one transparent pocket (69 x 58 cm) which can be used for advertising purposes. There are also 4 attachment points for the anchor line. In order to absorb the pulling forces of the latter, LALIZAS Race Mark Buoy is fitted with a special net. When deflated, it is very easy to carry, despite its size (height: 1.5 m, diameter: 0.90 m). Made of UV-resistant PVC, it has bright yellow colour for high visibility.

Boat Hooks

All boat hooks are manufactured following the highest standards. The hooks are made of Nylon and the poles of high-quality anodised aluminium for longer life. The boat hook head (57343) is also available. It is lighter, reinforced for extra strength, with a wider opening, which allows you to capture objects more easily. This hook head can be used with the plain (57340) or telescopic tubes (57341 - 57342), which are sold separately.

At MARINA Stores, you can find the inflatable boats of the leading Italian manufacturer, ARIMAR, and choose the one that fully meets your needs. Combine your inflatable boat with a HIDEA outboard engine for unique sea excursions. A reliable and efficient solution that will never let you down!

The maintenance of your engine is also important, so get the necessary equipment and accessories to keep your engine running at all times and performing at its best.

In terms of your boat's transportation, you will find the best boat trailer parts in order to maintain the longevity of your boat trailer and avoid any damages.

ARIMAR is a leading manufacturer of recreational inflatable boats, synonymous with safety, reliability as well as the excellent Italian design with attention to details.

With a 30-year of experience in the market, ARIMAR offers durable and functional inflatable boats, which have been manufactured with cutting-edge technology and sophisticated style.

ARIMAR inflatable boats are divided into the following two categories, the **folding ones** and the **rigid hull ones.**

The **folding inflatable boats** are made of high-quality materials and feature heat-sealed tubes made of double-coated 1110 DTEX PVC, guaranteeing a sturdier durable product. They are designed to occupy as minimum space as possible on board. Once they are deflated, they can be easily stowed in a convenient bag for easier transportation. Our folding inflatable boats are the best option for anyone looking for top comfort in a small-sized inflatable boats, without sacrificing quality and durability.

The **rigid hull inflatable boats** are made with a different manufacturing technology, which results in an ideal combination of the fiberglass hull with inflatable tubes. Tubes can be made of PVC or Hypalon Neoprene upon request. The PVC material covers all the textile parts, protecting them from sunlight and salt. Their high quality, durability, and excellent Italian design, make them the best option even for the most demanding users, for both autonomous use or as a tender.

ROLL - Folding, with Wooden Slats

Made of PVC, the Roll line is the best option for anyone looking for a small sized, comfortable and easy-to-handle inflatable boat. Three-chamber tubes make the craft sturdy, stable and seaworthy. Flooring consists of solid wooden slats. The standard bench is specifically designed to provide yachtsmen with the best possible comfort. All models in the Roll line can be easily and quickly stowed due to their special design, as well as easily transportable in a convenient and lightweight bag. Roll is the best choice for any type of boats, and suggested especially for small yachts with limited stowage space. All models in the Roll line are quickly operational with their airtubes being simple and fast to inflate.

THE BEST OPTION FOR A SMALL-SIZED, COMFORTABLE & EASY-TO-HANDLE INFLATABLE BOAT

ROLL

SOFT LINE - Folding, with Inflatable Floor

The Soft Line model is the most popular among ARIMAR folding inflatable boats thanks to its high-pressure inflatable flooring. The inflatable keel reproduces the traditional V-shaped hull and provides easy handling, stable supports and extreme comfort thanks to the inflatable flooring. All models can be easily stowed and transported. Moreover, the Soft Line inflatable boats are significantly much lighter than other ones in the market of the same size, making them easier to manage. Easy to steer even in the roughest sea, it offers excellent cruising performance. ARIMAR "Easy System" technology allows all boats of all sizes to fold, without having to extract the flooring, making disassembly much easier.

THE MOST POPULAR ONE AMONG OUR FOLDING INFLATABLE BOATS

CLASSIC - Folding, with Aluminium Floor

The Classic line includes inflatable boats with inflatable tubes and inflatable keels which reproduce the traditional V-shaped hull. The innovative walkable aluminium surface offers great sturdiness, as it makes the inflatable boat stable and resistant when at sea. All Classic inflatable boats can be easily stowed on board. A perfect combination of functionality and safety, suitable for all boat owners. Additionally, their features as well as their high-quality materials make them the most durable ones in their category, even in the roughest conditions at sea.

STEADINESS & SAFETY AT ITS FINEST

HERCULES - with Fiberglass Floor

Hercules line is manufactured with a sturdy fiberglass hull for advanced stability, safety, and speed. Highly performing, all inflatable boats of this line have wide spaces, specially designed to provide passengers with the most comfortable cruising experience. Hercules line boats can be used either as autonomous ones or as tenders. Designed to cover even the most demanding needs, these elegant and robust inflatable boats are the best choice for your coastal trips.

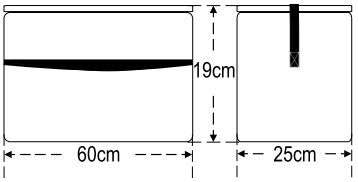
Under Seat Storage Bag Ténéré Sit & Store

The under seat storage bag provides you with the extra storage space that is so necessary on any boat. It is made of PVC Tarpulin and has been designed to fit to any seat. It also features a shoulder strap which allows you to carry the bag when you leave the boat. The top of the bag is padded to "soften the ride" on the wooden seat. It is water resistant, while the waterproof zipper keeps the storage area dry. It is available in grey colour.



Code | 70895

The ultimate protection for your boat's documents

Dry Briefcase

LALIZAS Dry Briefcase has been designed especially for the protection of your boat's documents. Made of durable vinyl, it has clear front panel, which allows you to see the content of the bag. Furthermore each dry briefcase has a lanyard loop. The Dry Briefcase has the advantage of floating in the water, depending, however, on the air captured and the weight of the contents. It features a 100% waterproof seal with velcro.

Electric Double Action Air Pump

- Lightweight & comfortable grip
- Quiet operation
- Suitable for inflatable boats, air mattresses, pool floats etc.
- Ability of inflation & deflation

Code	198136
Input	100-240 V AC 50/60 Hz or DC 12 V
Output	400 lt/min
Maximum pressure	40 mbar (0,55 psi)
Function	Inflate / Deflate

Equipped with 3 size nozzles

Ability to connect to a cigarette lighter plug (1.25 m cable)

Comes with European charger

Electric Boat Inflator, 12V, 300 mbar, 450 lt/min

- Adjustable pressure up to 300 mbar / 4,4psi
- Low consumption: max 18A – 12V
- No need for special cable, a usual cigarette lighter is enough

Pressure Regulator & Carrying Bag

Code | 90017

new

Hand Pump, Double Action, High Pressure, with Manometer

- Easy-to-use, high-output hand pump
- Allows you to inflate all kinds of inflatable products faster and with less effort than any other pump in the market, thanks to its unique design
- The double action minimizes the inflation time in half
- It features an ergonomic handle, an enlarged base for maximum stability, a built-in pressure gauge and a protective filter
- The inflation port on the pump's body allows the hose to remain stable during use

Capacity: 2 x 1500 cc
Max pressure: 1,9 bar (27.5 psi)
Inflate mode: Double or single action
Inflate-deflate: Inflate only
Dimensions: 14 x 30 x 57 mm
Construction: ABS + Aluminium
Suitable for kite, sup, boats, kayaks, all inflatables

Inflation fittings are available for most common valves in the market

Kite-leash included

Code | 74622

Inflation Pumps & Accessories

Double Action Hand/Floor Pump

The Double Action Hand/Floor Pump is practical and highly effective, ideal for inflating or deflating dinghies, ski tubes, air mattresses, plus many more inflatable products. To inflate or deflate simply fasten the air tube to the appropriate connection ("Inflate" or "Deflate") and pump with steady up and down strokes. The pump also features an adjustable pressure release valve that allows you to inflate, either easily on the down stroke only (2,1Lt per stroke) or faster on both the up & down stroke (4,2Lt per stroke). It is supplied complete with a flexible air tube with 4 sizes of adaptor nozzles and a kit of 6 adaptors (also sold separately). Large comfortable handles give better grip and foot plates provide stability during pumping. Made of strong, non-corrosive, lightweight, plastic for longer life, and with easy maintenance. It comes in grey colour.

- Ideal for use with large inflatables boats
- Continuous stream - pumps air on both the up and down stroke
- Simple push-in hose-to-pump connection to inflate or deflates
- Disassembles easily for inspection or maintenance

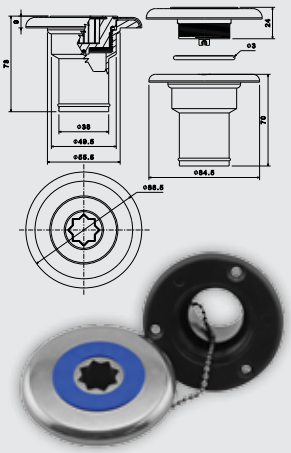
Deck Fillers

Nuova Rade

new

INOX Deck Filler Ø38mm

Nuova Rade Inox Deck Fillers with Cap are suitable for fuel, fresh water or waste. The use is easily indicated by the colour of the cap: blue for fresh water, red for fuel and brown for waste. The main body is made of reinforced PA. The cap is made of Inox 316 and reinforced PA for endurance and extra durability in the marine environment. The cap features a lanyard in order not to be lost or fall into the water. These deck fillers have a tight fitting, as they can be secured with the use of a winch handle.



Code	Model	Diameter (mm)
198158	Water	38
198159	Fuel	
198160	Waste Water	

Deck Filler Ø38mm Inox, with Vent 16mm

Deck Filler with vent is made of Inox. Depending on the use, you can choose the Deck Filler either for gas or water. The indication of use is shown at the top of the Deck Filler. It combines stylish design and complete sturdiness, and it is designed to fit easily on the deck. Nuova Rade Deck Fillers are available in Ø38 mm with a vent of Ø16 mm.

Code	74326	74327
For use	Gas	Water

Deck Fillers for Gas, Diesel, Water & Waste

The Deck Filler range includes deck fillers suitable for water, fuel and waste. They are designed in such a way that the full lid area is totally covered, which makes the final look much more attractive. Each deck filler can have a different function, which will always be clear - by using the relevant sticker (water, fuel, waste) included in each filler's packaging. They are made of highly resistant plastic and in 38mm and 50mm diameter. Available option with a chrome plated cap.

Deck Filler, Glass Reinforced PA

Construction in 2 materials to combine sturdiness, lightweight and stylish design:

- Deck filler's body in glass reinforced nylon
- Cap in 316 L Inox
- Open with dual imprint key or manually thanks to finger-grip cap; the type of the liquid included (fuel, diesel, water) is written on the cap

HIDEA

HIDEA is a leading manufacturer of high-quality outboard motors, ranging from 2.5 to 60 HP 4- stroke engines, providing sea enthusiasts with new ways of easily exploring the water horizons.

Either for fishing adventures, daily cruises, water sports or just for relaxing, HIDEA offers various outboard engines to cover diverse lifestyle needs. In addition, choices vary according to control system (tiller or remote control), starting system (manual or electric with the revolutionary internal battery), fuel supply system (carbureted or EFI-Electronic Fuel Injection), shaft (short or long), and many more. With quiet operation and high corrosion resistance, HIDEA engines are the ideal solution for your summer excursions, even in the most demanding conditions.

HIDEA motors come with warranty:
3 years for leisure use & 1 year for professional use.

Full service & after sales support in
Greece, Cyprus, Croatia, Montenegro, Slovenia, Serbia, Bosnia-Herzegovina, Albania, North Macedonia, South Africa.

LIGHTWEIGHT & PORTABLE

HIDEA 2.5 HP, 5 HP and 6 HP outboard engines are lightweight and portable. They are a reliable solution to transport either people in your tender or goods over short distances, and also enjoy a fishing day with your friends and family. HIDEA portable series is designed to be simple, elegant and lightweight but also built to last. With a built-in tank (0.9L, 1.1L), these engines give you the ability for extra miles. Variety of options: short or long shaft, optional addition of an external fuel tank.

ULTIMATE EFFICIENCY

HIDEA 9.9 HP, 15 HP and 20 HP outboard engines have a revolutionary design being the only ones in the world also available with internal battery for electric start. An ideal and reliable choice for mid-size tenders, RIBs or fishing boats that travel near to the coast. Very popular among fishermen, having just the power they need. Several options to choose from, including short or long shaft, manual or electric start (optional with internal battery) and tiller or remote control.

RELIABILITY & PERFORMANCE

HIDEA 30 HP and 40 HP outboard engines (2 & 3 cylinders respectively) come with the unique EFI (Electronic Fuel Injection) technology. The EFI system is more efficient with drastically lower fuel consumption. Additionally, the power output of these engines is more linear than the carbureted ones. Due to their weight and power ratio, they are considered as compact "kings", strong and reliable. They come as standard with remote control, electric start, trim & tilt system, short or long shaft. They also come with water/fuel filter separator (applies only for 40HP), engine control cables (throttle/gear) (2x5.5m) and tool bag with some spare parts (fuses, spark plug, impeller, etc.). Ideal choice for many different uses, for boats 4-6 meters. High efficiency, low noise levels and low consumption are only some of the main advantages of these outboard engines.

- 30 HP – Optional: instruments (tachometer)
- 40 HP – Standard with analog/digital instrument (RPM, speedometer, w/ battery charging & working hours data)

THE ULTIMATE "ALL AROUND" OUTBOARD ENGINE

The biggest outboard EFI engine by HIDEA is the 60 HP one, and is considered to be the perfect "all-rounder". Whether you want to enjoy watersport activities, travel to far distance islands or just try your luck at fishing, HIDEA 60 HP quiet and stable 4 cylinder EFI engine, offers ultimate efficiency and increased fuel economy. With displacement of 996 cc it provides an adequate amount of power for almost everyone riding a medium to bigger power inflatable or FRP boat. A very reliable choice for recreational or semiprofessional use. Comes as standard with remote control, electric start, trim & tilt system, analog/digital instrument (RPM, speedometer, w/ battery charging & working hours data). It also comes with water/fuel filter separator, engine control cables (throttle/gear) (2x5.5m) and tool bag with some spare parts (fuses, spark plug, impeller, etc.).

Nuova Rade

Code | 198165

Propeller Guard, Plastic, Ø23cm, Yellow

Nuova Rade Propeller Guard is a smart consideration and safeguard for your outboard. The installation will greatly reduce the possibility of human and marine life injuries due to the propeller blades and will also protect the propeller from nets and ropes. You will not have to worry about propeller maintenance and safety anymore.

Additionally, a propeller guard can reduce fuel consumption, so that you save on gas and, at the same time, it improves handling and stability, for a more enjoyable time on your boat. This is because the guard is made to surround the propeller in such a way that it moves the water with a more accurately directed force. Finally, the guard does not contain moving parts, so its maintenance is minimal. Having fast & easy installation, it enhances safety on board.
Made of reinforced polypropylene.

Compatible with most 9-25 HP engines with max. propeller Ø21.6cm. It is ideal for rescue boats and yachts that might sail on waters with many bathers. Note that the necessary bolts, nuts & washers are included in the package.

SEA COVER

Engine Cover

SEA COVER Engine Covers are ideal for the protection against water, sun and dust. They are made of extra strong polyester 420D, 0,15mm thick for maximum water resistance and UV protection. They are suitable for most types of outboard engines, from 2 to 300hp and are available in two different types. There are the covers suitable only for the top part of the engine (not the shaft) and feature an elastic cord all around for ideal fit to most types of outboard engines.

Additionally, there are the full body covers, which feature an elastic cord and a zipper, so as to ensure the best possible engine's protection, including its shaft. You can find 7 different sizes of the covers for the top part of the engine and 3 different sizes for the full body covers. All come in silver colour. The tables below show the different sizes of the covers. The dimensions refer to the length, the width and the height of the cover (Drawing 1). The horsepower given is approximate and it is not the only factor that should be taken into consideration when choosing your cover. The type of the engine (2 stroke, 4 stroke), the length of the throttle grip, the brand of your motor and its production date should also affect your choice, as they differentiate the size of the engine.

Cover for the Top Part of the Engine

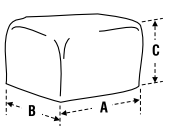
Code	57269	57270	57271	57272	57273	57274	57275
H.P (Approximate)	2-5	2-15	10-45	30-90	70-150	115-225	150-300
A (cm)	40	46	55	63	73	75	90
B (cm)	25	27	33	35	40	45	60
C (cm)	32	35	45	50	65	75	80

Full Body Engine Cover

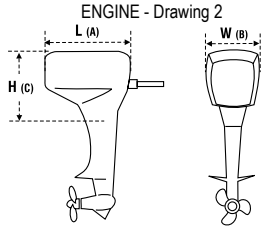
Code	57329	57330	57331
H.P (Approximate)	2,5-10	8-70	70-150
A (cm)	75	87	125
B (cm)	125	157	210

To choose the most suitable cover for the top part of your engine, measure it as shown in the Drawing 2 and determine the dimensions that more closely match your model.

COVER - Drawing 1



ENGINE - Drawing 2



*When calculating the height of the engine you should also include a part of the shaft, as shown in Drawing 2, in order to ensure that the engine will be covered completely underneath (apart from the shaft).

To choose the most suitable full-body cover for your engine, you should measure the engine's height (B) as well as its width (W). In order to calculate correctly the maximum height that the appropriate cover should have, you should deduct from the engine's height (B) half of its width (W)). For instance, if the height (B) of your engine is 210cm and its width (W) is 50cm, then the cover that you need should be 185cm (210cm-25cm) high. Therefore, in this case, the correct cover is cover 57331, which is 210cm high, as indicated in the relevant table.

Steering Wheel "Classic", Ø 350mm

Steering wheel "Classic" is made of polypropylene with 350mm diameter, while the diameter of the wheel's hole is 37mm. It has an ergonomic design and will fit very simply into most boats. You have the choice to customise the logo label on the centre of the steering wheel, by adding the customised PVC sticker.

Diablo

DIABLO Fixed Fuel Tank

DIABLO line of fixed tanks is made of recyclable HDPE material, consisting of a full range of 10 models complying with international standards. DIABLO can be used for fuels such as gasoline, diesel, ethanol, alternative fuels and organic vegetable oils. The advantage of this line of tanks is the 'EASY SWITCH' plate, which can be purchased separately based on the use of the tank, and is manually interchangeable. The plate used for gasoline is in red colour. It is secured and sealed by rotation of the piece itself and is blocked into position by means of a locking pin that prevents loosening. To clean the tank just lift the locking pin and remove the plate by unscrewing it.

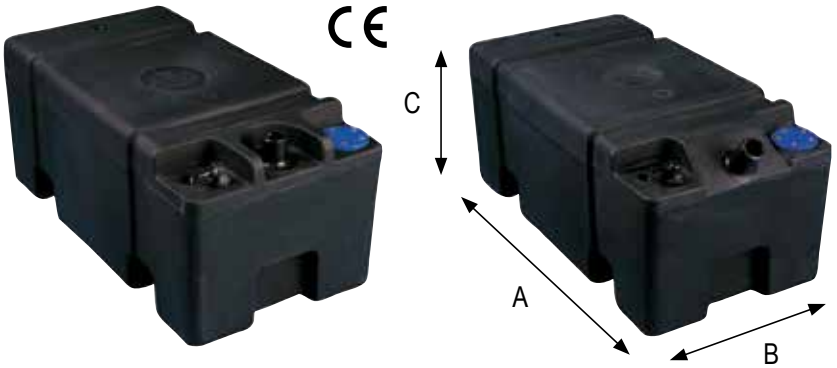
Ercole



ERCOLE Fixed Fuel Tank

ERCOLE line of horizontal fuel tanks is made of polyethylene material in black colour to avoid rust and has a longer lifetime, contrary to metal tanks. This line consists of a full range of 9 models complying with international standards and is used for fuel collection and storage. All contain a fuel output for Ø8mm hose and a fuel supply input that is either threaded with a cap, either with a vertical outlet for Ø38mm hose, either with an 45°-angled outlet for Ø38mm hose. Pre-cut for tank level sensor.

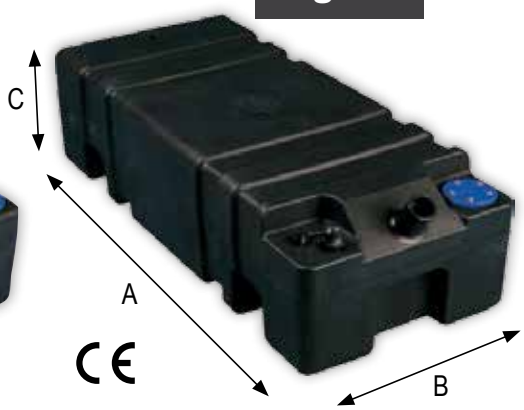
Sogliola



SOGLIOLA Fixed Fuel Tank

SOGLIOLA line of fixed tanks is used for storing petrol, diesel or fuel containing ethanol or methanol, before it is transmitted to the boat engine. SOGLIOLA line of horizontal fuel tanks is made of polyethylene material in black color to avoid rust and has a longer lifetime, contrary to metal tanks. The line consists of a full range of 9 models complying with international standards and is used for fuel collection and storage. All contain a fuel output for Ø8mm hose and a fuel supply input that is either threaded with a cap, either with a vertical outlet for Ø38mm hose, either with an 45o-angled outlet for Ø38mm hose. Pre-cut for tank level sensor.

Hulk

HULK Portable Fuel Tank

HULK line of portable outboard motor fuel tanks is made of odor-free high-density polyethylene material in red colour. Their robust rotationally mounded plastic construction makes them completely non-corrosive. They are strong, yet lightweight and will not crack or dent. Polyethylene material is used since it is unable to rust and has a longer lifetime, contrary to metal tanks. The line consists of a full-size range of 12L, 22L and 30L, complying with international standards and is used for fuel collection and storage. All contain a Ø 8mm outlet with filter and a vented cap with seal. The codes 44804 and 44805 contain a fuel gauge, as well.

Code	Capacity (lt)	A Length (mm)	B Width (mm)	C Height (mm)	Fuel Gauge

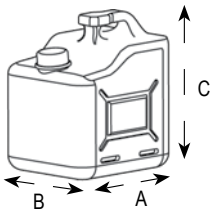
Jerrycan



JERRYCAN Portable Fuel Tank with Spout

JERRYCAN line of portable outboard motor fuel tanks with spout is designed in odor-free high-density polyethylene material in red colour. Polyethylene material is used to avoid rust and has a longer lifetime, contrary to metal tanks. All codes have a top handle that makes them very stable in use and easy to grip and carry, if needed. Their specially designed bottom in large dimensions achieves better stability when placed. The line consists of a full-size range of 5L, 10L, 15L and 22L, complying with international standards and is used for fuel collection and storage. All contain a vented cap with seal, and they are being supplied with a spout.

Mistral

MISTRAL Fuel Tank with Sender

MISTRAL tank for horizontal fuel storage is made of polyethylene material in white colour, offering high chemical and fire resistance. Polyethylene material is used to avoid rust and has a longer lifetime, contrary to metal tanks. This model complies with international standards and is used for fuel collection and storage. MISTRAL tank features one central column to provide increased rigidity of the tank and can be easily secured to the boat. Contains lateral baffles, designed to reduce fuel tossing.

Diverter Valve, 3-way, for Tanks

The 3-way Diverter Valve for Tanks is a universal valve that can be used installed on board or on bilge evacuation systems. It allows the operator to choose between two outlets.

Features

- Corrosion resistant ABS and stainless steel structure
- Ideal for marine sewage and bilge pump out systems
- Ports: 1-1/2" ID flexible hose
- Can be padlocked
- Long distance control by means of a push-pull cable.

Bilge systems: For boats having two separate bilge areas, the 3-way Diverter allows to empty either one, with only one pump.

Sewerage systems: When installed in the holding tank discharge line, the y-valve allows the choice between pumpout through a deck fitting or directly through a seacock. When installed in the marine toilet discharge line, it allows the choice between storing the effluent in the waste tank or discharging it directly overboard (if legal).

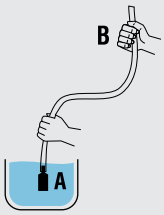
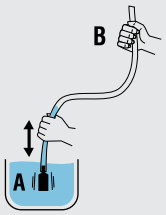
Hose Pump, Manual Suction, Transparent

This corrugated hose pump is great to outfit your boat for optimum customisation and maintenance. Allows quick and safe transfer of liquids from one container to another. High-quality and durable PVC material. Suitable for petrol, diesel, water.

Code	Diameter (mm)	Length (cm)	Hose	Hose Thickness	Flow Rate
70002	12,5	160	PVC	2mm	3,5 gallons/min
70003	22,5			3mm	10 gallons/min

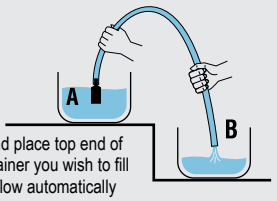


1. Place the bottom end A of the hosepipe into the tank with the liquid that you wish to pump out and hold the top end B of the hosepipe upright



2. Shake the bottom end of the hose vigorously up and down until the liquid rises in the hose, continue pumping until the liquid passes balance level

ATTENTION: Make sure that the empty container is placed below the level of the container you wish to empty



3. Stop pumping and place top end of the hose in the container you wish to fill and the liquid will flow automatically

Boat Waterlock and Exhaust Silencer 9L, Oval, Black

The Boat Waterlock & Silencer is designed to prevent exhaust water backflow and reduce noise produced by the exhaust to minimum. This heavy-duty waterlock and muffler is recommended for most sailboats and motor yachts with gasoline or diesel engines and water cooled generator sets up to 30HP. Compact design facilitates durable installation with 4 screws x 8mm. It is constructed of high density rotational molded polyethylene which is impervious to corrosion or deterioration from salt water or exhaust from gas. Also, it is resistant to all temperatures normally experienced in water-cooled (wet-type) exhaust systems. With a 25.4 mm drain outlet for system cleaning.

Marine Horns

LALIZAS

Signal Horn 380ml, Set

Acoustic range approximately 1500 m.

Instructions
1. Install horn by screwing it on the pressurised container
2. To operate press down the horn
3. Signal horn must always be used in upright position

Do not store the pressurised container in direct sunlight. Do not expose to temperatures exceeding 40° C. Do not pierce or burn, even after use.

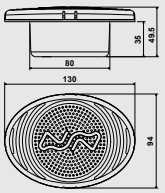
Flush mount Electric Horn

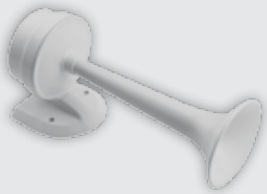
It features loud sound and tone, perfect for marine signaling. Ideal for small boats, featuring a very easy installation, with removable front panel, and a perfect fit for installation on steering wheel consoles.

- Electromagnetic type
- Material: White ASA, UV-resistant
- Water-resistant
- Dimensions: 130 x 94 x 49.5 mm
- Drilling Hole: Ø 80mm



Code	74305
Sound Intensity	>100 dB
Fundamental Frequency	400 Hz
Maximum Amp. draw	1,5 A
Volts	12 V

Trumpet Electric Horn



It features loud sound and tone, perfect for marine signaling. Ideal for small boats, having easy installation. Available in two colours (white & chrome).

- Electromagnetic type
- High sound output
- Material: ASA, white or chrome plated, UV-resistant
- Water-resistant
- Dimensions: 102 x 223 x 80 mm

Electric Winch, AnchorWinch, 12V, 2000lb/1000kg

The AnchorWinch electric trailer winch of 2000lbs capacity features a unique mounting plate which allows you to temporarily or permanently mount it on any flat surface. It also features a built-in carry handle. It is supplied with a 15' (4.5m) power cable, a mounting plate & a hand crank.

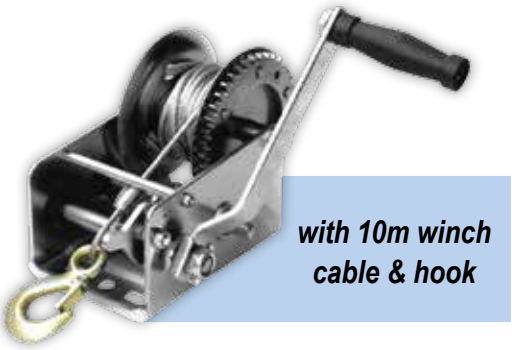
Technical Characteristics
Magnet Motor: 12V DC, Max 40A, 0,4hp(0,30kw)
Pulling Capacity: 2000lbs / 1000kg
Line Speed: 6' (1,8m/min) with load
Wire Rope (Diam. x L): 0,2" x 30' (5,1mm x 9m)
Power Cord: 15' (4,5m) / 9,9'(3m)

Single Gear Winch, Inox

Code	98750
Capacity (kg)	360

Trailer Winch Safety Tips

- Trailer winches are not tie downs. To prevent mishaps, use dedicated bow and stern tie downs to secure your boat on the trailer
- Make sure you have secure footing and proper leverage when using manual winches. Slips and falls by winch operators and injuries from winch handles that kick back are common boat ramp accidents.
- To avoid chafe on the winch line, be sure it doesn't rub against any sharp edges on the winch stand or trailer. If frayed or worn spots appear, replace the winch line immediately with a new rope, strap, or cable of the proper type, size, and strength. Cable life can be extended by frequently lubricating it with wire rope lubricant so the strands of cable slide by each other with less friction. Lubricating your winch cable will also reduce the number of snags and frays in the cable.



Trailer Winch, Manual, Single & Double Gear, Carbon Steel, with 10m Winch Cable & Hook

The Seaware winches are made of corrosion-resistant, carbon steel for prolonged life. Our winches feature 3 positions (forward, neutral and reverse), adjusted by their comfortable handle. The various gear ratios reduce user effort and increase pulling efficiency. The capacity of Seaware winches range from 636 to 1135kg.

Code	Capacity	Gear Ratio
11880	1400 lbs / 636kgs	4:1
11881	1800 lbs / 815kgs	4:1
11882	2500 lbs / 1135kgs	4:1 & 8:1

Winch Strap

Code	Capacity	Length	Width
72151	2000 kgs	10m	50mm

Pass the pin through the hole of the drum, at the spur gear's side and then through the strap loop (picture 1). Screw the bolt to secure the pin on the drums (picture 2).

There are 2 ways to attach the winch cable on the winch.

1st way

Use the cable clamp to attach the edge of the winch cable on the drum.

Boat Position

2nd way

Follow the arrows to fix the cable on the winch by passing it through the 4 holes on the drum.

Deck Equipment

Besides from the must-have equipment that is needed for a boat, there are also some other accessories that could be useful while your boat is at sea or anchored.
For your convenience, MARINA Stores offer deck hardware accessories, such as deck plates & hatches, bugbusters, rail hardware, locks & hooks, hinges, handrail, screws, nuts & washers, flags & accessories. In this category you can also find high-quality boat covers, canopies or bimini tops in order to protect your boat and your outboard engine from heavy weather conditions and high temperatures.
All products are made of premium materials for high durability and resistance to the marine environment.

INDUSTRIAL Access and Inspection Hatch

The Access and Inspection Hatches are ideal for easily reaching and controlling various areas on board, such as fuel lines, electrical cables, gauges, controls, even the engine. They are specially designed with a non-skid surface and can be mounted both horizontally, as well as vertically. All hatches are mounted with hidden screws for discrete appearance. They feature a seal that makes the hatch water-resistant and a 180° opening door, with one or two handles, where you can install a lock. All hatches are made of tough, UV-resistant PP (polypropylene), impervious to chemical solvents, and are designed for external use.

INDUSTRIAL Access Hatch with Detachable Cover

The Access Hatches with Detachable Covers are made of tough UV-resistant PP (polypropylene), impervious to chemical solvents, and are ideal for both internal and external use. They feature a completely detachable door for ease of use, handles, that can be fitted with a lock, and a sealed gasket. The non-skid surface and the hidden screws are additional important features. Available in white and grey colour.

INSPECTION Hatche with Detachable Cover

The Inspection Hatches with Detachable Cover are made of tough UV-resistant PP (polypropylene) for extra resistance to the sun, water, salt and detergents containing acetone. They have no hinges, so that you can completely remove the cover. Their opening is easy, since the specially designed thread automatically ejects the cover, once you turn it 90□ counter clockwise. Furthermore, they feature non-skid surface and hidden screws for smarter appearance.

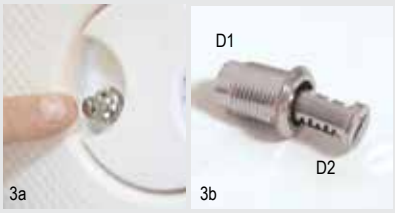
Nuova Rade

Installing the key lock on the Nuova Rade hatches

1. Remove the screw (A), the tongue (B), and the fastener (C) from the back side of the key lock (D).

2. Drill a 12mm hole in the specified mark at the back of the handle.



3.Insert the lock into the tube from the front side of the hatch (Pic 3a). Attention: The lock is made of 2 pieces, the tube (D1) and the locking mechanism (D2) (Pic 3b). Since these are not attached together, you must be careful in handling, so that you do not lose the latter during installation.

4. Holding the lock in place with one hand, place the fastener from the back side of the hatch, with the other. Fasten till the end.

5. Place the tongue from the back side of the hatch

6. Fasten the screw from the back side of the hatch

Attention

When placing the tongue make sure that the handle is in the lock position and that the tongue is facing towards the centre of the hatch's locking system. These are the correct open (pic 1) and close (pic 2) positions.

If you place the tongue any other way it will not lock firmly (see pictures 3 & 4).

Hatch Insect Screen

Premium quality net that protects against all kinds of insects, while the hatch is open. Installation is fast and easy. The boat hatch insect screen is designed to be hand-thrown over your boat hatch. No velcro, strings or frame needed, which allows you to open or close the hatch from inside. A convenient storage bag allows easy storage. The hatch insect screen comes in three different dimensions so as to cover a wide range of available hatches in the market.

Deck Fillers for Gas, Diesel, Water & Waste

The Deck Filler range includes deck fillers suitable for water, fuel and waste. They are designed in such a way that the full lid area is totally covered, which makes the final look much more attractive. Each deck filler can have a different function, which will always be clear - by using the relevant sticker (water, fuel, waste) included in each filler's packaging. They are made of highly resistant plastic and in 38mm and 50mm diameter. Available option with a chrome plated cap.

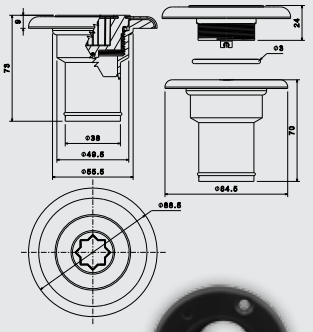
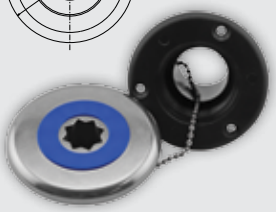
INOX Deck Filler Ø38mm

Nuova Rade Inox Deck Fillers with Cap are suitable for fuel, fresh water or waste. The use is easily indicated by the colour of the cap: blue for fresh water, red for fuel and brown for waste. The main body is made of reinforced PA. The cap is made of Inox 316 and reinforced PA for endurance and extra durability in the marine environment. The cap features a lanyard in order not to be lost or fall into the water. These deck fillers have a tight fitting, as they can be secured with the use of a winch handle.



Code	Model	Diameter (mm)
198158	Water	38
198159	Fuel	
198160	Waste Water	



Deck Filler Inox, with Vent Ø16 mm

Deck Filler with vent is made of Inox. Depending on the use, you can choose the Deck Filler either for gas or water. The indication of use is shown at the top of the Deck Filler. It combines stylish design and complete sturdiness, and it is designed to fit easily on the deck. The cap features a lanyard in order mot to be lost or fall into the water. Nuova Rade Deck Fillers are available in Ø38 mm with a vent of Ø16 mm.

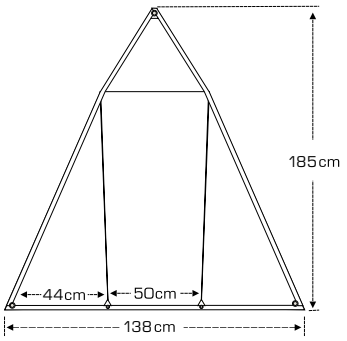
Hatch Ventilating Sail

Aerodynamically designed to provide optimum ventilation in your cabin, channeling the air down into the hatch. It is made of strong nylon for durability and high resistance against the strong winds. If installed correctly, it will not flutter and will prevent any whistling and flapping noise.

Κωδικός | **11087**



Hatch Ventilating System 4D Windtrap

- It provides an easy and efficient way to funnel air into the cabin in order to ventilate it
- It is fastened inside the open hatch and a halyard is used to lift the top
- The design helps it to collect the outside wind from every direction (4 Drive Windtrap) and flow it through the hatch, inside the cabin
- It is made of polyester 420D and the fabric is silver-blue
- Supplied in two different sizes

Storage Case, Flush mounted

High-quality storage case ideal for storing your items when on board. Saves a lot of space on deck, since your belongings are organised in one place. Optionally, it can be fitted with single or full cover to protect the contents from spray. Can be placed vertically or horizontally on any flat surface and can be easily mounted by using silicone or polyurethane construction adhesive. On the rear side of the cases, drilling points are marked, in case screws are required. Made of highly resistant plastic material, while the optional covers are made of tinted see-through acrylic (PMMA) for durability and visibility. Available in different dimensions and in white colour.

Store-All GPS/Cell Phone Case

Ideal for storing most hand-held GPS and mobile phones. It can be placed vertically or horizontally on any flat surface, by using the support base for rails and surfaces (99824-7), which allows you to remove the case easily and fast. Available in white colour.

Code	94150
Colour	White
Length (cm)	18,5
Height (cm)	10,5
Width (cm)	9

Store-All Organiser & Drink Holder

This is perfect for you, if there are not any storage cases for small objects on board. It features drink holder and a case to hold sunglasses, sunblock etc. It is easily mounted either vertically or on a flat surface, using the support base for rails or level surfaces (99824-7), which allows you to remove the Organizer anytime. Available in white colour.

Code	94144
Colour	White
Length (cm)	26,5
Height (cm)	10
Width (cm)	11

Store-All Folding Drink Holder

Ideal for small boats or areas with very limited space. Its folding feature allows you to completely retract it when you do not use it. It features adjustable arms to hold cans and mugs and also screws for permanent mounting. This drink holder can also be mounted on the rails or against any surface, using the relevant support base (99824-7), which allows you to remove the holder when not in use. Available in white and graphite colour.

Code	96866	99230
Colour	White	Graphite
Height (cm)	11	
Length (cm)	10	
Width (cm)	10,5	
Internal Length (cm)	9,2	

Store-All Folding Helm Organiser

When space is very limited on the deck and you have no room to leave small objects like sunglasses, keys or your drink, then all you need is this organiser. Its mechanism allows you to use it only when needed and fold it when you do not. It features a drink holder and inox screws for permanent mounting. However, you can also mount it using the support base (99824 - 5), which allows you to completely remove the organiser anytime. Available in white and graphite colour.

Code	96865	98591
Colour	White	Graphite
Length (cm)	25,8	
Height (cm)	11	
Width (cm)	10,5	

Store-All Utility Hook, Set of 2 pcs

Ideal for multiple uses on board. You can place it on a flat surface of your boat and use it to tie lines, hang clothing or towels, etc. It is available in a pack of two, in white and graphite colour. Made of plastic.

Code	94126	99231
Colour	White	Graphite
Length (cm)	2.5	2.5
Height (cm)	7.5	7.5

Buoyant Deck Cushions

Buoyant Deck Cushions

Buoyant Deck Cushions are equipped with waterproof outer material and filled with polyethylene foam. There are integral straps around the cushions, so as to carry them easily and quickly. The cushions lock on your boat through a nylon hook at their back. They are either single or double, depending on your needs and come in white, red and blue colour. White cushions are made of PVC, while red and blue cushions are made of polyester with PVC overlay. It is recommended to clean the cushions with cold fresh water.

Code	Deck Cushion	Colour	Material	Buoyancy (kg)	Weight (kg)

CHOOSING THE RIGHT CANOPY

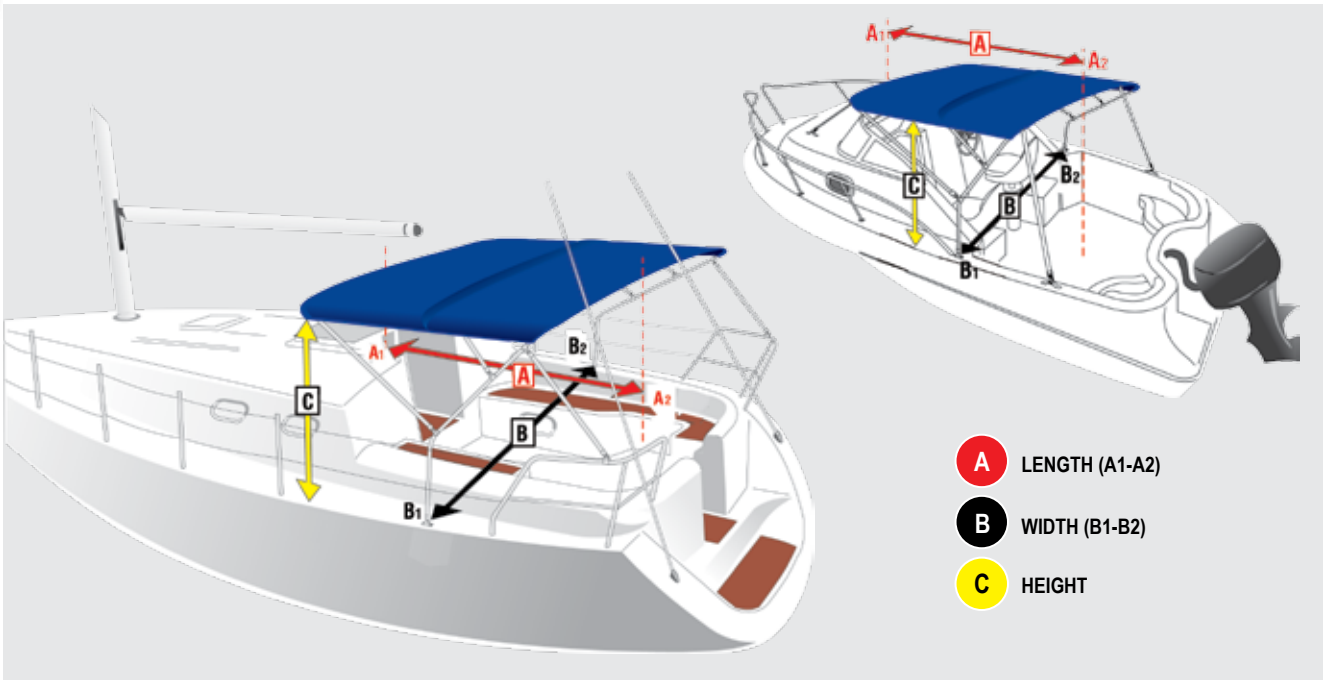
When choosing a canopy for your boat you should first ensure that the model is suitable for your type of boat (sail or power). It is also important to ensure that you measure your boat accurately and make sure that adequate fitting space is available.

Step 1. Calculate the Length (A)
On sailing boats, we recommend the length of the canopy to be equal to the distance between the centre of the companion way steps to a point just beyond the rear of the cockpit. This measurement should reach the backstay without including it. If you prefer a larger canopy, you should make the appropriate modifications in order for the backstay to pass through the canopy. In powerboats the length of the canopy is only defined by your specific requirements and the area of the boat you wish to cover. So, (A1-A2) = Canopy Length

Step 2. Points of installation
On sailing and powerboats, the points of installation are calculated by dividing the canopy length by 2. i.e. A / 2 = Points of Installation B1 & B2. This formula gives you the distance between points A1 or A2 to the point where you should place the canopy. In sailing boats these points should be slightly inboard of the rails to cover the cockpit area. On powerboats the usual installation point is the middle of the gunwale.

Step 3. Calculate the Width (B)
Measure the distance between installation points. So (B1-B2) = Width. Please note that the width of the canopy is not necessarily the boat's width.

Step 4. Calculate the Height (C)
Calculate the height of the canopy according to your own requirements. In order to measure the height, just measure the distance from the installation points up to the desired height. On powerboats, the height of canopy should not obstruct navigation lights.



Canopy "Athens", Inox, Blue

The "Athens" range has been designed to the highest standards. The frame is made of stainless steel for extended life and high resistance to corrosion, while also providing an attractive, polished finish. It is available in various sizes with lengths varying from 180 to 280 cm, width 180 to 280 cm, while the height is adjustable, up to a maximum of 155 cm. The canopy top is made of PVC coated nylon fabric, which is 100% waterproof, UV resistant and is available in a smart blue. Choose the frame whose dimensions fit the nearest to your boat. Follow the above fitting instructions, and enjoy moments of relaxation at sea.

Canopy Zeus, Aluminium

The Zeus series is the series of the largest canopies with aluminium base. It has a quadruple side support and can be folded back so that it can be wrapped with a protective cover. The supports are also made of aluminum and their waterproof fabric provides protection against UV radiation. The canopies Zeus cover an area of more than 5 square meters.

Sunshade JOS

JOS sunshade has been designed to offer relief from the sun's penetrating rays anywhere on board. They are made of 420D polyester, with UV protection and are supplied in rectangular and trapezium shape, in order to fit to all boat types. They have been designed in such a way that the air is recycled and not "trapped", making life on board far more pleasant. The texture of the upper part of the shade reflects the sun's rays, while the underside enhances the cool feel with its light blue finish.

"JOS" sunshades are lightweight and can be installed in few minutes, by using the aluminium poles supplied, or alternatively the rectangular poles and the supplied rope for the trapezium shape. For better fit, you can adjust the sunshade to your boat's rails by using the supplied elastic rope. Available in 8 different dimensions and one colour combination (silver/blue).

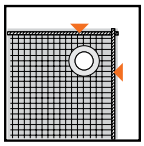
Tarpaulin Covers

Protective Cover – Tarpaulin, Silver

It can be used in various applications such as:
- Cover boats, cars etc.
- Tent on boats
- Cover equipment and machinery stored in outside areas
- Cover painted areas
- Camping
- Swimming-pool cover and many others

Characteristics:
- Extra strong polyethylene
- Water-resistant and weatherproof
- Re-usable
- Washable
- UV-resistant
- Laminated on both sides for maximum weatherproofing
- 120gr/m^2



The outer edges are reinforced with rope sealed in hem for extra strength

Boat & Engines Covers

Engine Cover

SEA COVER Engine Covers are ideal for the protection against water, sun and dust. They are made of extra strong polyester 420D, 0,15mm thick for maximum water resistance and UV protection. They are suitable for most types of outboard engines, from 2 to 300hp and are available in two different types. There are the covers suitable only for the top part of the engine (not the shaft) and feature an elastic cord all around for ideal fit to most types of outboard engines. Additionally, there are the full body covers, which feature an elastic cord and a zipper, so as to ensure the best possible engine's protection, including its shaft. You can find 7 different sizes of the covers for the top part of the engine and 3 different sizes for the full body covers. All come in silver colour. The tables below show the different sizes of the covers. The dimensions refer to the length, the width and the height of the cover (Drawing 1). The horsepower given is approximate and it is not the only factor that should be taken into consideration when choosing your cover. The type of the engine (2 stroke, 4 stroke), the length of the throttle grip, the brand of your motor and its production date should also affect your choice, as they differentiate the size of the engine.

Cover for the Top Part of the Engine

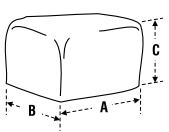
Code	57269	57270	57271	57272	57273	57274	57275
H.P (Approximate)	2-5	2-15	10-45	30-90	70-150	115-225	150-300
A (cm)	40	46	55	63	73	75	90
B (cm)	25	27	33	35	40	45	60
C (cm)	32	35	45	50	65	75	80

Full Body Engine Cover

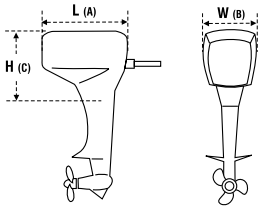
Code	57329	57330	57331
H.P (Approximate)	2,5-10	8-70	70-150
A (cm)	75	87	125
B (cm)	125	157	210

To choose the most suitable cover for the top part of your engine, measure it as shown in the Drawing 2 and determine the dimensions that more closely match your model.

COVER - Drawing 1

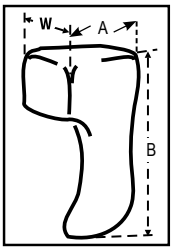


ENGINE - Drawing 2



*When calculating the height of the engine, you should also include a part of the shaft, as shown in Drawing 2, in order to ensure that the engine will be covered completely underneath (apart from the shaft).

To choose the most suitable full-body cover for your engine, you should measure the engine's height (B) as well as its width (W).



In order to calculate correctly the maximum height that the appropriate cover should have, you should deduct from the engine's height (B) half of its width (W). For instance, if the height (B) of your engine is 210cm and its width (W) is 50cm, then the cover that you need should be 185cm (210cm-25cm) high. Therefore, in this case, the correct cover is cover 57331, which is 210cm high, as indicated in the relevant table.

Boat & Jet Ski Cover

SEA COVER Boat Cover is ideal to protect your boat against rain, dust and sun. Perfect for storing your boat during winter months and also when in the water but needs to be covered. It combines high manufacturing standards with high-quality materials. It is available in several sizes depending on boat's dimensions. Junior, mini and sizes from 1 to 6 are made of extra strong PA coated polyester 420D for maximum water resistance and they are available in silver colour. Size 7 is made of 600D polyester and available in blue colour. All feature an elastic cord at their total circumference for ideal fit and double stitched seams for long-lasting use. Additionally, they have non-scratching plastic D-rings for extra hull protection. They can be used in fishing or recreational boats, inflatable ones or motorboats with or without cockpit and rails.

Console Cover

This console cover is provided in silver colour and in five different sizes. It is made of extra strong Polyester 420D with double stitched seams for long lasting use and it features a cord all around at the bottom side for ideal fit. It also provides superb UV Protection and reduces the damage possibility of instruments and electronics because of weather conditions.

Optimist Hiking Straps, L 1,5m W 5cm

Optimist hiking straps hold sailor's feet when hiking and absorb individuals' shocks from rough sailing. They are made of 600D Polyester with PVC backing. They are filled with NBR foam in the middle for water resistance and pleasant feel. The straps are put together on their one edge, so as to adjust them according to the length of your feet. The straps are loose on their other edge to tie them on your Optimist using a plate or buckle.

Optimist Boat Cover

It protects your Optimist from heavy wear and prolongs its life. Optimist boat cover drapes the entire dinghy and closes tightly for storage. It is made of heavy duty 600D Polyester with PVC backing and ripstop reinforcement to resist in rough weather conditions.

Code | **70174**

Cover Support

Boat Cover Support System

SEA COVER Boat Cover Support System will ideally extend the life of your boat and cover. Easily installed and adjusted, it keeps water and debris from accumulating in the centre of the cover. The kit includes one telescopic aluminium pole (50cm to 116cm) that is positioned in the centre of your boat with a wide support on top and polypropylene webbing straps, which are hooked from bow to stern. The Boat Cover Support System fits all covers for boats up to 7m.

Code | **57276**

Installation Instructions:

1. Position the strap centre point over the bow of the boat. The protective sleeves should be positioned so that the strap does not come in contact with the front edges of the boat
2. Pull the straps evenly over the boat
3. Weave the straps through the triangular support piece in an "under-over-under" pattern, so that the straps lay on top of the support
4. Insert the pole into the triangular support piece and raise the pole to its highest point. Twist the pole sections to loosen and to tighten
5. Hook the ends of the straps on the boat trailer
6. Adjust the straps evenly so that they are tight and the pole stands upright
7. Carefully pull the boat cover over the straps, so as not to push over the pole. The pole may need to be adjusted in height depending on the shape and size of your boat and its cover

Boat Cover Support, Telescopic, Aluminium

Ideal for wintering to prevent the accumulation of water on the cover in case of rain.

These mats and carpets are designed to provide you with the maximum comfort and safety when walking on your boat's deck by creating a comfortable, elastic and anti-slip walking surface. Manufactured according to the international standards, they are non-toxic and environment friendly products, especially designed for use in boats. However, they can be adequately used in office buildings, commercial buildings, restaurants and in other areas with heavy traffic. Marine carpets and mats are made of soft and durable PVC material for extra resistance to seawater, fuel and oil spillage. Thanks to their UV-stabilisers, they are suitable for areas exposed to the sunlight. The loop layer is made in order to trap dirt and filth, protecting at the same time the floor. The Welcome Mats are available with backing, whereas marine carpets are available in two types, one with backing, in roll and separate pieces and a second one without backing, in roll version only. Depending on the model, there are two sizes, while all models are in grey and blue colour.

Scotta Cruising Rope

This polyester rope with its double braid is extremely flexible and its special construction makes it particularly easy to tie, but also suitable for any boat. During its construction a special process removes any residual elongation, adding stability. Its easy and high-quality handling, a result of its special machining, is maintained for life.

- Designed to operate efficiently with the minimum effort required
- Durable, lightweight & easy to handle
- With upgraded locking feature to ensure lock & unlock position. This increases the mechanism's lifetime, by protecting it from unintentional damage during use.
- Glass Reinforced PA

Bosun's Chairs

Professional Bosun's Chair

LALIZAS Professional Bosun's Chair has been designed according to the highest quality standards, so that it can be used easily by professionals.

- Reinforced Nylon with PVC backing and PP webbing
- Supreme comfort for extended time aloft
- Comfortable wrap-around back
- Adjustable strap between the legs for extra safety
- Stows in its own bag, which becomes a tool pouch when the chair is in use
- Attached side tool case
- Pocket to fit an optional wooden seat (code: 00169)
- Retroreflective tapes for better visibility
- Floats in the water when it is empty

Code | 10210

LALIZAS

Safety Bosun's Chair

LALIZAS offers you a bosun's chair to allow you to work comfortably, safely, and in balance. It is made of tough Nylon 210D with PVC backing , thickness 0.35mm and comes complete with safety straps for added security, fitted side pockets for tools and a padded wooden seat.

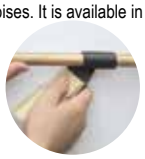
Code | 10080

Wooden Seat for Professional Bosun's Chair (10210)

Code | 01169

Vinyl Foam Thermal & Sound Insulating Tape, Black

The thermal & sound insulating tape is suitable for the pipeline freezing resistance, insulation and decoration. Generally, it is used whenever a specific area or place needs to be insulated, in order to be protected by the variations of temperature or even to protect the people onboard by undesirable sounds. It can also be used between the hull and the sole boards, so as to minimize the squeaking noises. It is available in different sizes.



Code	Dimensions
11854	50mm x 5m
11855	25mm x 5m

Masking Tape, White

It is a general-purpose tape and is suitable for holding or sealing, as well as for protecting surfaces. It has been designed for indoor use but also for extended outdoor use, since it can withstand up to 80°C temperature. It is supplied in white colour and different sizes.

Code	Dimensions
11851	20mm x 50m
11852	25mm x 20m
11853	50mm x 50m

Nonslip Tape, with elasticity

Marine Neoprene Tape "Hatchseal"

Code	Dimensions
11551	3m x 19mm x 3mm
11552	3m x 19mm x 6mm

Mounting Tape, White

Nailing on the boat is over! With the double-sided adhesive tape. It is suitable for mounting pictures or any other decoration on most types of dry and smooth surfaces, you don't need nails when decorating your boat.

Code	Dimensions
11850	2mm x18mm x 1.6m

Instructions of Use

Use 10cm (4") of tape for every 227gr of the item to be mounted. The tape is suitable for objects with maximum weight up to 900gr.

1. Cut the tape at the necessary length. Do not remove the protective liner.
2. Press the tape on the back of the object to be mounted. Press firmly on the liner for a better outcome.
3. Remove the liner and press firmly the object on the wall

Note: If you wish to remove the mounted object, insert a knife behind the mounted object and cut the tape between the two surfaces. Don't pull the object, in order to avoid damaging the surface or the object.

Marine Duct Tape

The Duct tape is a waterproof cloth tape, which can be used in numerous indoor or outdoor jobs and repairs. It is supplied in several colours and two different sizes.

Code	Dimensions	Colour

Transducer HST-DFSBL

Classic 600W broadband sensor with 50/200 kHz frequencies for all kinds of fishing, up to 450 m depth. It can be mounted externally on the stern of the boat on the mirror. It is an ideal sensor for those fishing in the shallows and in deep waters.

- Coverage angles : 12 ° @ 200 KHz || 36 ° @ 50 KHz
- Contains temperature sensor
- Xducer ID® Technology
- Suitable for any hull
- (1) Internal broadband ceramic
- Includes a 7m Cable

Code | **65789**

Active Imaging 3-IN-1 Transducer

Perfect for pinpointing fish-holding areas like rock piles. Delivers superior clarity and the highest resolution images of fish and structure at a longer range than any other structure imaging technology.

- High detail and long imaging range
- CHIRP, SideScan and DownScan technology
- Easier target identification with FishReveal™ Smart Target View
- Supports Medium and High CHIRP (83/200kHz) + 455/800kHz frequencies
- Compatible with Lowrance HDS LIVE & ELITE FS

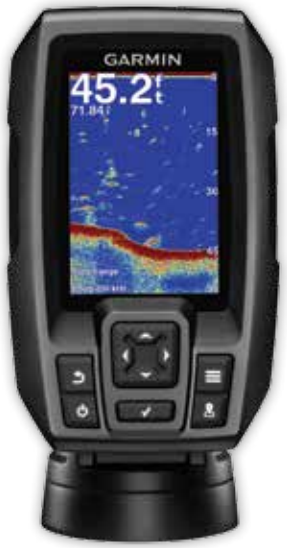
Fishfinder Striker 4 with 3,5" colour Display , 200W, 480m

The all-new rugged STRIKER fishfinder series with high-sensitivity GPS are designed to allow you to mark your favourite fishing spot and easily navigate back to it tomorrow, saving you time and money. All of the STRIKER series devices offer CHIRP traditional sonar, which show crisp fish arches with excellent target separation. The STRIKER "dv" series adds CHIRP DownVü to provide clear images of structure below the boat. The STRIKER 7sv adds CHIRP DownVü and CHIRP SideVü scanning sonar to find structure to each side of the boat. Use the split screen view to show the waypoint map and various sonar options or create customized sonar views simultaneously.



Code | 65774

- Offers a keyed interface with dedicated buttons. The device is easy to use and easy to install
- New rugged, outdoor look to compliment your lifestyle. Able to withstand the harsh marine environment with excellent performance.
- The built-in GPS receiver allows you to mark your favorite fishing spot and get back to it tomorrow. This also allows the device to display GPS speed so you know how fast you are trolling.
- Use the waypoint map to easily view, mark and navigate to locations such as fishing spots, fishing gear and docks.
- Instead of sending just one single frequency, CHIRP sends a continuous sweep of frequencies ranging from low to high. CHIRP sonar technology then interprets frequencies individually upon their return. Since this continuous sweep of frequencies provides a wider range of information, CHIRP sonar is able to create crisper fish arches with greater target separation.
- Allows the device to tilt and swivel for an optimum viewing angle. An optional flush mount kit can be purchased to have a sleeker install on your dash.
- View your sonar data in the classic flasher format. Ideal for ice fishing or vertical jigging.
- The optional portable kit makes it easy to use this device for ice fishing or on a kayak.
- All STRIKER fishfinders include everything you need in the box to start fishing - including a transom/trolling motor mount transducer. You can also choose from a wide variety of optional transducers for any type of installation and fishing experience.
- Supports Minn Kota® and MotorGuide® trolling motors with integrated transducers.
- Utilize the optional User Data Sharing Cable to share your favorite waypoints and routes between compatible STRIKER and echoMAP devices.

Display Size (diagonal): 3.5" / Display Resolution: 480 x 320 HVGA / Included Transducer: Dual Beam (CHIRP 77/200 kHz) / Transmit Power: 200 W (RMS), 1,600 W (Peak to Peak) / Frequencies Supported (kHz): Traditional: 50/77/200 CHIRP (mid-band, high) / Maximum Depth Capabilities with included transducer: 1,600 ft. (traditional)

GARMIN

Marine VHF 115i

Communication is critical on the water. This radio plugs and plays via the NMEA 2000® network to compatible Garmin chartplotters and MFDs to provide standard Class D Digital Selective Calling (DSC) functionality. With 25 W transmit power and built-in GPS, they give fishermen, sailors and cruisers confidence at their fingertips in an emergency situation.

Key Features:
- Built-In GPS
- Fixed-mount with plug and play via the NMEA 2000 network; can also be connected via NMEA 0183
- Digital selective calling - Standard Class D Digital Selective Calling (DSC) functionality (distress calling and direct calling with user programmed MMSI).
- 25 W of transmit power at your fingertips
- Programmed with international marine channels
- Designed to complement the latest GPSMAP® 7x2/9x2, GPSMAP 10x2/12x2, GPSMAP 7400/7600 and GPSMAP 8400/8600 chartplotters and MFDs.

Terrestrial Omnidirectional TV Radio Antenna, with 27,5 dB Gain Average

The most popular Glomex TV Antenna has been chosen as standard equipment by all major boat builders worldwide. A revolutionary state of the art antenna element and amplifiers produces exceptional performance on all channels, including the lower VHF frequencies. The 99643 TV antenna is supplied with the amplifier, including the flush, 15m of low loss, twin screen 75 Ohm coaxial cable, 1,5m TV cord and all the F gold plated connectors for the installation on board. Combined with the additional 99644 Splitter (sold separately) enhances its functionality and is able to receive radio programs as well.
Antenna Diameter: 370mm, Antenna Height: 240mm

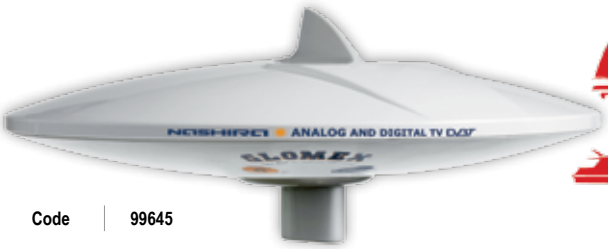
Code | **99643**

Two Way Splitter, for 99643 & 99645 Antenna

Code | **99644**

Terrestrial Omnidirectional TV Radio Antenna, Glomex, with 26 dB Gain Average

This compact, lightweight TV antenna features exceptional performance on all TV frequencies. Made of UV resistant injection moulded nylon, it will keep its white mirror like finish for years. Like other TV antennas, the 99645 has no active components in the antenna, which provides extra protection from atmospheric elements. The 12/24V power supply amplifier is totally screened. This allows the best reception of TV signals with less interference from shipboard electrical noise sources.
Combined with the additional 99644 Splitter (sold separately) enhances its functionality and is able to receive radio programs as well.
Antenna Diameter: 250mm, Antenna Height: 151mm



Code | **99645**

AM-FM Antenna, L 1,5m, 6m Coaxial Cable & Motorola Plug (AM 550-1600 / FM 88-108 Mhz)

· Length: 1,5m
· Nylon ferrule
· Glossy fiberglass
· Solid antenna elements

VEGA Omnidirectional TV Antenna, with 25dB Gain Average

When you require a compact antenna or want a sleek low profile without the bulky weight of a large antenna, then 70876 TV antenna is the perfect solution. It is made of ASA, can withstand the harsh marine environment and with a totally screened, low noise amplifier, built in the antenna case, it ensures that you'll have the best reception possible for VHF and UHF frequencies, in both analogue and digital channels. It is supplied with the power inserter, plastic mount, 10m of low loss coaxial cable (75 ohms) and the 1.5m TV cord. Includes Splitter for TV & Radio.
- Antenna Diameter: 100mm
- Antenna Height: 210mm
- Base Diameter: 25mm
- Frequency Range: 40/890 MHz
- Gain Average: 25dB
- Power Supply: 12V

Electronics & Navigation

VHF Antenna, with 3dB Gain Average & PL259 Connector, L 0,9m

The VHF 3DB MASTHEAD 0.9m antenna belongs to the ALOUD product line. There is no compromise in the manufacturing of these antennas, while its tapered stainless steel whips can absorb physical shocks without bending. The antenna is supplied with all the necessary parts for installation and a high quality RG58 C/U (MIL C17) coax cable. The Glomex exclusive weatherproof solderless connector allows installation without soldering, so it simplifies the replacement of existing antennas. These antennas are approved for marine use on grounded and ungrounded installations (sail and power boats).

Code | **71114**

VHF Antenna, with 3dB Gain Average, L 0,9m, 18m Coaxial Cable & PL259 Connector

There is no compromise in the manufacturing of these antennas (Aloud series). The tapered stainless steel whips can absorb physical shocks without bending. The fiberglass version has a glossy polyurethane coating to provide extra corrosion protection for the internal copper elements. These individually tuned antennas are supplied with all the necessary parts for installation.

Code | **99646**

VHF Antenna, with 3dB Gain Average, L 1,5m, 4,5m Coaxial Cable & PL259 Connector

This 5/8 wave antenna is the right choice for small boats where exceptional value at an economic price is the primary concern.

· Length: 1,5m
· Glossy Glomex fiber-glass
· Solid brass antenna elements
· Nylon ferrule
· 4,5m Coaxial cable

Code | **99647**

VHF Antenna, with 6dB Gain Average, L 2,4m, 4,5m Coaxial Cable & PL259 Connector

Glomex has set a new standard for quality in lightweight, economic VHF antennas with the 99650. The standard features of the CLASSIC range make this the best choice for the value minded boater.

· Length: 2,4m
· 4,5m Coaxial cable
· Glossy Glomex fiber-glass
- Remforced tube of 1,2mm thickness
· Solid brass antenna elements
· Glue protection rubber collar
· Electro polished stainless steel ferrule
· Safety tip synthetic rubber

Navigation Instruments

One Hand Dividers

These dividers can be opened and closed with one hand, while performing your chart work. The top curved part of the handle is brass and the tapered sides are bright finished marine alloy. They are believed to be the best marine dividers available.

Code	93968	93969
Length	17,8cm (7")	20,3cm (8")

Straight Pattern Brass Dividers

Dividers is a necessary tool in distance calculation, and generally in navigating the boat. Lalizas dividers are made of bronze arms and tips with special metal alloy, for extra resistance. They are available in two sizes17,8cm (7") and 20,3cm (8").

Code	94003	94004
Length	17,8cm (7")	20,3cm (8")

Parallel Ruler

Code	94008	94009
Length	38cm (15")	30cm (12")

Chart Protractor Bi-Rola, 5-1/8"x15-1/4"

This bi-rola chart protractor turns the tedious task of plotting into child's play. It virtually eliminates the need for other devices except a pencil. Plotting a course is as simple as laying the protractor along your course line and aligning the compass disk. Laying off courses, bearings, distances and loran interpolation is so easy you can forget about other methods. Corrections can easily be made for variation and deviation. The body of the contractor has scales for nautical miles, millimeters and loran interpolation.

Code | 95674

Triangular Protractor 45° with Handle

Using two 45° triangles provides an easy method of plotting and performing other chart work. With its protractor scales, the triangle is easily aligned in any direction with a chart meridian. Direction is maintained as one triangle slides on the other, to the desired position. Durable, clear vinylite.

Maps, Guides and Books

Lalizas offers you pilot maps, guides, and other such as Regulations slide rules, published by N. D. Elias. All articles included in this range have useful information for the navigation, and the ports in Greece. They are unique in the market because all the information provided, such as instructions of land approach, dangerous locations, and many more (excluding pilot maps), have been collected and verified with on the spot research by the publishers themselves, and not taken by third parties or organizations. Another feature, not found in other similar publications in the market, is the fact that the pilot maps, and the photos are all in colour and not black and white, allowing you to read them easily.

Sea Guide

These Sea Guides provide you with all the information that one may need on board a boat. They include pilot maps, detailed data on ports, gulfs and all possible anchorage locations. Furthermore, they feature information on the winds in the respective area, as well as information on food, entertainment, and sleep. The Sea Guides are made of reinforced paper, hand-binded, so that they last longer without being worn out or torn apart. They are available in 4 editions, covering all the seas in Greece.

Pilot Map

Pilot maps are of course one of the must-have-on-board items, since without them navigation would be almost impossible. The Lalizas Pilot Maps offer complete and updated information for your easy navigation in Greek waters. They also feature instructions for the entrance and exit from ports, with photos. They are made of laminated paper, specially processed so that it is completely waterproof, and that it is not worn out from the extensive use, or the weather conditions at sea. There are many pilot maps available, covering most of the Greek waters. All you have to do is choose.

Informative & Auxiliary Chart

Informative charts include particular information important for the navigation in the Adriatic Sea. Auxiliary charts show parts of the Adriatic Sea at scales of 1:300000, 1:400000 and 1:500000. They are used for graphic solutions of certain tasks in navigation and are suitable for coupling.
Informative and auxiliary charts are not subject to the correction by NTM, nor used for navigation.

Charts

Charts show a particular navigational area (a part of the Eart's surface), including all the elements necessary for the safety of navigation and orientation at sea. They fall into navigational charts, informative and auxiliary charts. Charts are manufactured on the Mercator projection by Croatian Hydrographic Institute (HHI).

Navigational Chart

According to their scale, content and purpose, navigational charts are divided on General charts, Sailing charts, Coastal charts and Plans. Navigational charts are corrected by Penul d.o.o. Split, Croatia.

General Chart

General charts show the area of the Mediterranean Sea with a part of the Black Sea and the Ionian Sea at scales of 1:750000 to 1:2500000.

Code	Description	Scale 1:	Format

Log Books

The Ship's Log, 11-1/2"x8-5/8"

The Ship's log has a flexible, diary type format consisting of lined pages for recording ship's data and activities. Also included are Guest Register, Vessel Specifications and Serial Number List pages as well as quick reference pages on topics including: rules of the road, weather reference, radio procedures and other.

Code | 93981

The Cruising Log

The Cruising Log provides ample space for recording information about nautical excursions, as well as, a guest registry. Quick reference pages are provided on such topics as: rules of the road, radio procedures, distress signals and weather reference. It also includes space for you to record vital information about your vessel.

Code | 94013

The Maintenance Log, 11-1/2"x8-5/8"

Featuring a detailed format, the Maintenance Log has ample space to list vessel specifications, spare part numbers, previous repairs and maintenance, as well as, space for reference drawings. Also includes quick reference pages on safety, weather, BIA certification requirements and other.

Strainers 312

Plumbing is also an important part of the boat's equipment. Most boats (open, cabin, inflatable, powerboats, sailboats, etc.) have various plumbing installations, from simple (e.g. deck shower) to really complex ones.
At MARINA Stores, you can find top-quality products by the Italian manufacturer Nuova Rade, such as water tanks, pressurised pumps, toilets, pipes, drains and more.

Nuova Rade

Submersible Bilge Pump

The 12 & 24 V Submersible Bilge Pumps are made of shock resistant ABS and powered by the world's best compact motor. The snap-on strainer base makes the installation a simple procedure. These reliable pumps are available in six sizes from 500GPH to 1000GPH.

Submersible Bilge Pumps

Submersible Automatic Bilge Pump

Nuova Rade

Nuova Rade Submersible Automatic Bilge Pump combines quality and ease of use in one device. It features very simple disassembly for both installation and cleaning. It has a built-in automatic float switch which activates the pump when the bilge water rises, thereby allowing the pump to operate even when the boat is unattended. The pump also features a manual test button that allows you to test the level switch as well as the pump. Additionally, it has a snap on strainer base making installation and maintenance simple. It is made of durable ASA. The pumping capacity is 600GPH through a 19mm (3/4") hose & 1000GPH through a 25mm (1") hose. Fuse 3A, 4A & 7,5A. 12V & 24V DC. CE. With strong and reliable motor and 100% true efficiency in gallons' value. With 2 years' warranty.

Float Switches

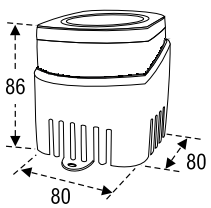
Float Switch FS-40

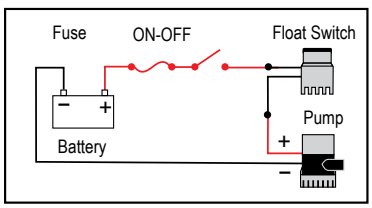
Nuova Rade

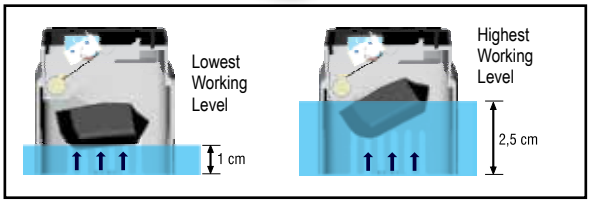
Nuova Rade Float Switch FS-40 has been designed to be used with bilge pumps rated up to 10A. The FS-40 activates or deactivates the bilge pump, depending on the water level. Namely, when the water level rises, it forces the float upwards, which switches on the bilge pump. By installing the float switch there is no need to monitor the water level and switch the pump on or off manually. A very important feature is that you can test the smooth operation of the switch at any time, just by operating the test button. The Float Switch FS-40 is made of tough ABS for long life Voltage: 12V/24V DC.

EASY MOUNDING

Code | **31170**

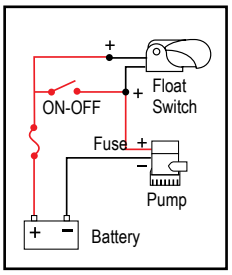






MARINA Stores

Nuova Rade



Automatic Float Switch

This float switch is designed for the automatic control of electrically driven bilge pumps. Designed with a reliable rolling-ball and switch system that prevents rapid on/off cycling found on some switches and is safer than mercury switches. When water lifts the chamber buoy up to 6cm, the switch automatically turns the bilge pump on until the bilge pump is emptied. This automatic float switch has a plastic housing.

Code	Power (V)	Fuse (A)	Material	Length (cm)	Width (cm)	Height (cm)	Amp

Environmental Electronic Level Switch E.E.L.S

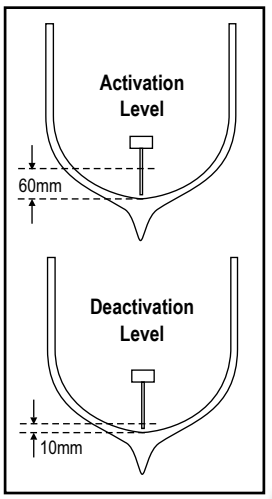
The Environmental Electronic Level Switch is the latest innovation, as it operates with an electronic sensor, instead of the air pressure or any moving parts. It has been designed to sense the water level with great precision and accuracy, thus offering you the best possible result. One of the most important advantages of the E.E.L.S is that it is environmentally friendly. Nuova Rade designed this switch to operate only when it senses water. If there are quantities of hydrocarbons, such as oil, it switches the bilge pump off, thus preventing any pollution. Vertically mounted to the hull, the E.E.L.S is connected in line with bilge pump(s) even of higher potency. Also its compact design allows a far greater freedom of movement. Other features are the insulated electrical contacts, casing from durable Nylon and ABS, 100% impermeability to water.

Technical characteristics:
The Electronic Level Switch can be used with any bilge pump up to 22A. The Electronic Level Switch has the following electrical characteristics:
Voltage: 12V DC
Connection to the main circuit: Inline Maximum Intensity: 22A.

How to connect the Electronic Level Switch
Connect a switch for the activation of the automatic operation of the bilge pump inline to the positive pole of the battery. You should also connect a fuse inline, according to the intensity of the bilge pump and up to 22A max (See manufacturer's instructions). The wires of the Electronic Level Switch which are connected to the poles of the battery are RED (+) and BLACK (-). The other pair of wires, the BLACK (-) and BLUE (+), are connected to the negative and positive pole of the bilge pump respectively.

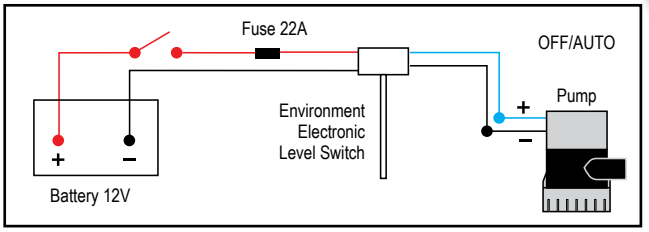
EASY MOUNDING

Code 31010

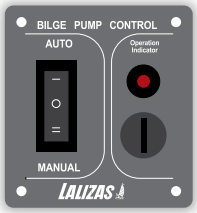


ATTENTION!
It is necessary that you follow the polarity when making the connections, otherwise you run the risk of producing a short circuit, leading to damage your Electronic Level Switch circuit. Please check the polarity before activating your new Float Switch.

WIRING
Black: Negative (-)
Red - Blue: Positive (+)
Black - Red: Connection to the battery
Black - Blue: Connection to the Bilge Pump



Pump Switch



The LALIZAS Pump Switch allows you to operate your boat's bilge pump automatically, manually or even switch it off. It has indication light so that you know when the device is operating. Made of Inox 316 for durability and lifetime protection against corrosion. It is available in charcoal colour.

Additional features
- Auto-Off-Manual switch
- For use only in 12/24V. Max. load per switch: 15A
- Coated with electrostatic paint
- Completely wired and ready to install
- 2 year warranty

Diaphragm Bilge Pumps

Diaphragm Bilge Hand Pump

Ideal for use where battery power is not available or as a backup to the electric pumps, the Diaphragm Bilge Hand Pump is easy-to-use and has a capacity of 0,4lt/0,1gallon per stroke. It features a built-in non-return valve, which can be easily removed with the quick release clip and two-position handle for convenient use, depending on your requirements. Additionally, its outlet connection allows the use of either a Ø 3/4" or a 1" hose.

Bronze Gear Pump Suitable for Diesel & Oil

Heavy-duty electronic gear pump 10 l/min and 3,5 bar. With integrated smart keypad to reverse the flow direction and to manually fine tune the flow rate; the flow rate is also automatically adjusted according to the viscosity of the fluid to avoid cavitation. It is the ideal one for transferring oil and diesel. Compact and easy to operate and carry.

Bronze Gears Pump Suitable for Oil

Complete range of self-priming electric pumps with bronze gears to transfer lubricating oil and viscous liquids. The bronze gears guarantee constant pressure and less noise. Can operate in absence of liquid. By using the special tube kit (code 99156), supplied separately, the pump can be employed for draining exhausted lubricants oil out of engines' sumps, particularly marine engines. Operation is done through the dip stick tube. Available in versions with integrated on/off & flow reversing switch or kit with battery clips and hoses.

Water Accumulator, Plastic, L 24cm, 1-1,5L

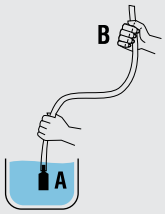
General Use Pumps

Hose Pump, Manual Suction, Transparent

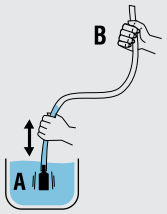
Nuova Rade

This corrugated hose pump is great to outfit your boat for optimum customisation and maintenance. Allows quick and safe transfer of liquids from one container to another. High-quality and durable PVC material. Suitable for petrol, diesel, water.

Code	Diameter (mm)	Length (cm)	Hose	Hose Thickness (mm)	Flow Rate (gallons/min.)
70002	12,5	160	PVC	2	3,5
70003	22,5			3	10

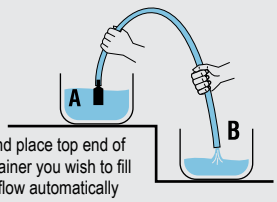


1. Place the bottom end A of the hosepipe into the tank with the liquid that you wish to pump out and hold the top end B of the hosepipe upright



2. Shake the bottom end of the hose vigorously up and down until the liquid rises in the hose, continue pumping until the liquid passes balance level

ATTENTION: Make sure that the empty container is placed below the level of the container you wish to empty



3. Stop pumping and place top end of the hose in the container you wish to fill and the liquid will flow automatically

Waste Pumps

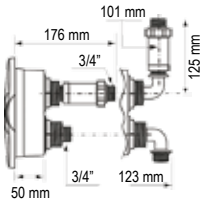
Shower Sump System LSU 600, 12V

Designed especially for use on boats with built-in sink, shower or tub, the LSU 600 will pump all water out of the drain and into the tank. It is compact and can be mounted either against the floor or against the walls, in which case the two legs can be cut off. It has a built-in automatic bilge pump that will start operating, as soon as the float switch senses water. Additionally, it features a filter, which can be easily serviced by removing the top transparent cover and a non-return valve at the outlet hose. The LSU 600 case is made of resistant polypropylene and the lid of acrylic. Its power consumption is limited to 2,5A at 12V, fuse 4A. The LSU 600 System has 3 inlet hoses (2 of 19,1mm (3/4") and 1 of 25,4mm (1")) and 1 outlet hose with non-return valve for hose of 19,1mm (3/4") and 25,4mm (1") in diameter.

Case with Water Inlet/Outlet, with Lid

Made of ASA and chrome plated metal parts. They have sea water outlet and fresh water inlet. Having easy installation, Nuova Rade cases are available in white colour with white or chrome lid. You can also choose between straight or elbow connector. Sea water outlet/Fresh water inlet with quick connectors.



Code	Connector	Lid Colour

Case with Sea Water Outlet, with Lid

Used in conjunction with a pump and thru-hull fitting, the Sea Water Outlet produces pressure sea water on the deck (to wash the deck or rinse the fish). Also perfectly suitable for fresh water.

The complete set includes:
- An ASA housing with splash-proof ASA cover
- A female quick-coupling fitting for garden hose connection. Features a non-return valve
- Chrome brass quick coupling connectors for optimum corrosion resistance
- A locking flange
- Male 3/4" threaded connector to the boat's water system

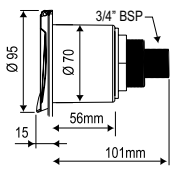
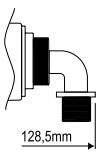
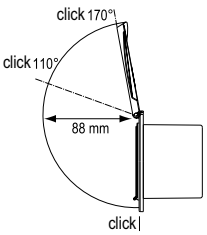
47818	Straight	Chrome
47819	Elbow	





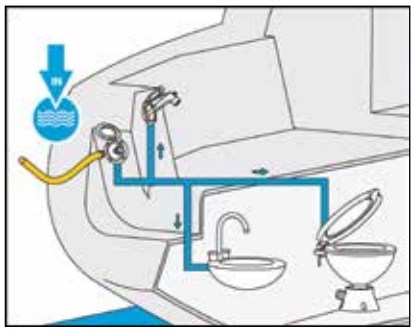


Case with Fresh Water Inlet, with Lid

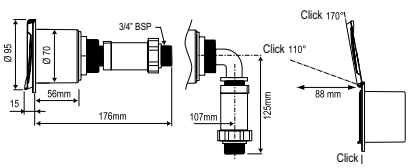
Nuova Rade

This is the perfect connection between the boat's water network and the shore water supply. It is then easy to cook or have a shower when at the dock, without using water from the tanks (Not suitable for filling the water tanks).

The complete set (47812-5) includes:
- An ASA housing with plastic splash-proof cover
- A pressure regulator which accepts up to 5 bar working pressure, compatible with most appliances and equipment on board
- A non-return valve
- A male quick-coupling fitting for garden hose connection
- Male 3/4" threaded connector to the boat's water system



The complete set (58131) includes:
- An ASA housing with plastic splash-proof cover
- A male quick-coupling fitting for garden hose connection
- Male 3/4" threaded connector to the boat's water system
- Metal pressure regulator with cloth diaphragm valve, adjustable from 1,5 to 5 bar
- Maintenance free, robust construction with silent operation (no vibration)
- Max. inlet pressure: 15 bar
- Max. temperature: 70°C
- Corrosion preventing DZR brass body
- Factory preset (4 bar at zero discharge for 3 bar working)
- Diaphragm and seals EPDM & NBR
- Slotted adjusting screw that can be turned with a flathead screwdriver
- Female 1/4" pressure gauge outlet



Code	Connector	Lid Colour	Pressure Regulator
47812	Straight	White	Plastic up to 5 Bar
47813	Elbow		
47814	Straight	Chrome

Diablo

DIABLO Fixed Tank, for Fresh & Waste Water

DIABLO line of fixed tanks is made of recyclable HDPE material, consisting of a full range of 10 models complying with international standards. DIABLO can be used for either fresh or waste water. The advantage of this line of tanks is the 'EASY SWITCH' plate, which can be purchased separately based on the use of the tank, and is manually interchangeable. The hatch used for fresh water is blue and the one used for waste water is brown. It is secured and seated by rotation of the piece itself and blocked into position by means of a locking pin that prevents loosening. To clean the tank just lift the locking pin and remove the hatch by unscrewing it.

Ercole

ERCOLE Fixed Fresh Water Tank

ERCOLE line of horizontal fresh water tanks is produced from polyethylene material in white colour. Polyethylene material is used to prevent any taste alteration of fresh water. This line consists of a full range of 9 models complying with international standards and is used for fresh-water collection and storage. All contain a water output for Ø16mm hose and a water supply input that is either threaded with a cap, either with a vertical outlet for Ø38mm hose, either with an 45°-angled outlet for Ø38mm hose. Pre-cut for tank level sensor.

Zefiro

ZEFIRO Fixed Waste Water Tank

ZEFIRO line of vertical waste water tanks is made of high-density polyethylene material in brown colour. Polyethylene material is used to prevent any waste odors. These tanks are designed with a gravity discharge technology that allows easier unloading of the tank without using a pump, when installation is carried out at more than 0.5 m above the waterline. Can be mounted on a bulkhead of the boat, saving space and time. The line consists of two models with capacity of 40L and 60L, complying with international standards and can safely hold waste water from toilets until they can be discarded safely. All contain 1 inlet and 2 outlets of Ø 38 mm - G 1 1/2" and one vent of Ø 25 mm - G 3/4". They have an inspection hatch of Ø 127 mm, that can be removed for cleaning purposes. Contain a plate compatible with VDO standard senders and are compatible with diaphragm pumps and macerators (12 or 24 V).
Manufactured in accordance with ISO 8099.

Flexible Water Tank

The flexible, lightweight and form-fitting water tanks are a strong, reliable, practical and low cost solution to store water on your boat when a rigid water tank is not an option. Water tanks are supplied complete, ready to install, with two welded fittings. A Ø 38 mm inlet fitting and a Ø 12 mm outlet valve with moveable thread tightening rings for maximum sealing. The tanks have metal hooks for fixing (hanging) and therefore allow for a better stability. The tanks are made of non-toxic PVC, waterproof and high-resistant material that protects them from tearing and abrasions. Compact design allows for easy storage in your boat, car, truck, RV, garage, or home. Nuova Rade Flexible Water Tanks are available in 6 rectangular sizes as well as in 2 triangular sizes, in grey colour.

Water Shower Tank , flexible

- It is made of PVC and can heat 20L of water
- It is lightweight & small, saving you a lot of space
- It is environmental friendly, since the construction material does not contain any toxin

Code	99976
Capacity (lt)	20

SEA TOILET Portable Toilet

The SEA TOILET Portable Toilet is suitable for interior and exterior use. It is self-contained and it does not require any external water or power connections. It consists of two separate tanks: a fresh water holding tank of 12L capacity and a waste holding tank of 10L. However, you can change the waste tank's capacity to 20L, by replacing the 10L waste tank with the 20lt waste tank (11869). The toilet is made of high-density polyethylene (HDP) with matte finish for greater resistance to scratches.

Code | 11867

The fresh water tank provides up to 50 flushes

Heavy duty, corrosion resistant side latches lock the tanks together

The double sealed drain valve protects against leakages and odours

Both waste and fresh water tanks are one-piece construction; no seams required

The detached waste holding tank (10lt or 20lt) can be easily emptied, without using any tools

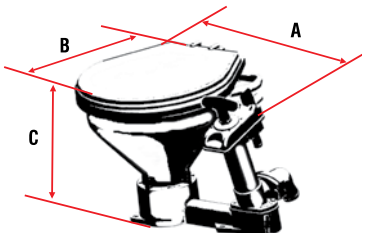
Manual Marine Toilet LT-0 & LT-1

The LT-0 and LT-I Toilets are especially designed for long term use. They are available in two sizes: compact (LT-0) and regular (LT-I). Both can be easily installed above or below the waterline. If they are installed below the waterline, it is necessary to use an anti-siphon loop to prevent water inflow into the interior. Furthermore, these toilets can be installed with the pump either at the right or the left side of the porcelain bowl. The valves have been designed for a longer and more reliable service life. The drain plug has been designed with a quick fit locking mechanism for easier and more effective drainage of the toilets. All parts are made of corrosion resistant materials.



Code	Description	Dimensions (mm)		
		A	B	C

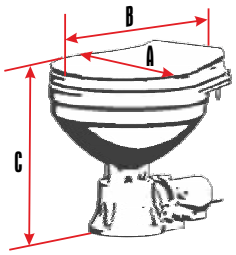
Electric Marine Toilet LT-0E & LT-1E

The Electric Toilets LT-0E and LT-1E can be supplied as either 12V or 24V and have been designed to make your life on board easier, because of their self-priming double action pumps. By just pushing the on/off switch, which can be installed anywhere in the toilet cabin, you activate the pump and while fresh water rinses in the bowl, the macerator grinds up and pumps out the waste. The LT Electric Toilets can be easily installed either above or below the waterline. Please note that when they are installed below the waterline, it is necessary to use an anti-siphon loop for preventing water inflow into the interior. Furthermore, the toilets are supplied either with a compact (LT-0E) or a regular bowl (LT-1E). Additionally, the LT toilets have been designed with a quick fit locking mechanism, which allows you to easily remove the pump's base, in order to clean the exposed waste surfaces. All parts are made of corrosion resistant materials.



Code	Descrip-tion	Rate Voltage (Volt)	Load Current (Amps)	Dimensions (mm)		
				A	B	C
11874	LT - 0E	12	12-15	325	420	375

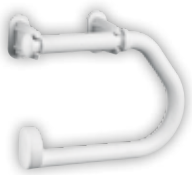
Holder for Toilet Paper

High quality Holder for Toilet paper, ideal for installation next to your boat's toilet. Made of UV-resistant ASA plastic, it provides resistance to damage and chemical solvents. Available in white colour. To be used combined with the the Case for Toilet Paper with Door (195263).



Code | **195258**

Electric Toilet Flush Switch Mon-Off, 12V/24V

- Rocker switch with Mon-Off function (automatically returns to OFF from flush position)
- Dual (12/24V) voltage rating: DC 12V 20A /24V 10A
- Dimensions: length 114mm, width 54mm
- Mounting dimensions: length 103mm, width 43mm, depth 75mm
- IP66
- Circuit protection: resettable circuit breaker 20A

Code | **73021**

Anti-vent Loop Connection

An anti-vent loop connection is required when the toilet installation is below the waterline. This prevents water inflow into the interior. The anti-vent loop connection is made of ABS and is available in two different sizes.

Spare Disinfectant Tablets for "DSRU" Marine & Pine (2 Tablets)

Code	11866

Disinfect Sanitizing Release Unit "DSRU"

The DSRU is a unit that keeps your toilet bowl clean and free from limescale. The unit should be attached to the pipe, where water flows from the flush pump to the toilet. As water is pumped towards the bowl, it sucks a quantity of the disinfectant inhibiting limescale. It also colours the water (green or blue) and deodorizes. Each unit is supplied with two tablets, 'Marine' (blue) and 'Pine' (green) scent respectively. The tablets are also sold separately, but the DSRU is designed to fit any tablet in the market smaller than 30 x 30 x 40mm.
The DSRU is very easy to install, requires minimum maintenance and has a discreet and compact design.

Hose Clamps

Heavy-Duty Hose Clamp, Inox 316

Nuova Rade hose clamps are designed for heavy-duty secure hose connections, such as with exhaust hoses. They are made of Inox 316 for the ultimate resistance to corrosion. They also feature smooth imperforated band surface and rolled edges, so as to prevent hose damage. Available in various sizes, with band spreads from 3 to 8 mm.

Hose Clamp, Inox 316 & 304

Nuova Rade hose clamps are especially designed for marine use, with band, housing and screw all fully made of Inox for extra resistance to corrosion. They feature fixed housing and beveled edges, whereas the complete smoothness of the internal surface will definitely protect from any kind of hose damage. Nuova Rade hose clamps are available in various sizes with band spreads from 8mm to 20mm.

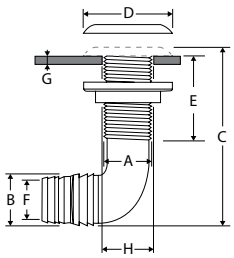
Thru-Hull Elbow 90º



Elbow thru-hulls are the answer to the most common plumbing issues:
- Allow major room saving, as they can be used with a hose running along the hull.
- Avoid making a bend in the hose, which can sometimes be a source of leak or breakage.
- Require a simplified installation process inside the hull, carried out by one person only. You can hold it firmly with one hand, while screwing with the other hand.

Ball Scupper Drain Valve, 72mm

- Automatically seals and drains a self-bailing deck
- Reduced noise
- To be mounted above waterline
- Designed to retrofit codes
- Same drill pattern to codes 43248, 43251, 43253, 44763

Fits Hole: up to Ø40mm (Ø1.5")
Dimensions: Ø72mm x H 48mm (Ø2.8" x H 1.9")

Ball Scupper Drain Valve, 114mm

- Automatically seals and drains a self-bailing deck
- Reduced noise
- To be mounted above waterline.

Fits Hole: up to Ø75mm (Ø3")
Dimensions: Ø114" x H 74" (Ø4.5" x H 2.9")

Non-Return Valves

The non-return valves are ideal for use in hydraulic installations. They feature a quick release clip, allowing you to service them easily and quickly. They are available as inline units or with a 90° curve. Their outlet connection allows the use of either a Ø ¾ -1" or a 1 ¼ -1 ½" hose.

Ventilation Shaft Grilles, Double, PP

Connects two ventilation exhausts behind one single louvered vent. Offers multiple combinations in conjunction with two adaptors (flange, straight or elbow stiffening adaptors). The vent is simply clipped on the stiffening adaptors (90 mm space between the two holes).

MARINA Stores

Nuova Rade

Ventilator Connector Ø 102mm

It is made of polypropylene, shock and load resistant, impervious to fuel and acetic acid. Notches and lugs hold the hose in position. In addition, the hose must be secured with stainless steel clamps. Connector is easy to fit, by means of 4 screws outside. When installing the blower, we recommend to place the exhaust louvered ventilator in a reasonably protected area (for example, in the cockpit rather than on the transom), so as to prevent water intrusion into the ventilation circuit. An extra precaution consists in building an elbow in the hose.

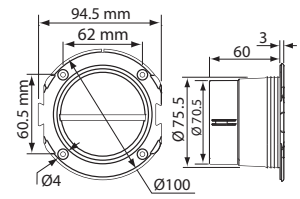
51069

51070

60071

Ventilator Connector Ø 76mm



Suitable for Ø 76,2 and 70 mm ducting hose. Made of polypropylene for a good UV-resistance. It is extremely shock and load resistant, compatible with common sealants and impervious to acetic acids. Made to support a hose along a bulkhead. On the straight model, ventilation is ensured by a louvered opening, which also prevents heavy water intrusions.
Quick and easy installation: Drill a Ø 76,2 mm hole. Notches ensure the perfect hold of the adapter in the bulkhead. Secure the adapter with 4 x M4 screws and sealant for waterproofness (compatible with most common sealants). Clip a louvered vent if necessary: moulded-in ribs contribute to the vent's secured position. Fit the hose on the adapter. Two lugs hold the hose, while waiting to be secured with stainless steel hose clips (not supplied).

Ventilators "EVO"

"EVO" ventilators achieve natural air circulation in the interior of your boat. They improve air quality, reduce humidity and eliminate carbon dioxide concentration indoors. Healthy atmosphere relaxes the crew and prolongs electrical devices life. "EVO" ventilators 70231 and 70235 are made of polypropylene and 70234 and 70238 are made of ABS. They come in rectangular and square shape and they can be combined with connector 70239 for better performance.

Code	Dimensions (mm)	Material	Colour
70235	91.5x91.5x16.5	Polypropylene	White
70238		ABS	Chrome

Code	Dimensions (mm)	Material	Colour
70231	183x91,5x16,5	Polypropylene	White
70234		ABS	Chrome

Connector "EVO"

"EVO" connector is attached on ventilators to support the bulkhead of your boat. The advantage of this connector is its unique design, which prevents heavy water inflows in rough sailing. "EVO" connector is made of polypropylene and comes in white colour.

Code	Dimensions (mm)	Material	Colour
70239	80 x 80 x 65	Polypropylene	White

Nuova Rade

“24 hours” Vent

“24 hours” vent is completely automatic as it works with solar energy in sunny days and batteries, during night time. Forced ventilation is controlled through a dynamic impeller which turns clockwise to inflow and counter clockwise to exhaust air. The user adjusts the vent on the corresponding function through on/off switches. Active air movement absorbs moisture and refreshes the interior of your boat completely. Simultaneously, when water enters the vent special balls inside, it blocks its entry to achieve absolute impermeability. “24 hours” vents are made of white plastic. The vent 99689 is equipped with Inox plated cover.

Battery

Rechargeable battery, charged automatically by the solar panel. Activation with on/off switches.

PCB

Three functions PCB to activate solar function, activate battery function and modify fan function from clockwise to counter clockwise turn.

Solar panel

Operates with Solar Energy. Activation with on/off switches

Impermeability

Water pushes the special balls inside the vent to shut ventilation holes and ensure absolute impermeability

Code	Diameter (cm)	Cut Area (cm)	Cover
99688	20	9,5	White
99689			Inox Plated

Solar Vent

Solar vents provide mechanical ventilation utilizing the solar energy. The solar panel activates the fan which allows the air to flow in. These autonomous vents detect water flows from waves and rain, while refreshing the atmosphere even on those calm windless days. Special balls inside the vents are pushed by the water to shut ventilation holes and ensure impermeability. They have two functions; one function activates solar function and the other one modifies fan’s function from clockwise to counter clockwise turn. Solar vents are made of white plastic, while the 98681 vent is equipped with an Inox plated cover.

Solar panel

Operates with Solar Energy. Activation with on/off switches

Code	Diameter (cm)	Cut Area (cm)	Cover
98680	20	9,5	White
98681			Inox Plated

Cabin Vent

Cabin vents offer natural ventilation indoors and prevent water leaks from waves and rain. They open and close manually. When open, air is circulated and water stays out of your boat. Cabin vents are made of plastic. The vent 98621 is equipped with Inox plated cover.

Impermeability

Water pushes the special balls inside the vent to shut ventilation holes and ensure absolute impermeability

Electrical Equipment

From the simplest to the most complex electrical installation on a boat, a proper study on how to make the connections with efficiency and safety is essential. Why not taking advantage of the renewable energy by using solar panels to maintain and charge the batteries? You can also use AquaLED lights with lower consumption yet better lighting!
At MARINA Stores, you can find top-quality products for all your needs on board, so that every trip gives you unique moments of relaxation and tranquility, whether you are anchored in the marina or at your favourite beach!

MICRO LED

MICRO LED Pole Light

According to the COLREG 72, all pole lights should be placed higher than sidelights. Thus, it is easier for other boats to calculate their position in relation to your position and direction. Furthermore, a light positioned lower maybe obscured by other objects or people. LALIZAS MICRO LED range of Pole Lights includes folding and plug in options, meeting all possible requirements by demanding boaters. This innovative and elegant type of pole lights may be used on boats less than 12m as a white all-round stern light.

Material: Made of anodised aluminium tubing with polycarbonate lens and a glass reinforced nylon base.

Housing: Available in grey and black housing.

Visible distance: 1nm : 12/24V & 0.25W.

Installation: Pole lights are positioned in such a way that they are higher than the sidelights and may be screwed into position. Depending on the model, you can adjust the height of the light. Two lengths of LALIZAS Pole Lights are available: 25 & 60cm.

MICRO LED

new

MICRO LED 12 Starboard & Port Lights 112,5°, Side & Flush mounted, Set

MICRO LED series includes the smallest but brightest navigation lights to indicate your position & keep you safe on the water. With elegant design and easy installation with just one hole, these lights provide the smallest possible "footprint" that a navigation light can leave on a boat. Their housing come in three different colours (white, black and chrome). There are two different options in terms of fastening (with screws or with silicone).

- Side & flush mounted
- Modern design
- Waterproof
- Non-corrosive
- Non-magnetic
- Easy installation
- CE certified

Characteristics:
- Material: White ASA housing & shatterproof PC lens
- Visible distance (Starboard – Port): 1 nm
- Power consumption: 0.25 W, on 12/24 V

Included:
Self-adhesive EVA flange & Wire length 150 mm & *Screws-DIN7982 ST2 9x13 (*for mounting with holes).

Installation:
MICRO LED Lights are a unique design within LALIZAS range of side & flush mounted navigation lights. They can be easily positioned into the boat's bow with just one hole. Depending on the product code, they can be fastened either with silicone or with screws, without leaving any sharp edges to spoil the boat's lines or cause injuries.

MARINA Stores

LALIZAS

Meet the requirements for:
COLREG 72 / MSC 253(83) / IEC 60945:2002 / EN 14744:2005 / ABYC A-16.1997 / IP67 & **USCG Approval**

FOS LED series of navigation lights are designed to save power consumption on board and offer reliability, efficiency and optimal visibility at sea. This series of LED navigation lights is suitable for boats up to 20m (depending on the product code) for enhanced safety. LED technology provides supreme efficiency with up to 80% less power consumption compared to conventional bulbs. Their completely sealed unit ensures durability and safety.

Meet the requirements for: COLREG 72 / MSC 253(83) / EN 14744:2005

Classic LED series of navigation lights are designed for boats up 20m (depending on the product code). Made of tough UV stabilized ABS polycarbonate compound with shatter-proof acrylic lens, stainless steel electrical contacts and nitrile water resistant seal to provide reliable long-life. All CLASSIC LED are supplied with encapsulated in silicon 12/24V LED bulb to ensure maximum energy saving, protection against humidity and a long lifetime of 50.000 hours.

For boats up to 12m

Standard Navigation Lights

EMERGENCY Navigation Lights

EMERGENCY waterproof navigation lights are ideal for use on small crafts, inflatable boats, kayaks, or as emergency lighting in larger boats.
All portable emergency lights can be used when conventional lights are not suitable for the vessel or when they are not operating. They are available with external light reflectors. Standard alkaline batteries (D cell) are needed (not included), giving approx. 9 hours of continuous use.

Pole Light

According to the COLREG 72, all pole lights should be placed higher than the sidelights. Thus, it is easier for other boats to calculate their position in relation to your position and direction. Furthermore, a light positioned lower maybe obscured by other objects or people. LALIZAS range of Pole Lights includes telescopic, folding and plug in options, thus meeting all requirements. This type of pole lights may be used on sailing boats less than 20m (tri-colour) or on powerboats less than 12m (white), instead of small all-round lights. **Material:** Made of marine grade stainless steel 304 tubing with ABS plastic, polycarbonate lens and nitrite O ring sealed light and a fibre nylon mix base. **Housing:** Available in black and white. **Installation:** Pole lights are positioned in such a way that they are higher than the sidelights and may be screwed into position. Depending on the model, you can adjust the height of the light. Five lengths of LALIZAS Pole Lights are available in five different lengths which vary between 23cm and 130cm. **Visible distance:** 2nm. **Bulb** (included): 12V / 10W.

FAROS 7

FAROS 7 series of navigation lights include masthead, starboard, port and stern lights, ideal for powerboats up to 7m. They are waterproof, non-corrosive and non-magnetic. **Material:** Made of nylon fiber mix housing and shatterproof plexiglass (PMMA) lens. **Housing:** Available in black housing. **Seal:** Nitrile water resistant. **Installation:** Side & deck mounted. They are mounted on the surfaces with wall plugs. Navigation lights with wall plug have the advantage that they are much easier to mount and you only need to open one hole. This range is provided with a two sided adhesive tape and flange, which by sticking it on the surface you know exactly where to open the hole and the flange is already in the correct place. **Visible distance:** Port - Starboard – Bi-colour: 1nm / Stern - Masthead: 2nm. **Contacts:** Brass. Bulb (included): 12V / 5W

MATI 7

MATI 7 series of navigation lights are designed for powerboats up to 7m length. They are waterproof, non-corrosive and non-magnetic. **Material:** Nylon fiber mix housing. Shatterproof Plexiglas (PMMA) lens. **Housing:** Available in black, white and chrome housing. **Seal:** Nitrile water resistant. **Installation:** MATI 7 lights have a unique design within the LALIZAS range of side mounted navigation lights. Their special design enables them to be neatly mounted on the boat with safety and without compromising on appearance. They are fitted into the boat's bow, without leaving any sharp edges to either spoil the boat's lines or cause any injuries. They are provided with a two sided adhesive tape and flange, which by sticking it on the surface you know exactly where to open the hole and the flange is already in the correct place. **Visible distance:** Port - Starboard: 1nm / Stern: 2nm. Contacts: Brass. **Bulb** (included): 12V / 5W.

POWER 7

POWER 7 series of power boat navigation lights is compact and streamlined to follow comfortably the fit of most boats. **Material:** The lenses are made of tough polycarbonate with nylon fibre mix housing and stainless internal components for added strength. **Housing:** Available in black and white housing. **Installation:** Bi-colour and masthead lights are available for side and deck mounting. They are fixed through the base with two or more screws, and the housing is clipped on. Their round shape is less likely to snag with other fittings or ropes. Visible distance: Port - Starboard – Bi-colour: 1nm / Stern - Masthead: 2nm. **Contacts:** Brass. **Bulb** (included): 12V / 10W.

JUNIOR 7 All-round Lights

These all-round pedestal lights are designed for sailboats up to 7m. These lights are much smaller in size without compromising in elegant design and efficient operating function. The pedestal fitting gives a firm attachment to the boat. Durability and longevity are ensured through the high quality manufacturing standards of LALIZAS. **Visible distance:** 2nm. **Bulb** (included): 12V/5W.

Switch Panel Base, with Switch & Fuse, Black

The Switch Panel Base is made of hard plastic and is designed to fit in small and medium size boats. Switches on the panel include LED lights (31391), to indicate that the electrical devices on your boat receive electricity. The switches are covered with a plastic, waterproof cover to protect them from UV radiation, water and salt. Fuse holders (31392) on the panel hold 6,3A fuses and have a maximum loading of 10A. The fuses are made of polymer PTC, which stops electricity-flows in case of a short circuit. The switch panel base is combined with the frames 70581, 70584 & 70587 to meet your needs for 3, 6 or 9 switches on the central panel of your boat. It is supplied with functional labels, which indicate the type of device that each switch controls.

Additional features:
- On-Off switches
- For use only in 12/24V DC
- Maximum loading 10A
- Completely wired and ready to install

Pump Switch, Inox 316

LALIZAS Pump Switch allows you to operate your boat's bilge pump automatically, manually or even switch it off. It is water-resistant, with indication light so that you know when the device is operating. ade of Inox 316 for durability and lifetime protection against corrosion. It is available in charcoal colour.

INOX 316

2 YEARS GUARANTEE

Additional features
- Auto-Off-Manual switch
- For use only in 12/24V. Max. load per switch: 15A
- Coated with electrostatic paint
- Completely wired and ready to install
- 2 year warranty

"SP Ultra" Switch Panel, Inox 316

LALIZAS Switch Panels "SP Ultra" have been especially designed for use on small and medium sized boats. They allow you to control any desired device, such as bilge pumps, navigation or cabin lights etc. at the touch of a button. They feature waterproof switches for the protection against water. Made of brushed Inox 316 for durability and resistance to corrosion and harsh conditions. They are available in five models with 3, 4, 6, 9 and 12 switches and in two colours (as per table).

Additional features:
- On-Off switches
- For use only in 12/24V DC. Max. load per switch: 10A
- Panels in charcoal colour are coated with electrostatic paint
- Completely wired and ready to install
- 3 year warranty

Self-adhesive Transparent Function Labels for 99726, 99728-30, Set of 25pcs

Code | 71208

Self-adhesive Function Labels for Switch Panels, Set of 24pcs

These labels are ideal for use with LALIZAS Switch Panels "SP" and "SP Ultra". They are very simple to mount, easy to read and they are made to withstand long-term use. Each set includes 24 labels.

Code | 11497

Instructions of use
First clean the surface with pure alcohol. Remove the back paper of the label. Attach the latter to the cleaned surface by slightly pressing it. During wintertime, first warm up the top of the labels using a hairdryer, before applying.

Switch Panel with Conventional Switches

"LPS 4" has been designed for the complete control of various electrical devices of the boat from one position. It is a four-switch panel, available in four combinations of switches (ON-OFF, ON-OFF-ON, MON-OFF-MON) and can be combined with more panels of the same kind to cover as many operations as needed. LED lights, resettable PTC fuses are some of the most important features that will make the difference on board. Electrical and electronic circuits of the panel are completely sealed off by means of silicon cables and a durable plastic internal cover. "LPS-4" is made of Nylon 6 plastic and does not need any maintenance under normal conditions of use.

Additional features:

- Durable, UV - water - salt resistant, conventional switches protected by high quality neoprene rubber boots
- Solid state resettable PTC fuses that, on over-current, change to a high resistance device
- Covered bolts and screws
- Various combinations of switches (ON-OFF, ON-OFF-ON, MON-OFF-MON)
- LED Lights indicate operating devices

Available in black colour.

Nuova Rade

Case for Electrical Control Panel, with Lid, White

Nuova Rade Case for Electrical Control Panel with Lid is ideal for every sailboat or yacht. Available in dimensions of 275 x 375 x 75 mm and in white colour, it can cover the needs of boats of any size. It is ideal for storing the boat's electrical control panel. Made of UV-resistant high-grade ASA plastic, it provides resistance to damage and chemical solvents. Preferably designed for internal use. UV-resistant cover, frame and container with a 150° opening door and a durable handle. It is specially designed with a non-skid surface and can be mounted vertically. This case is mounted with hidden screws for discrete appearance. EPDM rubber gasket provides resistance to water. It guarantees easy opening and easy access when needed.

Solar Panels’ General Use

Code	Watt	Use
70904	5	Ideal for the maintenance and/or charging of small batteries (mobile, laptop etc.). It can also be used for trickle charging (maintenance) of the batteries so as to be ready for use at all times.
70905	10	
70905	10	Ideal for the maintenance of one or two batteries on the boat. Suitable for charging portable electronic devices & for the maintenance of small or medium size batteries, so as to keep them charged during the boat’s winterization.
99210	15	
70906	20	Ideal solution for the maintenance and charging of one or two medium capacity batteries on the boat, used for all the applications. Batteries’ protection during the boat’s winterizing.
99211	30	
99212	50	
99212	50	Suitable for charging big capacity batteries used for all the applications on the boat. Ideal for charging the batteries used for a small cabin’s electricity, the boat’s fishing tools, etc.
99213	75	
99213	75	Suitable for charging batteries of big capacity used for all the applications on the boat. Ideal for charging the batteries used for the cabin’s electricity, the continuous function of the refrigerator, the heating, etc.
99214	100	

Note: The solar panels mentioned in this table can either be installed separately or as an array (in a row) of two or more panels, according to the boat’s electricity needs and batteries’ capacity.

Solar Charge Controller, 12/24V

General Characteristics
- Automatic lighting control function
- Ideal for areas with increased humidity, such as boats, outdoor pathway lighting, parking areas etc.
- Suitable for 12/24V lamps
- Selection of the battery type (AGM, Flood & Gel)
- Waterproof (IP67)
- 100% protection against humidity

Technical Specifications

-Type of charging: 4 stages PWM charging (Bulk – PWM – Boost – Float)
- Rated solar input: 10A
- Rated load: 10A
- Regulation voltage: 14.4V
- Load disconnect: 11.08V
- Load reconnect: 12.58V
- Self-consumption: Max. 6mA
- Temperature: -35 to +55
- Terminals: For 2.5mm cables
- Protection against short circuit, over current, overload, reverse polarity, battery reverse current at night, high load voltage
- LED indications for charging, battery levels, low voltage, disconnect, etc.
- Weight: 250gr
- Dimensions: 140x70mm

Modified Sine Wave Inverter

A power inverter is an electronic device that converts low voltage 10-15V DC (direct current) battery power to 220 - 230V AC (alternating current) household power, when shore power is not available. Power inverters are ideal for trips with the boat or car to power laptops, cell phones and many other appliances. There is protection against overload, over temperature and low battery conditions, with the automatic shutdown of the power inverter. A cigarette lighter plug is included. Available in 150W, 300W, 500W & 1000W.

Code	31373	31374	31375	31376

- External dimensions (LxWxH) = 470x225x255mm
- Internal dimensions / Maximum battery size (LxWxH) = 385x175x225mm
- Can hold battery up to 385mm long, of various group sizes (e.g. 27, 49, 93 and others).
- Customizable length: Includes separator that divides the box into partitions, ranging from 50 to 330mm long.
- Mounting equipment: Includes durable hold-down fastening strap and foot clamps that secure the strap onto the supporting surface (screws not included)
- Restrains battery movement
- Collects battery acid
- Made of polypropylene
- Acid, UV and heat resistant
- Side handles to facilitate transportation
- Lift-off lid for unobstructed inspection
- Cable ports for untangled, safe cables

Code | 17518

Tips to choose the best fit for your battery

- Ideally, choose the internal dimensions to be equal or slightly larger than your battery
- Use a spacer where it is needed to prevent the battery from moving within the box
- Remember to include the height of the terminals while measuring the battery

Two-way Speakers, 100W, 6 1/2", Non-magnetic, with Clip-on Cover, White, Set

Ideal for use in boats, the Two-way Speakers are waterproof and corrosion-resistant while they can be hosed down when the boat is being cleaned. Having non-magnetic design, they don't disturb instruments or compasses and their ASA cover provides improved endurance in both sea and sun exposure. They also feature waterproof and corrosion-resistant mica injection cone with TPU edge and corrosion-resistant silicone coated terminal wire. Can be mounted either horizontally or vertically. Suitable for indoor and outdoor use. Available in white colour. CE approved.

Technical Specifications:
-Impedance: 4 Ohm
-Sensitivity: 90 dB
-Frequency Response 60-18000 Hz
-Max Power 100W (per pair)
-RMS Power 80W (per pair)

Mounting Dimensions:
-Depth: 64mm
-Hole diameter: 136mm
-Magnet: 350g (8oz + 4.3oz)

2 Way Speaker Set

With Nuova Rade Speakers installed in your boat, you can relax or party - listening to your favourite music. Ideal for use in boats, since they are water (31302 & 31303) and corrosion proof. The 2-way speakers may be mounted both indoors and outdoors.

MAGMA

Gas Barbecue “Marine Kettle 2”, Inox

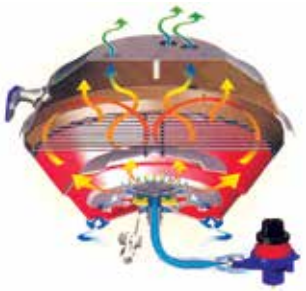
“Marine Kettle 2” Gas barbecue will be your offshore perfect mate for on-board and on-shore delight. You can use it as a grill, stove or oven due to its stainless steel diamond shape. Heat is distributed evenly within “Marine Kettle 2”, grilling food smoothly. Additionally the notated, radiant plate underneath the barbecue, makes it resistant to bad weather conditions. There is a control valve regulator on the right side of the barbecue, where you can connect the gas canister (70134) or the propane/butane of your boat. However, you will need a low-pressure control valve (70116) to connect the main propane/butane system of your boat with the barbecue. What is special about “Marine Kettle 2” is its windproof turbo venturi system, directly lucked to the control valve regulator, which eliminates any gas leakage. Pressing the red start up button on the front of the barbecue “Marine Kettle 2” is activated, whereas the control valve regulator adjusts temperature. The rack of “Marine Kettle 2” lies on a burning bell shaped plate shielded by an outer cover. The gap between the two parts isolates heating within the barbecue area keeping its outside surface warm. The cool handle of the barbecue allows you to supervise cooking, at all times “Marine Kettle 2” complete disassembly allows quick and easy cleaning. This barbecue rests on particular mounts either on the rails of your boat (70123, 70124 or 70125) or on flat surfaces onshore is activated (70126).

CE

Code	Diameter
70113	381mm (15”)

Gas Barbecue “Marine Kettle” , Inox

“Marine Kettle” gas barbeque is an economic solution for your sailing and/or coastal pursuit. It is both a grill and a stove appropriate for windy climate conditions. The diamond shape of the barbecue allows equal heat distribution the entire grilling area, broiling food smoothly, while the radiant cover above burner sends grease aside. Under the stainless steel barbecue cabinet lays a revolving metal plate, which reduces wind effects. There is a cool handle on the lid of “Marine Kettle”, which allows you to supervise food while grilling. The proper fuel for “Marine Kettle” is either a gas canister (70134) or the main propane/butane flow of your boat. Alternatively, it could be directly connected to the control valve regulator on the right side of the barbecue. For propane/butane fuel you need to use a low-pressure control valve (70116) to achieve connection with the barbecue. Control valve regulator activates “Marine Kettle” and adjusts its temperature. You can arrange fuel distance from the barbecue and eliminate gas blowouts through the wind turbo venturi system, which is between the barbecue cabinet and the control valve regulator. “Marine Kettle” complete disassembly is simple to enable fast cleaning. This barbecue could be placed on the rail of your boat or on shore using mounts 70123, 70124, 70125 or 70126 respectively.



CE

Code	Diameter
70114	381mm (15”)

Gas Barbecue “ChefsMate” with 1 Pack, Inox

“ChefsMate” barbecue appeals to on-board and on-shore adventure. It comes with portable base, which is ideal for use onshore, whileyou can use base 70120 or 70121 for mounting the barbecue on the rails. The latter is sold separately from the barbecue. “ChefsMate” is made of brilliant stainless steel with tight fastened lid and funnel bottom shape. Thus, food is grilled smoothly over its single rack. “ChefsMate” functions either with gas canister (70134) or with the main propane/butane flow of your boat. Both the gas canister and the propane/butane flow are adjusted to the control valve regulator, on the right side of the barbecue, in order to start the barbecue up or adjust its heat. Should you prefer to use the propane/butane system of your boat, you will need to use an extra low-pressure control valve (70116). The rack can be easily removed for an easier cleaning of the “ChefsMate”.

MAGMA

Charcoal Grill, ''Marine Kettle'', Inox

The time tested original charcoal Marine Kettle® grill now has a hinged lid. Made in the U.S.A., it is meticulously crafted of 100% 18-8 mirror polished stainless steel for maximum corrosion resistance. Its rotating design allows you to determine which direction you would like the lid to open when grilling in windy conditions. You obtain perfect results through use of the adjustable height cooking grill and the variable temperature control draft door assembly. The Marine Kettle® design allows oven type baking to enhance the grill flavor while retaining the natural juices of the food. It will cook more food faster, on less grill area, than any other charcoal grill. Safety and efficiency are obtained by closing the draft door and extinguishing the coals for future use.

Store-All Trash Bag Holder

Keep your cockpit and cabin tidy and clean. This holder can be easily mounted on any flat and even surface, with the use of the support base for rails or level surfaces (99824-7), so that you can store it easily and quickly. Its cover prevents the contents from falling out of the bag. You may use common supermarket bags or kitchen trash bags. Available in white colour.

Code	94146

OCEAN

Clip-on CAN HOLDER

This is a unique and useful accessory, ideal for holding and keeping cool cans, small bottles, and glasses. It is one-piece made and there is no need for extra parts. It preserves the temperature levels of the mounted object. It can also be used as an object holder for mobile phones, eye - glasses, portable VHF and GPS, etc. It is made of Flexible Integral PU Skin Foam technology and can be clipped on all guardrails, pulpit and stanchion, making it an essential accessory on board.

ALVEA Drinks Tray

ALVEA is a unique and useful glass and bottle tray, made of Flexible Integral PU Skin Foam technology and non-slip material. Thanks to the moulded design, the cups - either plastic or glass - are held firmly even when they are empty or during strong winds, making ALVEA an essential accessory on board. In addition, it keeps the table tidy and it's easy to clean, by using only soap and water.

Nuova Rade

new

Two-way Speakers, 100W, 6 1/2", Non-magnetic, with Clip-on Cover, White, Set

Ideal for use in boats, the Two-way Speakers are waterproof and corrosion-resistant while they can be hosed down when the boat is being cleaned. Having non-magnetic design, they don't disturb instruments or compasses and their ASA cover provides improved endurance in both sea and sun exposure. They also feature waterproof and corrosion-resistant mica injection cone with TPU edge and corrosion-resistant silicone coated terminal wire. Can be mounted either horizontally or vertically. Suitable for indoor and outdoor use. Available in white colour. CE approved.

Technical Specifications:
-Impedance: 4 Ohm
-Sensitivity: 90 dB
-Frequency Response 60-18000 Hz
-Max Power 100W (per pair)
-RMS Power 80W (per pair)

Mounting Dimensions:
-Depth: 64mm
-Hole diameter: 136mm
-Magnet: 350g (8oz + 4.3oz)

Code | **74576**

To remove the cover, turn it on the left

2 Way Speaker Set

With Nuova Rade Speakers installed in your boat, you can relax or party - listening to your favourite music. Ideal for use in boats, since they are water (31302 & 31303) and corrosion proof. The 2-way speakers may be mounted both indoors and outdoors.

Technical Specifications

31302
- 5 1/4" 2 Way Speaker Set 80W

Wetsuits

LALIZAS

Wetsuit Full Length Neoprene 3:2mm, Black

Full wetsuits are your winter sport garment for the sea. Your main body is covered with 3mm neoprene thickness, while your legs and arms are covered with 2mm neoprene thickness. Therefore, the neoprene suit keeps your body warm and offers you high degree of flexibility. Flatlocked seams, waterproof back zipper, adjustable neck and aqua stops at legs prevent water leaks and keep you warm. Wind resistance is provided to your chest and back, which are covered by an additional overlay of impermeable fabric. This wetsuit is equipped with special kneecaps and a hidden small pocket (at the back) for your keys.

Diver Buoy

It is ideal for diving with cylinders. It is easy for the diver to use, since it is especially designed so as to facilitate the diver's moves without jeopardizing his safety. The red buoy is folded and attached with a rope (6m) inside the blue case; the case has a sewn black plastic clip on, which offers the ability to the diver to fasten the buoy on his suit for easy carrying. Additionally, the case features a whistle to use in any emergency. The buoy is made of soft PVC, 0.3mm thick, while the case is made of 1000D Polyester with PVC film, 0.5mm thick.

Instructions of Use
Open the case and release the buoy. Use the cylinder to provide the buoy with a small quantity of air. In this way, the pressure of the air along with the pressure of the water will make the buoy to inflate and pop up on the water surface, warning the boats that a diver will soon float at the specific point.

Unbreakable Cases, Waterproof & Floating

These cases integrate simplicity & functionality in a minimal clear-top design, while being unbreakable and made of high-quality materials. No matter if you are in your boat, rock-fishing, sailing, performing outdoor excises, being on holidays or even in a business trip, Sea Shell cases will grant top safety for all your carry-on valuables, fishing gear, electronic devices as well as everything else you fit inside. Portable and very easy-to-use, these cases float in the water and are 100% water-resistant. They are also moisture-proof, dustproof (full seal vacuum design), keeping the content dry. Made of high strength compound materials and all-weather secure

"LIFETIME GUARANTEE"

LALIZAS

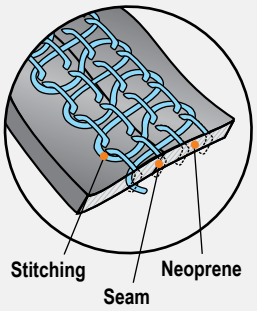
Wetsuit Full Length Neoprene 3:2mm, Black

Full wetsuits are your winter sport garment for the sea. Your main body is covered with 3mm neoprene thickness, while your legs and arms are covered with 2mm neoprene thickness. Therefore, the neoprene suit keeps your body warm and offers you high degree of flexibility. Flatlocked seams, waterproof back zipper, adjustable neck and aqua stops at legs prevent water leaks and keep you warm. Wind resistance is provided to your chest and back, which are covered by an additional overlay of impermeable fabric. This wetsuit is equipped with special kneecaps and a hidden small pocket (at the back) for your keys.



Flatlock Stitch

The flatlock stitch is suitable for wetsuits usually worn in warmer weather conditions, made of neoprene with maximum thickness of 3mm.

Two pieces of neoprene are butted against each other edge to edge and the stitching goes back and forth side-to-side, creating a very flat stitch (flatlock). You can very easily identify the flatlock stitch on the suit, by the thread on both sides of a wetsuit. Also, the flatlock stitch does not irritate the user's skin, as it would if the seam ran inside the suit.

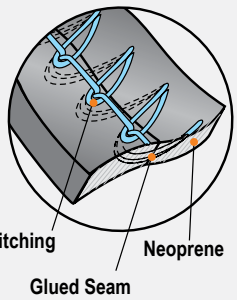
Boots

LALIZAS

Semi Dry Boots, 6mm

Neoprene boots protect your feet from cold waters. They are made of neoprene 6mm thick, to keep your body warm in cold waters. Blindstiched seams inside and outside the boots, waterproof zipper and a special neoprene cover behind the zipper to prevent water leaks. Boots completely embrace your feet with neoprene flexibility and the rubber reinforced toes and heels, which offer stable feet-holding, additional water resistance and protection from land or boat obstacles. Boots have thick rubber soles for better traction on all surfaces. The black rubber on the bottom of soles does not leave marks on your boat.



Blindstich

The blindstitch is the perfect solution for the construction of winter wetsuits, since it is a totally waterproof stitch. Two pieces of neoprene are butted against each other and stitched together, with the needle going only half way through the neoprene before going back out. In this way, there is no stitch on the outerr part of the wetsuit. The edges of the neoprene are also glued when they are butted together before stitching, for creating an even more waterproof seam. Lastly, the blindstitch does not irritate the skin of the user, as the seam does not run inside the suit.

10014	800 x 500	55	Red

The wide range of Lalizas' dry bags allows you freedom of choice according to your needs

To ensure maximum dryness roll the top of the bag down (closure system) at least three times

Clip the buckle in

When everything is ready, the bag may be carried or stored

Dry Bags Ténéré

The new heavy-duty dry bag Ténéré is an ideal choice for kayaking, canoeing and rafting lovers but also for every "sea man" as its improved three-roll watertight closure system ensures that all the contents stay clean and dry. This hot air welded dry bag is made of durable PVC Tarpulin 500D, 0.55mm thick, which makes it suitable for great load and heavy-duty activities. Ténéré is wipe-clean, easy to store and have a shoulder strap that makes it handy to carry on shore. Additionally, the 30Lt and 40Lt capacity models have an extra handle welded on the product. "Ténéré" bags are available in sand, red and yellow colour and in 6 different sizes.

Dry Bags for Handhelds

The ultimate dry bag for the protection of your handheld electronic equipment (GPS, VHF, mobile phone). Made of durable vinyl, it has clear front panel, which allows you to see displays and button logos and access most functions, without removing the bag. Furthermore, each dry bag has a lanyard loop. Depending on the air captured and the weight of the equipment inside, the bags may or may not float. Although Lalizas Dry Bags are made to withstand harsh conditions, it is suggested that you test for waterproofness regularly to detect any pinhole leaks.

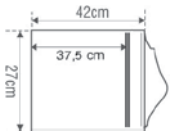
LALIZAS

Dry Briefcase

LALIZAS Dry Briefcase has been designed especially for the protection of your boat's documents. Made of durable vinyl, it has clear front panel, which allows you to see the contents of the bag. Furthermore each dry bag has a lanyard loop. The Dry Briefcase has the advantage of floating on the water, depending, however, on the air captured and the weight of the contents. It features a 100% waterproof seal with Velcro.

The ultimate protection for your boat's documents.

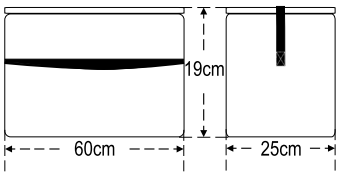


The dimensions shown are when the bag is empty.

Code | **10450**

Under Seat Storage Bag, Ténéré Sit & Store

The under seat storage bag provides you with the extra storage space that is so necessary on any boat. It is made of PVC Tarpulin and has been designed to fit to any seat. It also features a shoulder strap which allows you to carry the bag when you leave the boat. The top of the bag is padded to "soften the ride" on the wooden seat. It is water resistant, while the waterproof zipper keeps the storage area dry. It is available in grey colour.



Code | **70895**

Lifejackets Dry Bag

- Simple and easy-to-use Lifejackets Dry Bag
- The most "intelligent" and waterproof storage solution for all the necessary safety equipment of your boat
- Made of durable transparent material, without any unnecessary seams
- It meets the minimum space consumption requirements
- It offers the ability of immediate use in case of an emergency or a boat inspection
- Specially designed for storing foam lifejackets of 100N & 150N
- Can safely store all hand and smoke signals required by regulations, in the available space between the lifejackets' neck grooves

TR90 Sunglasses

The TR90 sunglasses line by LALIZAS has been created to satisfy the most demanding needs of yours. The TR 90 material used in the frames of the sunglasses makes them safer against the extreme temperatures and more durable to continuous and harsh use. Additionally, the lenses used are polarized and thus the glare and eyes strain are reduced substantially. The modern design, as well as, the specialized manufacturing, makes the sunglasses ideal for use in sports, but also in other activities which involve prolonged sun exposure.

Sunglasses, TR90, Polarized 1.10mm, Black

Sunglasses, TR90, Polarized 1.10mm, Black

Code | 71035

Sunglasses, TR90, Polarized 1.10mm, Grey

Code | 71036

TR90

The TR 90 material is a transparent polyamide with good heat resistance and excellent fatigue behaviour. It is lightweight, resistant to stress cracking and stands up well against UV exposure. That is why it is commonly used for the creation of sport and other impact-resistant eyewear frames. Additionally, due to the fact that it contains no plasticizer and resists cosmetic chemicals and perspiration, it offers a very good alternating bending strength and it can enhance the design and performance of sport and safety spectacle frames. It also exhibits low moisture absorption and dimensional stability, while its outstanding weathering stability, makes it particularly suitable for eyewear frames

UV Protection

The most important benefit that sunglasses should provide is protection from ultraviolet radiation (UV), which contributes to various eye diseases. Ultraviolet radiation has been linked to cataracts, benign growths on the eyes surface, cancer of the eyelid and of skin around the eyes and photokeratitis (snow blindness), a temporary but painful sunburn of the eye's surface. UV protection is the most important feature to take into consideration while looking for sunglasses. The FDA, the government agency that oversees sunglass manufacture and sales in the U.S., recommends that customers should look for sunglasses with lenses that block 99-100% of UVA and UVB radiation (100% is best) and therefore provide UV 400 or 100% UV protection.

"POLARIZED" Lens

The bright sunlight is reflected on many surfaces that surround us, such as water, snow, pavement, dust, buildings, ice, sand, wet road surfaces and windshields and resulting to an annoying glare for the eyes that reduce contrast and visual sharpness. The eyes cannot eliminate reflective glare independently. In order for the eyes to focus, they allow the access of even the slightest light and in this way various types of light "penetrate" the eyes, including the bright sunlight. The result is tired eyes, headaches, poor vision and sun damage to the eyes. Even if the eyes can't "apprehend" the UV rays, they should be of concern, because of their long term damaging effects on the eyes. Polarized lenses are designed to substantially reduce or even eliminate reflective glare by selectively absorbing the light waves travelling in all directions except the vertical plane. At the same time UV rays are blocked. Bear in mind that the only thing that regular lens without polarizing film does, is just to darken the eyesight without protecting the eyes. In other words, polarized lenses are ideal for anybody who wants to avoid glare and to improve their vision in the sunlight.

Thinners

EPIFANES Brush thinner for One-component Paint & Varnish

EPIFANES thinner for paint and varnish is a pure white spirit for thinning one-part paints and varnishes applied by brush. Just add some product in increments, always in accordance with the product instructions per case.

Code	99221	99222	99223
Package	500ml	1lt	5lt

Varnish

EPIFANES Poly-urethane Clear Gloss, 2 Components, with UV Filter

A high gloss, two-component, polyester saturated, aliphatic urethane finish with excellent outdoor durability. Contains UV filter. To be used on intact existing poly-urethane varnish systems, as a complete varnish system on bare dimensionally stable wood (i.e. marine plywood), as a build-up coat prior to a one-component varnish system, as a protective coat on epoxy resins or as an intermediate coat on epoxy resins when a one-component finish is desired. Suitable for fresh and salt water, for interior and exterior use. Mixing ratio is 2 parts of component A to one part of component B by weight. Each can is partially full. Pour the reactor (B) into the can of base (A) and stir thoroughly. Allow to activate for 20-30 minutes before use. Police after mixing 3-4 hours at 20° C. (70 o F). Temperature should be between 15° C and 27° C (60o - 80o F) during application. For brush/roller or spray application use the appropriate thinner. **Recoatable:** After 24 hours at 18oC (6oF) Coverage: 750gr is sufficient for 9sq. meters (100sq.feet)

Code	98782
Package	750gr

EPIFANES Rapidclear

Superior quality, semi-gloss wood finish based on modified alkyd/urethane resins and UV filters. It is a quick and easy alternative to conventional varnish, since it can provide excellent protection in all climates. It is ideal for long term protection and enhancement of all interior and exterior marine and household woods above the waterline. EPIFANES Rapidclear provides an enhancing UV protecting film. It bonds extremely well to teak and other oily woods, preventing discolouration and emphasises the natural grain of the wood. It can be used for renewing weathered areas, prior to a varnish or as a full system for those requiring a quick an easy semi-gloss finish with excellent breathing properties, flexibility, maximum durability, UV protection and longevity. Apply by brush, foam brush, roller or spray 3 to 4 coats. Three to four coats are sufficient to most conditions. Sanding between coats is not required. If top coated with varnish, sand with 220 grit dry abrasive paper. Easy touch up and maintenance.
Thinner: Brush application - Do not thin Spray application- Use the appropriate thinner
Recoatable: After 5-6 hours at 18°C (65°F)
Coverage: 750ml is sufficient for 10 sq.meters

Code	98787
Package	750ml

EPIFANES Woodfinish Gloss, High Gloss, with UV Filter

A clear, high gloss varnish-like finish with excellent adhesion to new teak and other oily woods. To be used on teakwood, iroko and as an alternative for continuous maintenance of wood oil systems, for interior and exterior work above the waterline in both fresh and salt water environments. When applied on non-oily wood that does not need to "breath", a minimum 8-10 coats are required. Not suitable for bankirai. For brush or spray application use the appropriate thinner.
Recoatable: After 24 hours at 18oC (65oF). No sanding required if recoated within 72hours
Coverage: One liter is sufficient for 12sq.meters (130sq.feet)

Code	98780
Package	1lt

EPIFANES Woodfinish, Matte

A clear satin finish for use over Epifanes Woodfinish Gloss (one component). It provides a beautiful, satin sheen for interior use. For brush or spray application use the appropriate thinner.
Recoatable: After 12 hours at 18°C (65°F)
Coverage: One liter is sufficient for 12sq.meters (130sq.feet)

Code	98781
Package	1lt

EPIFANES Clear Varnish, High Gloss

A clear, high gloss, traditional one-component varnish, based on tung oil, phenol and alkyd resin with excellent outdoor durability, containing an ultra violet filter protecting the wood against discolouration. For use on bare wood, inside and outside above the waterline. For brush or spray application use the appropriate thinner.
Recoatable: After 24 hours at 18°C (65°F)
Coverage: One liter is sufficient for 14sq.meters (150sq.feet)

Code	98772	98773	98774	98775
Package	250ml	500ml	1lt	5lt

EPIFANES Rubbed Effect Varnish, Poly-urethane Resin

A quick drying, clear, one-component, interior satin finish, based on a polyurethane/alkyd resin. It gives superior protection against alcohol and other aggressive household chemicals. Apply as a finish coat over several build-up coats of EPIFANES Clear Gloss Varnish. For brush or spray application use the appropriate thinner.
Recoatable: After 12 hours at 18°C (65°F) **Coverage:** One liter is sufficient for 13sq.meters (140sq.feet).

Code	98776	98777
Package	500ml	1lt

EPIFANES Teak Oil Sealer

An impregnating oil based on linseed oil and alkyd resin. It protects teakwood from discolouration by weather or pollutants. It is ideal for the maintenance of teak decks. Film build-up must be avoided. Apply with a wide brush or lint free cloth. Use the appropriate thinner.
Recoatable: Wet-on-wet
Coverage: 8-10sq.meters (85-100sq.feet)

Code	98786
Package	1lt

TEAK WONDER Teak Dressing Sealer (Silicone Sealer)

It keeps the splendid golden appearance without having to wash the teak every day with fresh water. By applying this silicon based product, you seal the pores of the wood, preventing the penetration of the dust and dirt that darken it, and also protecting the natural teak oils against the ultraviolet rays that oxidise and discolour them. The dressing also prevents liquids such as diesel, oil, fish blood, and paints from penetrating the wood, making subsequent cleaning easier. They don't smell, don't become shiny or slippery, don't stick, dry rapidly and do not make or build up the surface.

Code	98863	98864
Package	1lt	4lt

TEAK WONDER Teak Cleaner & Brightener

By applying the two products contained in each bottle one after the other, you wash away the grey colour that has accumulated in the wood, rediscovering the splendid golden of the teak. All in a few minutes and without removing millimeters of precious wood from the deck, as occurs during sanding. Neither of these two liquids is aggressive or caustic and therefore does not damage rubber, paint or stainless steel fittings.

11549	50mm x 5m	Silver
11550	50mm x 50m	Black

General Use Tapes

Mounting Tape, White

Nailing on the boat is over with the double-sided adhesive tape. It is suitable for mounting pictures or any other decoration on most types of dry and smooth surfaces, you don't need nails when decorating your boat.

Code	Dimensions
11850	2mm x18mm x 1.6m

Instructions of Use

Use 10cm (4") of tape for every 227gr of the item to be mounted. The tape is suitable for objects with maximum weight up to 900gr.

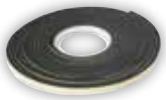
1. Cut the tape at the necessary length. Do not remove the protective liner.
2. Press the tape on the back of the object to be mounted. Press firmly on the liner for a better outcome.
3. Remove the liner and press firmly the object on the wall.

Note: If you wish to remove the mounted object, insert a knife behind the mounted object and cut the tape between the two surfaces. Don't pull the object, in order to avoid damaging the surface or the object.

Vinyl Foam Thermal & Sound Insulating Tape, Black

The thermal & sound insulating tape is suitable for the pipeline freezing resistance, insulation and decoration. Generally, it is used whenever a specific area or place needs to be insulated in order to be protected by the variations of temperature or even to protect the people on board by undesirable sounds. It can also be used between the hull and the sole boards, so as to minimize the squeaking noises. It is available in 2 different sizes.

Code	Dimensions
11854	50mm x 5m
11855	25mm x 5m



Marine Neoprene Tape Hatchseal, Black

Self-adhesive neoprene tape with thermal & insulation properties. It also prevents sound, dust and insects. Easily fitted into doors, lazarettes, spotlights, and wherever you wish to use it. Useful accessory that eliminates heat loss in the winter and stops cool air currents from escaping in the summer. Available in two dimensions.

Code	Dimensions
11551	3m x 19mm x 3mm
11552	3m x 19mm x 6mm

IOSSO Gel Coat Restorer Quick Gloss K1

Removes water spots, rust and strong dirt from hard plastic/ polyester and gel coat surfaces. Restores shine and smoothness to the applied surface. Use by hand or with a buffing wheel. Also suitable for painted surfaces and transparent plastics (plexiglass, PVC, etc.).

Code	71116
Package	500 ml

IOSSO Fiberglass & Metal Polishing Cream

This easy-to-use polishing cleaner removes oxidation, tarnish, surface rust, and leaves a brilliant shiny protective coating instead. Recommended for use on all metals, plexiglas, hard plastics and painted surfaces. Can be applied in gel coat as well. It restores the colour to the frosted fiberglass surfaces and protects the applied area for months. After application no wax is required. You can use it on plexiglass and painted surfaces, but also to remove dulls, surface dust and oxidation from metals such as chromium, aluminium, magnesium, stainless steel, bronze and copper.

Code	71115
Package	250 ml

IOSSO Clear Plastic Restorer Glitter

Fiberglass & Plastic Cleaner/Reconditioner. Cleans plexiglas and hard plastic/ polyester surfaces and eliminates thin scratches. Applied only with a buffing wheel. Also suitable for glass and transparent surfaces.

Code	71117
Package	250 ml

IOSSO Multi Use Polishing Cream, 50 ml

Professional non-abrasive polishing product; cleans, protects and polishes the surfaces. Gives again colour to stained fibrous glass surfaces, preserving them for a long time. Removes all types of oxidation, tar and surface rust dirt. Ideal for fibrous glass (gel coat), plexiglass, epoxy painted, metallic (stainless steel, aluminium, copper, brass), chromium plated and magnesium alloys surfaces. It does not request any further polishing actions. For professional use only.

Code | **71728**

Available only in certain countries

BARDHAL Diesel Fuel Injector Cleaner

A professional cleaner for the maintenance of diesel fuel injectors. It keeps the efficiency of the injection system, reduces fuel consumption and the maintenance costs.
- Cleaning and protection of the entire supply system (sprayers, pumps, valves, & chamber)
- Avoids instability at minimum speeds
- Prevents disruption of sprayers & pumps
- Refers to the efficiency of sprayers, ensuring optimum spraying of oil reduces fouling
- Reduces pollution & noise

Code	71139
Package	300 ml

IOSSO Bilge Cleaner Custom

A concentrated and bio-degradable cleaner for bilges, engine rooms, garages, and similar use. Dissolves oils, grease, gasoline, and similar remains. Can be used as it is, or slightly-diluted with water.

Code	71121	71122
Package	1lt	4lt

IOSSO Sea Weeds Remover Decap-Out

Waterline & hulls sea-weeds remover. Antivegetative descaler for non-metal hulls, keels & tubes. Removes quickly any short of limes, lime stones, barnacles, sea-weeds and dirt. Suitable also for bathrooms, toilets, tiles and ceramic surfaces. Unsuitable for metal appliance.

Code	71123
Package	1lt

Available only in certain countries

IOSSO Foamy Metal Cleaner

Universal cleaner, suitable for a wide range of metals, such as stainless steel, copper, brass, silver, gold. Removes superficial oxidations (rust) from hard surfaces and keeps metal bright & shiny.

Code	71126
Package	750 ml

IOSSO Powerful Cleaner for Inflatable Boats & General Use 123 Via

A powerful cleaner for inflatable boats and general marine use. Removes the remains of petrochemicals, sunscreen, creams, ink, bird droppings and restores the original shine of the buoy. Apply without adding water.

Code	71118
Package	750 ml

IOSSO Concentrated Powerful Detergent Magic Cleaner

A concentrated & multi-use cleaner for all surfaces, such as wood, plastic, polyester, and even sails. An Eco-friendly biological product, without chlorine that can be diluted with sea water as well.

Code	71124	71125
Package	1lt	4lt

Fender cleaner and restorer CLIN AZUR

Functions:
- Cleans and removes salt, dirt and black stains.

Features:
- Based on vegetal solvants.
- Excellent results without altering the rubber.

Package	1 lit

Sails & canvas cleaner CLIN AZUR

Functions:
- Cleans heavy fabric types like sails, awnings, ...

Features:
- Concentrated formulation.
- Low foaming and very effective.

Package	1 lit

Stainless steel polish paste 100ml CLIN AZUR

Functions:
- Shines and protects chrome, stainless steel and copper.
- Deoxidizes.
- Erase surface scratches.

220 Chrome & stainless steel polish, 250ml

Features:
- Acts like a liquid rubber.

CLIN AZUR

Available only in certain countries

Teak Cleaner CLIN AZUR

Functions:
- Deep cleans teak and exotic woods.
- Removes the tasks and degreased.

Features:
- Alkaline detergent.
- Safe for fibers and joints.
- Prepares teak in step 2 (Clin'Azur 201).

Package | 1 lt | 5 lt

Teak Brightener CLIN AZUR

Functions:
- Renovates and brightens teak.
- Brings a radiant sandy color.

Features:
- Acide solution.
- Use after Clinazur 200 Teak cleaner.

Package | 1 lt | 5 lt

Rust streaks remover CLIN AZUR

Functions:
- Deoxidized and removes rust stains.
- Removes yellow stain.
- Do not damage the gelcoat.

Features:
- Work on plastics, gelcoat, painted surfaces and metal

Package | 1 lt

Professional multi-purpose cleaner, CLIN AZUR

Functions:
- Cleans.
- Degrease.
- Perfume.
- Multi-purpose.

Features:
- Work for engines, bilges, floors, rims, coachworks, plastic or painted surfaces, enamel, stainless steel, etc.
- Leave a pleasant sea scent.
- Ready to use.

Package | 700 ml

Water proofing for fabrics 500ml CLIN AZUR

Functions:
- Protects and treats fabrics.
- Treats the fibre's heart.
- Available for fabrics, clothes etc.

Features:
- Long time action.
- Ready to use.

Package | 500 ml

Leather nutrient cream CLIN AZUR

Functions:
- Cleans, nourishes and protects leathers and vinyls.
- Prevents drying and premature aging.

Features:
- Stabilized and neutral nutrient cream.
- Pleasant scent.
- Works on all kinds of leather even the soft ones.

Package | 500 ml

Black streaks remover 1lit. CLIN AZUR

Functions:
- Cleans.
- Degrease.
- Perfume.
- Multi-purpose.

Features:
- Work for engines, bilges, floors, rims, coachworks, plastic or painted surfaces, enamel, stainless steel, etc.
- Leave a pleasant sea scent.

Package | 1 lit

Non skid deck cleaner CLIN AZUR

Functions:
- Cleans and removes salt, dirt and crime.
- For all non skid deck, covers and vinyl.

Features:
- Concentrated formulation.

Package | 1 lt | 5 lt

Polish with reflon, 500ml, CLIN AZUR

Functions:
- High shine finish.
- Long Lasting Protection.

Package | 500 ml

Inflatable boats cleaner CLIN AZUR

Functions:
- Cleans and removes salt, dirt, grime and black stains.

Features:
- Availabe for all kind of tenders.

Package | 1 lt | 5 lt

240 Sredstvo za čišćenje aluminija 1lit

Functions:
- Restores and deoxidizes tarnished anodized aluminium.
- Instant action without efforts.

Features:
- For anodized alumnium only.

Package | 1 lt

Rust converter 250ml CLIN AZUR

Functions:
- Neutralizes rust.
- Converts the rust in a protective barrier on all ferrous metals.
- Ideal as a primer before painting.

Package | 250 ml | 1 lit

Bio. treatment chemical toilets, CLIN AZUR

Package | 1 lit

Functions:
- Accelerate the biodegradation of organic wastes.
- Removes bad smells.

Features:
- Bioenzymatic action.
- Non toxic and non caustic.
- Leave a sweet cheery scent.

Boat Cleaning Set

The set consists of one wash brush (50904), one scrub brush (50905), one hook and one telescopic handle. The boat brushes are used for gentle or hard cleaning respectively. They are made of polypropylene body and PVC bristles to resist better against the salt and the sun. The nylon hook is light, with small length and large angle for easier and better hooking. The brushes and hooks by are made of thread, in order to be fitted to the handle. The telescopic handle is 110cm long and can extend up to 200cm, so that you can adjust it accordingly. It is made of anodised aluminium for more durability and longevity. These cleaning products have been designed according to your needs, for your own convenience.

Code | **50906**

Boat Wash Brush Flow Thru, Medium Bristle, Yellow

Made of dense medium bristles that retain water and create rich foam, making it ideal for cleaning surfaces with no persistent dirt. It incorporates a screw thread to attach any of the plain or telescopic handles (57340-2). Even more, its improved design with flow-thru system allows you to attach the relevant handle (57344) and have a constant flow of water right at the point you are cleaning. Unlike traditional wooden brushes, this one is made of polypropylene body - 20,3cm in length - and PVC bristles 6,5cm long, offering more durability and greater resistance to sun and salt water. Finally, its white silicone bumper will protect your boat surfaces from any damage during cleaning.

Code | **50904**

Flow-thru system

Flow-thru system

Boat Wash Brush Flow Thru, Bi-Level, Medium Bristle, Yellow

Ideal to clean all parts of the boat. It features a two level surface brush. One of the surfaces allows you to hold it like all brooms and clean horizontal surfaces, like the deck. The second surface allows you to hold the handle parallel to the surface you are cleaning, which is very convenient when cleaning surfaces like the freeboard. Its dense medium bristles retain water and create rich foam, making it ideal for cleaning surfaces with no persistent dirt. It incorporates a screw thread to attach any of the plain or telescopic handles (57340-2). Even more, its improved design with flow thru system allows you to attach the relevant handle (57344) and have a constant flow of water right at the point you are cleaning. It is made of polypropylene body – 25,4cm in length - and PVC bristles 6,5cm long, offering more durability and greater resistance to sun and salt water. Finally, its white silicone bumper will protect your boat surfaces from any damage during cleaning.

Code | **57345**

Boat Scrub Brush Flow Thru, Hard Bristle, White

Ideal for scrubbing surfaces where stubborn and persistent dirt exists, since it is made of hard bristles for fast and effective cleaning. As with the medium brush, the scrub brush also incorporates a screw thread to attach any of the plain or telescopic handles (57340-2). Additionally, it features flow-thru system, which allows you to attach the relevant handle (57344) and have a constant flow of water through them right at the point you are cleaning. It is highly resistant to the marine environment, since it is made of polypropylene body 20,3 cm long and 5cm PVC bristles. Finally, it features white silicone bumper, which will protect your boat surfaces from any damage during cleaning.

Code | **50905**

Flow-thru system

Boat Brush Flow Thru, 4 sides, yellow

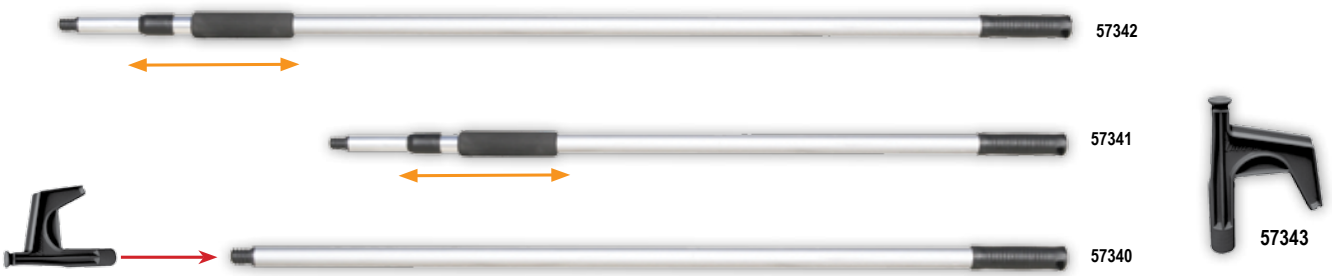
The 4-side boat brush ideal for cleaning all surfaces on the boat. Unlike wooden brooms, this has greater resistance to corrosion by the sun, salt and detergents due to its construction material. With flow-thru system that allows water to pass through the boat brush.

Code | **70689**

Flow thru system

Boat Hooks

Alternatively, the boat hook head (57343) is also available. It is lighter, reinforced for extra strength, with a wider opening, which allows you to capture objects more easily. This hook head can be used with the plain (57340) or telescopic tubes (57341 - 57342), which are sold separately. All LALIZAS boat hooks are manufactured following the highest standards. The hooks are made of Nylon and the poles of high-quality anodised aluminium for longer life.



Code	Description	Diameter (cm)	Length (cm)	
			Min	Max
57340	Aluminum Tube for hook/broom	2,5	130	
57341	Aluminum Tube Telescopic for hook/broom	2,2 - 2,5	110	175
57342		2,2 - 2,5	170	305
